Give the Home Manufacturing Plant First Chance

Sixty per cent or more of Cottage Grove's payroll comes from the lumbering industry. There is little prosperity for Cottage Grove except when its forest products are being sold. The first thought of everyone in any community should be for the product which brings it prosperity, for prosperity is what each of us wants. Use of the home product means bigger and better payrolls to manufacture that product. What better way to insure use of our forest products than to buy your requirements in lumber and timber from a plant that uses Cottage Grove materials exclusively in its business. Every finished board, every door, every window, every piece of finishing lumber, every shingle that is made in Cottage Grove has in it not only the original wages of those who cut down the trees, the wages of those who worked in the sawmill, but also the wages of those who did the finishing work, and all these wages are spent in your community to bring prosperity to you.
