MEN AND DEER.

Three men were hunting near Goldsboro a few days ago. They probably thought they were the only ones taking advantage of the high snow that put wild animals at their mercy.

But there was another out on the same mission.

One of the party of three saw some bushes move.

He didn't wait to see whether it was deer or buck.

As long as he wasn't willing to give the deer a sporting chance, as long as he was hunting out of season, it made little difference whether it was deer or buck.

So he fired.

When the hunter and his two companions reached the spot where the supposed deer had moved the bushes they found that a solo hunter had been killed.

The coroner and a deputy sheriff investigated the accident but no warrant was issued for the arrest of any one of the three.

Even the taking of life was in this instance not excusable, regrettable as it is that such a statement has been made.

The person with a high powered rifle who shoots first and investigates afterward is in the same category as the driver of a high powered car who takes the left side of hairpin curves at 60 miles the hour.

No one is safe on the road when behind wheels of high powered cars are crazy drivers who make the other fellow do all the getting out of the way, and don't always give him a chance to do that.

No one is safe in the woods so long as there are those who shoot at every moving bush.

And there must be many of these, for we probably never hear of the mistakes that do not result seriously.

Juries are so lenient that it may be useless to prosecute for this involuntary manslaughter.

But we might at least uphold the dignity of the game laws and issue warrants on charges of hunting out of season.

There could be little objection to such action.

HOSPITAL NEEDED.

The fact that four victims of an auto crash at Anlauf last week were six hours in reaching a hospital emphasizes the need of a hospital in Cottage Grove.

Two of the victims have since died. Could they have received hospital treatment here they might have lived, who knows.

In cases of severe injury a few minutes may be the difference between life and death.

Physicians who ought to know say that a hospital here could not be made to pay.

But with the continued increase in employees in a hazardous industry, that of lumbering, there ought to be sufficient public spirit here, there ought to be enough regard for the lives of those who are on our payrolls and make this an industrial city of considerable magnitude, to take a chance on what we are willing to admit may not at first prove a paying investment.

It seems to one on the sidelines, however, that about a quarter of the business of Eugene hospitals go from Cottage Grove, and Eugene is supporting three large hospitals.

Surely Cottage Grove is going to have a hospital some time. If eventually, why not now?

On the November ballot will be a constitutional amendment providing for cabinet form of government. The probabilities are that this amendment will be adopted by a tremendous majority. If such should be the case, there should be the executive office one who has familiarized himself with the possibilities of this form of government, who has definite ideas of what should be done to get the best results from such a rearrangement of state government. Senator Charles Hall was active in several sessions in promoting this legislation, which makes him a logical selection for the gubernatorial job.

THINGS WE THINK

Things Others Think and What We Think of the Things Others Think

—HOW GOVERNOR NORBLAD may be both of Swedish birth and black haired is explained by that connoisseur of pulchritude, Claudius Elclair Ingalls, barbaric bard of Corvallis.

—It's what's under the hair that counts, Claudius tells us.

—If that's what counts, we can't understand why the barbaric bard has such a perfect figure.

—Every city wants splendid streets and pretty parks, and should have them, but streets and parks never get splendid enough or pretty enough so that they are fit places for young persons to spend all their spare time.

—F. SCOTT, WEST SPRINGFIELD, writing in the Eugene Register, speaks of the beautiful but oftentimes voluptuous Willamette, which is about to be surveyed for canalization.

—When the engineers come maybe they will give us a diagram of the "but oftentimes voluptuous" propensities of this wandering, wayward waterway of ours.

—Aesthetic dancing is recommended as a method of increasing the bodily vigor of girls. Wielding a mop will bring the same results at much less expense.

—THE GUBERNATORIAL CANDIDATE who wants to make a real hit will include a plank in his platform providing for more parking space in Phil Metchan's Imperial hotel.

—Good cooks need not wait for leap year.

—SEASIDE IS OUT AFTER NEXT YEAR'S BUSINESS. News reports from there say that the population is rapidly becoming all women.

—That's what attracts to a summer resort, isn't it?

—But with all this publicity, how can Seaside hope to keep it that way?

—The less a man has in his head the more readily it expands under hot air treatment.

—THE OLD THEORY that every high school student should have a knowledge of mathematics and languages has been exploded by University of Oregon professors, so we are informed in a news story in the Eugene Guard.

—We should say that a knowledge of mathematics should go at least far enough so that the student will be well grounded in the least painful method of subtracting from dad's pocketbook and in some easy method of adding a few good words to his college vocabulary.

—Weston Leader: Dr. Olga Stastny of Omaha advises the business women to "load like a man," relating at ease with her feet above her head. Men in the same office wouldn't work much, either.

—The fellow who attributed his theft of money to fear of being held in contempt of court if he did not pay alimony due his wife, might have done better if he had some time before showed fear of doing the things that resulted in the necessity of paying alimony.

—We congratulate Eugene on securing a paper mill. And if Eugene can get a paper mill, there is every reason why Cottage Grove can look forward to one or several.

—We can furnish more pulp wood than Eugene, while the freight rate can be but little higher.

—GOVERNMENT CONTROL NOT PREVENTIVE.

To the Editor: On November 15 Gifford Gordon, a prohibitionist, submitted to the editor of the Toronto Globe, the largest and most influential daily in Canada, a list of questions concerning the working of so-called government control, which is the way Canada is trying to work out the liquor question.

In his reply the editor of the Globe, Elmore Phillipott, said that liquor consumption has doubled in Ontario in two years, that drunken automobile drivers have multiplied by ten while the number of cars has doubled, that deaths from accidents due to drunken drivers under government sale has increased enormously, and the industrial accidents have increased 7 per cent faster than pay rolls.

From the foregoing it seems probable that the United States, with its far-reaching legislation, has taken the only wise course and one that there should be no interference with by those who would again foist upon us the conditions of saloonism.

—DUNCAN P. CAMERON.

—Lost Traces.

New Haven Journal-Courier.

A college president says that his alumni, by the time they reach the age of 35, have lost all traces of having gone to college. If that means they've begun to wear hats and garters, it's all to the good.

—Sheriff's Business System Saves \$1000 to County

Lane county was saved \$1,000 in the administration of county government in 1929 by a system of tax turnover originated by Sheriff H. L. Bown.

This saving came about in a \$1000 increase of interest on daily balances credited to the treasurer of the county in the several banks which are official county depositories.

Other counties in the state are looking into this system.

By state laws the deposits of sheriffs in the several banks do not draw interest but interest is allowed on accounts of treasurers.

Lane's system operates through daily turnover of tax collections from the sheriff's office to that of the treasurer. In this way money collected by the sheriff starts drawing interest from the time it is collected.

The sheriff and the treasurer handled \$2,300,000 tax collection money in 1929. The interest rate on daily balances is two per cent. Interest paid on these daily balances was \$1000 greater in 1929 than it would have been had the system employed by other counties been followed.

Attempted County Jail Delivery Is Frustrated

Discovery Is Made After Sheet Metal Has Been Removed From Brick Wall.

Another attempted escape by inmates of the Lane county jail was frustrated Monday night when discovery was made that the sheet metal that lined the interior of the north wall of the building had been pried loose, bent back and a large hole cut into the outside brick wall of the building.

Investigation by the sheriff's staff led to the belief that Berie O. Thompson and Robert O. Beeman were implicated in the plot for the escape. These men were charged with an attempt to break jail and were bound over to the grand jury.

Shall was set at \$1000 each.

Hacksaws were used in cutting the bolts that held the sheet metal and also for cutting a length of water pipe that was used in gouging out the bricks in the wall. The hacksaws were not found.

If the hole had been cut through the only obstacle to freedom for the 30 prisoners would have been the iron fence surrounding the building which could easily have been scaled.

In past years a number of attempts have been made by inmates of the jail to cut through the north wall and several holes have been gouged in it.

The old building is a nightmare and a constant watch has to be kept to prevent the escape of prisoners. Sheriff Harry L. Bown said.

The sheriff said that some new sheet metal will be placed around the bottom of the wall on the interior to prevent any further attempts to cut the rear wall.

Six years ago a big hole was cut in this wall of the building one night and the last layer of bricks was being forced out when the discovery was made by city police.

The west wall has also been a popular place for excavation work by prisoners and a large number have made their escape through openings in this side of the building.

Major Dawson Checks On Armory Robbery

Major Cyril A. W. Dawson of Salem, regular army instructor for the 24th coast artillery, was here Tuesday to investigate the robbery of the Cottage Grove armory on New Year's night.

News of the robbery was kept quiet so that officers might check on possible clues without warning the thieves.

Approximately \$1000 worth of clothing and blankets was taken and all of the stolen goods were used as could be easily resold to army goods stores.

The robbery was discovered by Harry L. Hart, who went to the armory to clean up after a dance given by the Five Oregonians, of which he is a member. He reported to Captain C. C. Cruse, commanding the local national guard unit, who notified Deputy Sheriff Green Pletcher.

CORRECT ADVERTISING PERCENTAGES.

The Harvard School of Business Administration has released the following percentages of sales which each line of local business should invest in advertising:

Department stores	3.87
Furniture stores	3.72
Men's furnishing	3.16
Jewelry stores	3.10
Drug stores	2.74
Shoe stores	2.65
Grocery stores	1.83
Farmware stores	1.12
Lumber dealers	.30

Basketball Team's Boat Is Ice Bound

FLORENCE, Jan. 27.—The wish of the ball through the basket, fast breaking dribbles or speedy passing attacks were tame thrills to a party of Florence young folk who made a boat trip to Mapleton Friday night for a basketball battle between the high schools of the two communities.

The start of the return trip found their boat ice-locked, and a thrilling night was spent by the 25 Florence folk at Mapleton, some had died around a hastily built fire at the Southern Pacific depot, others waiting for morning in the boat, and others finding refuge at the homes of friends.

Professor Morgan Owings of the Florence faculty provided money for eight to return by train at 3:25 a. m., and the others stayed until morning, when the ice parted and allowed the boat to get through.

DAIRY PRODUCTION CLASS AT HIGH SCHOOL RESUMED

The part time course in dairy production being sponsored by W. P. Smith-Hughes instructor in the high school, which was postponed during the recent bad weather, will resume Thursday, February 6, and the class will meet at 8 o'clock in the agricultural room of the high school.

The class is being held to discuss and study the question of producing green or succulent feed for cows, a question that is of prime importance to everyone who is trying or intends to try to make a profit in the dairy business.

Mr. Averill explained that this is a special class for young men not registered in the regular day classes of the Smith-Hughes department, the object being to give an opportunity to young men to get together and discuss their farm problems. Any young man interested in dairying is welcome to these classes and may add to the interest by giving his problems and experience.
