Cured Small Boys of "Finnishness" at Meals

Meal time generally was a trying period in the Brown household. Invariably Bobby didn't like half the things that were served, and the things that he did like he ate with a dislike for the other half.

Africa's Sausage Tree One of Oddest Known

A tree which bears fruit apparently only to deceive is the so-called "sausage tree" of East Africa. It is a queer tree if a queer one is to be found.

Left Farmer Pondering

The farmer owned fields on each side of the golf links. It so happened that he was taking a short cut from one to another when the club's worst member was addressing his ball.

Paganini as a Father

Paganini's greatest relaxation was spoiling his son. No child was more unreasonably to be indulged than his.

Canada's Status

Canada is not an independent nation in the same sense as is the United States. Canada is a self-governing dominion within the British empire.

Business "General Terms"

Speaking in general terms, by overhead is meant those items of general expense of a manufacturing plant (for instance) which are additional to the cost of the labor and material actually entering into the production of the plant.

Power of Softness

A bank of snow six feet thick will stop a bullet shot at the distance of 50 yards. The bullet will not penetrate that downy bank of snow, but it will go through a three times the distance. It is delightful! The bullet shatters the steel, penetrates the solid bank; but the soft feathery snow has a way of its own, and it takes in the murderous lead and loves it, and as it were, soothes it.

Humble Patriot

Garibaldi, the famous Italian patriot, once lived on Staten Island, New York, where he was employed in a factory which made soap and candles.—American Magazine.

Medical Pioneer

George Bodington, an English physician, initiated the open-air treatment of tuberculosis in 1833. This treatment is so familiar today that it is difficult to realize that in Bodington's time tuberculosis was being treated by bleeding, cupping and leeching, blistering, plasters, emetics, tar vapor, chlorine and fuming nitric acid inhalations.—Hygeia Magazine.

Word to the Wise

A pint mason jar filled with boric acid solution should be in every medicine closet. Boric acid is a mild, healing antiseptic. Poured over cuts it proves healing. In a wound a compress dipped in it boric acid is a valuable aid.

Little Practical Joke Broke Old Friendship

Brown and White (which of course are not their right names) not only were near neighbors, but they worked in the same office in the Times Square district. One Saturday Brown received notice from his superior that he would have to leave immediately for Chicago to close a deal.

Long Eyelashes Called Signs of Ill Health

Long eyelashes always have been considered a mark of beauty, but it remains for a Japanese physician to bring the joy out of it by pointing out that they are also a sign of poor health. Doctor Tamnoki of the pediatric department of the Kyushu Imperial university, has made a two-year study of about 7,000 children and has concluded that most children with long eyelashes are in poor health. It has been reported to the American Medical Association.

The Weeping Statue

In the ruins of Arbroath abbey, in Scotland, is the decapitated statue of a Scottish king, and at his feet lies a headless lion. This is King William the First, called William the Lion. He founded the abbey in memory of his friend, Thomas Becket. Here the king was buried, and during the reformation his statue and that of the lion were beheaded. It is a strange fact that if the weather is going to be wet, the stone over the region of the king's heart always becomes shiny, and sometimes water actually trickles down. That is why it is called "The Weeping Statue."

Made New Football Game

The introduction of the carrying feature into football is attributed to a schoolboy named William Webb Ellis, who in the closing minutes of a drawn game in the autumn of 1828, "with a fine disregard for the rules of football as played in his time, first took the ball in his arms and ran with it, thus originating the distinctive feature of the Rugby game." In the forty years that followed, many clubs sprang up throughout England, some playing the kicking and others the carrying game, but all handicapped by a lack of uniform rules.

Long Freight Trains

The average number of cars carried by freight trains in 1923 was 48 per train. The Erie railroad ran a train of 251 cars, 8,547 feet long, on July 23, 1914. The train weighed 12,912 tons. In November, 1914, the New Haven ran a train from Victoria, Va., to Roanoke of 201 cars, 8,482 feet long, weighing 14,573 tons and making the 123 miles in 7 hours and 35 minutes. Both the New Haven and Virginia trains had only four loaded cars. The Canadian Pacific ran a wheat train of 135 cars, weighing 8,275 tons. This is about the heaviest train run for that number of cars.

Lives of Mosquitoes

There are many different species of mosquitoes and duration of life varies in different species. The old belief that the natural life of a mosquito is only 24 hours is without foundation. In no species do the young stages through which the adult passes in less than ten days. Adult mosquitoes live for several months and in some species the female may hibernate through the winter and furnish eggs for the next season.—Pathfinder Magazine.

Vague

Eight-year-old Jean was being mentally measured by a professor in the education department of the state university. The college class was observing the method. "What is the difference between revolution and evolution?" asked the professor. "Revolution is war," answered Jean promptly, "and evolution has something to do with monkeys. I don't know what."—Los Angeles Times.

Pet Mad Dog

Margery was describing her pet dog to her father's friend. "Is your dog a bull dog?" inquired the interested man. "No, he is a mad dog and barks at everybody that comes to our house," replied the four-year-old miss.

Residents of Gowdville Are Given Mail Service

Additional rural mail service on the Lorane route will be inaugurated February 1, according to an announcement of Postmaster Elbert Smith, the route having been extended to serve residents of Gowdville. The addition to the route starts at Gowdville bridge and extends west one mile to the Franklin farm. After retracing the mile to the highway the route follows its usual course. Between 40 and 50 persons will be served by the extension. Those who wish to take advantage of the new service have been asked to provide themselves with standard mail boxes.

Ruby Glasier Back at School

BLUE MOUNTAIN, Jan. 28.—(Special).—Ruby Glasier, who was accidentally shot through the windpipe several weeks ago by a child playmate, was able to be in school for the first time since her accident.

Five Offices of County Finish '29 With Balances

Five out of 11 county offices were kept within their budget allowances for 1929, according to the records of the county clerk. The emergency fund was used in only two offices. Those five were offices of the assessor, clerk, district attorney, justice of peace and school superintendent. Departments in the red were circuit attorney, court, juvenile court, sheriff, surveyor and treasurer. Other items in the general fund which showed balances were advertising, court house, emergency, health, hospital, road, registration and election, sealer, tax rebate and widows' pensions. Items in the red were auditing, care of poor, coroner, slaughtered animal and seed, hospital fund. Although more money was transferred to the emergency fund by offices which came out ahead than was taken out by offices which operated over the budget, money in the emergency fund was \$16,782.15. The amount taken out to carry departments that went over budget allowances was \$7,910.52.

Officers Local Battery Are Up for Advancement

Examinations for first and second lieutenants were given Tuesday by Major Cyril A. W. Dawson of Salem, regular army instructor, at the local battery. Those recommended for a first lieutenant, and Samuel Schwartz, who has been recommended for a second lieutenant. Donald M. DeLong, battery sergeant, local national guard unit and Second Lieutenant Bukowski has been recommended to fill the vacancy and First Sergeant Schwartz to fill Lieutenant Bukowski's place. They are making preparations for annual inspection to be held the last of February and has majors for eight first class recruits. Major Dawson will be inspecting officer.

Marie Agnes Crandall Dies

Marie Agnes Crandall, daughter of Mr. and Mrs. R. E. Crandall, of Leona, died Saturday at her parents' home. She was aged 18 years, 17 days. She was born January 8, 1912, in Hope, Ida. The family moved to Leona seven months ago from Tacoma, Wash.

Funeral Services Held at 2 o'clock Tuesday

Funeral services were held at 2 o'clock Tuesday afternoon at the Mills chapel and Rev. Duncan P. Cameron of the Presbyterian church officiated. Interment was in the F. A. M. C. O. P. cemetery. Miss Crandall was a member of the Sprague Memorial Presbyterian church of South Tacoma, Wash. She was a sister in the Drain high school.

Boy Scout Honor Court Is to Be Held Tonight

The monthly boy scout court of honor will be held at 7:30 tonight in the city hall, instead of the high school auditorium as previously announced. A number of merit badges will be awarded and a number of scouts will be up for advancement. An Eagle palm, the first to be awarded in this city, will be given to Llewellyn Rex, Eagle scout. Rex was one of the first two scouts in this city to earn the rank of Eagle together properly.—From "Paganini of Genoa," by Lillian Day.

Changes Are to Be Made in Court House Rooms

Rearrangement of some of the rooms on the second floor of the county court house in order to provide more commodious quarters for the Lane county chapter of the American Legion is planned by the county engineer. The room occupied by the chapter is inadequate, according to Judge C. P. Barnard. No definite plans have been made as yet as to what will be done. It is possible that another room will be constructed on the third floor over the skylight above the main stairway. This room would be used by the county engineer's office.

Children of Lane Given Toxin-Anti-Toxin Serum

Between 1500 and 2000 children of Lane county have been given the toxin-anti-toxin treatment during the past two months at clinics which have been held by the Lane County Health association, according to a report made Monday. About 1000 children have been vaccinated. The last toxin-anti-toxin clinic for the present will be held Wednesday at the Hoselton school. The toxin-anti-toxin, diphtheria preventative, was first given to Lane county school children four years ago. The Schick test which determines whether the toxin treatment has been successful will be given each child in about six months.

Come Into the Kitchen Ella M. Lehr.

"Breakfast by Wire." "Other day in poking around through a stack of newspapers which somehow just seem to stack up around my ears, I ran across this item in a quiet unassuming corner, surrounded by murders, divorces, hold-ups and other modern choice bits. The average bill for electric lights and appliance operation is \$25 a year in the American home. The household spends \$95 a year on tobacco, \$68 a year on gasoline, \$50 a year on ice cream and \$58 a year on candy. "Quer, isn't it?—we think we can't afford one thing and immediately spend that hard-earned cash on something else like chewing gum and rouge and cigarettes and movies and "all such." Of course grimy fingers from handling the coal bucket, scorched cheeks and smarting eyes when the family craves waffles—ah these are nothing—if we can manage to obtain the latest jazz record! And the comfort of breakfast by wire—a snap of a switch. Percolator, toaster, waffle iron (so easy—no need to grease the iron—no turning—both sides cooked at once—no need to tramp back and forth from the kitchen to breakfast table—piping hot—as you crave it). Electric grill—those versatile affairs which cook two or three things at once—and still we sigh for the "good old days." A temperature controlled range, mechanical refrigerator and electric dishwasher is our idea of a long-sought Utopia for housewives—excuse me, I mean "home-makers." The modern breakfast nook is equipped with a number of convenient outlets which eliminate the usual drapery of cords from the light socket. Double and triple sockets are wonder-working in the absence of outlets and enable us to have a complete breakfast by wire! The breakfast nook—such a charming innovation in comparison with the half-acre kitchen of our grandmothers' day (and maybe our own). Of course you know it—the huge barny room where daily food good housewife ran the marathon in a beaten path from sooty coal range to sink, to pantry, to the oil cloth covered table in a far corner. Too often the kitchen was, and is, the stepping stone where daily life lighting is concerned! We persist that there should be "contented people" as well as "contented cows!" Lives there a man who can restate of the cozy nook—table set with colorful linen and gay little flowery breakfast dishes, pussy willows and jonquils in a little brown bowl—and waffles! The diet of a Digger Indian will in time make one a Digger Indian—yet?—no? Hence we offer you three breakfasts—over the wire! Breakfast by Toaster. This type is pretty well standardized, by necessity. It revolves around daily fruit, coffee and toast, with possibly a ready-cooked cereal, and varies mainly with the choice of bread; raisin bread and nut breads topped provide additional nutrition, and it's surprising how good yesterday's muffins or biscuits are when split, browned and spread with a bit of butter and cheese. The Grill Breakfast. Grills or tabletoasters are such handy things—so convenient for breakfast, and also for lunch, quick meals and late suppers. Creamed dishes are especially adaptable. This versatile creature cooks three things at once—what more could one wish for instance: 1. Broiled bacon, toast, fried eggs. 2. Hot cakes, sausage, toast. 3. Steamed eggs, fried potatoes, oatmeal bread toast. 4. Creamed beef or poached eggs on toast, left-over buttered asparagus. 5. Fried mush (beware the calor-

Announcing

Waffle-brown Meals. Crisp, crunchy golden brown waffles—maple syrup—steaming Java! Wouldn't that tickle his taste buds? More over—one doesn't need the digestive tract of an anaconda to get away with it. The secret is a very hot, evenly heated iron. The electric waffle iron does not need greasing—hence more fat must be added to the batter (such as the recipe given above).

Majestic Waffles

(Any time is waffle time.) Sift together—2 cups sifted flour—4 teaspoons baking powder, 1/2 teaspoon salt, 2 tablespoons sugar. Beat until thick and lemon-colored 2 egg yolks—add 1 1/4 cups sweet milk. Add slowly to dry ingredients along with 4 tablespoons melted shortening or oil. When mixed fold in 2 egg whites, stiffly beaten. Pour the batter—about 3 good tablespoons—on the lower grid of the hot waffle iron. Close quickly and bake about 2 1/2 minutes. Serve at once. Waffles may be kept hot and crisp by placing directly on the rack or on a plate heated to a moderate degree (350 degrees). Makes 5 to 6 waffles. Variations: 1. For thick waffle use 1 1/2 cups milk; for a very thin waffle 2 cups milk. 2. Buttermilk or Sour Milk Waffles. Use 1 1/4 cups sour milk or buttermilk, and 3/4 teaspoon soda along with 1 teaspoon baking powder instead of the sweet milk, and 4 teaspoons baking powder. 3. Bacon Crispies. Place 2 strips uncooked bacon across the waffle batter on the lower grid, just before closing the iron. Cook about 2 1/2 minutes. 4. Cheese Surprise. Just before closing iron, sprinkle about 1 tablespoon grated American cheese over the "latter. Sausage or uncooked chopped ham may be baked in the waffle by sprinkling on in the same manner. 5. Leftover Waffle Batter may be used by adding 1/4 teaspoon baking powder to about 1 cup of batter. By adding a bit of flour the batter may be used for hot cakes.

Drain Man Buys Home Here

The J. F. Barnes place at Lathrop, containing six acres, was sold Wednesday to Ora A. Powell of Drayton by the Hall & Johnston realty company. The Powell family will take possession February 1 to make the place their home.
