The Store That Appreciates Your Trade

at the home of an uncle, Jim Plank, before returning to Dunsmuir.

Mr. and Mrs. Fred Wright, who have spent several weeks at Newport, are expected to return home this week.

Rev. J. Sams and Rev. Ira R. Aldrich and family visited Sunday afternoon at the Wickes home near Dorena. Mr. Wickes, who has been seriously ill, is reported to be somewhat improved.

Dance at Lorane Grange hall Saturday night. Good music and a good time. a28c

Mr. and Mrs. D. H. Hemenway returned Monday night from a week end spent at Myrtle Point and Winchester bay.

Mrs. I. B. Morris suffered painful bruises Tuesday morning when she fell in the back yard of her home south of this city.

Mrs. Beale Smith and son Merton of Nampa, Ida., visited this week at the Methodist parsonage with Rev. and Mrs. Ira R. Aldrich while on their way home from California. Rev. and Mrs. Aldrich formerly were in the pastorate at Nampa.

Miss Ila Cooley, daughter of Mr. and Mrs. C. A. Cooley, is in St. Vincent hospital in Portland. Her condition is said to be serious.

Mrs. Hugh E. Rossan and children Bill and Eleanor of Eugene are visiting at the home of Mr. and Mrs. F. L. Grannis.

Rev. Duncan P. Cameron, state chaplain of the American Legion, officiated Wednesday night at the double wedding at the Lane county fair.

Mr. and Mrs. Lloyd Erskine and Mr. and Mrs. Uhlrig of Hemingford, Neb., who had been visiting at the home of Mr. Erskine's aunt, Mrs. F. E. Mendenhall, left Thursday for Crater lake. They will return Saturday to spend the remainder of the week.

Mrs. Frank Morris, who had been visiting at the home of Mr. and Mrs. I. B. Morris, has returned to her home in San Jose, Cal.

Mr. and Mrs. D. J. Scholl returned Sunday from spending a week at Newport.

Mrs. Vinal Randall and son Vinal Jr. returned last week from Prineville, where they visited several days at the home of Mrs. Randall's parents, Mr. and Mrs. J. A. Powell.

Mrs. Melia Currin and Miss Lulu Currin returned Monday from a week's motor trip to Crescent City, Cal., Klamath Falls and Crater lake. They were accompanied as far as Klamath Falls by Mrs. Adrian Merryman, who was returning to her home in Dorris, Cal., after spending the summer here. Mrs. Currin and Miss Currin also visited in Bend and returned home by way of McKenzie pass.

Mr. and Mrs. W. L. Hatch and Mrs. J. Q. Willis visited in Sutherlin Wednesday of last week.

Rev. Duncan P. Cameron, state chaplain of the American Legion, returned Saturday from Pendleton, where he spent several days on business connected with the American Legion.

Mrs. Mary Hambrick returned Friday from a ten-day visit in Portland and Seaside. She spent several days in Seaside with her sisters, Mrs. C. F. Cathcart and Mrs. C. M. Van Buren. She visited in Portland with another sister, Mrs. Helen Vilas. On her return she stopped off to visit a sister, Mrs. Lucy Armstrong, who is slowly recovering from a daughter's home from a recent illness during which she spent four weeks in an Albany hospital.

The Henry Bennett family returned last week from California, where they visited with Mr. Bennett's brothers, Carl, Ernest and Glenn.

Mr. and Mrs. Ben Elliott and daughter Rose and Victor Venburg left last week for their homes in San Diego, Cal., after a visit at the home of Mrs. Catharine Bader.

Victor Goff returned last week from a visit in Marshfield with the W. J. Morrow family.

Mrs. C. C. Cruson returned Tuesday morning from a visit in Portland. Mr. Cruson motored down for her.

Mrs. Fred Bennett and son Fredrick left Thursday afternoon for McMinville, where they will visit at the home of Mrs. Bennett's aunt, Mrs. Strong. They made the trip with Charles Robinson and Jack Miller, who went on to Portland to attend the annual convention of the National Association of Millinery.

Mr. and Mrs. Harold Litwiler are spending a vacation near Los Angeles with Mr. Litwiler's parents. Kenneth Fisher is acting as manager of the local MacMarr store in the absence of Mr. Litwiler.

Earl Scovall of Salem, district manager for MacMarr stores, is helping in the store.

Mrs. Bertha Nibbecker and son Russell, accompanied by Mrs. Nibbecker's sister, Alice Selby, all of Dunsmuir, Cal., arrived here Sunday by motor to visit at the home of the women's aunt, Mrs. Truman Clark. They will leave Friday for Rogue River, where they will visit

Large Numbers Visit Oregon Caves. Labor Day week-end many came year seem to realize that this is their last opportunity to take a little vacation. Schools are opening; everyone gets busy; so away they start. The highways to the Caves are almost perfect. Last year nearly one thousand visitors were at the caves Labor day week-end. a28c

Fast Work. Mike was engaged to do a job of painting for Mr. Smith. After a while he came in saying the job was completed and asked for his money.

"But, Mike, I wanted two coats on that building. I'll pay you after the second coat," said Mr. Smith.

"You've got it," said Mike. "I mixed the first coat with the paint for the second and put on both coats at the same time. Speed is my motto."

Too Much. Mutt, as the family dog is very appropriately named, thoroughly enjoys automobile riding, and he day by day is getting the other seat to the front and treading with heavy paws upon every one in transit. Sunny, his little master, became surfeited with this procedure, and exclaimed in exasperation, "Look here, Mutt, I don't like so much dogness!"

Reminiscence of Early Days of "Fair Harvard"

The student who works his way through college is not fairly recent phenomenon.

He can go back in 1657 in this country and find a precedent at Harvard. Incidentally, the child prodigy can find a precedent in the same case, for the student in question, Zachariah Bridger, enticed Harvard at the age of fourteen, and graduated four years later, at the age at which many are just getting through high school.

Zachariah, according to information received by federal educational officials, served as a waiter and rang the school bell. The student and his school were charged with "commonness and slovenliness" (board, together with drink ordered from the butler) "raucous, study-rent and bed" (room and bed), "fyer and candell" (fire and candles), "fwood, etc." and was charged with "bringing corn from Charlestown."

He was credited on his account with "silver, sugar, wheat, malt, Indian (corn) hooze and a hush of panapapa." He was also given on December 31, 1654, credit for "ringing the bell and waytinge" 1 pound 2 shillings and 6 pence.

The total cost of an education at college in those days ran from \$100 to \$200 in silver and groceries.

Frenchman First to Get Idea of Sewing Machine?

France has celebrated the centenary of the invention of one of her chiefest of the sewing machine. It is claimed that it was M. Bartholomew Thimmonier, a native of Arles, in the Rhone, who first conceived the idea of making a machine do the work of hand-driven needles.

Thimmonier was a tailor, but, once he began to work on his idea, he became so engrossed in it that he neglected his own business to the point of ruin, and many of his neighbors roundly declared that he was a madman. He persevered in his experiments, which were the most difficult, because he had not even an elementary knowledge of mechanics, and in 1830 took out his first patent.

An inspector of mines who happened to be visiting the region at that time realized the great potentiality of Thimmonier's invention, and installed him in a workshop in Paris.

Helium Production. The production of helium from natural gas in the United States for filling balloons and airships originated in the United States bureau of mines in the spring of 1917 just after this country entered the World war. Helium had been discovered as a constituent of natural gas in 1906 at the University of Kansas by Professor Cady and Doctor McFarland. It had been discovered in mineral substances by Sir William Ramsay as far back as 1895, and its properties were then studied sufficiently to demonstrate that if it could be obtained in sufficient quantity it would prove the ideal gas for balloons and airships on account of its extreme lightness and absolute inertness.

Odd Smallpox Cure. Voltaire, back in 1723, suffered from smallpox. He recovered after being in bed a month. To the father of a woman who was to play a great part in his life in the following 10 years, he made this optimistic report of the remedy which he is confident alone made possible his quick recovery.

"Smallpox is, in a simple form, merely the blood ridding itself of its impurities, and positively paves the way to more vigorous health."

"The doctor gave me emetics eight times, and made me drink a hundred pints of lemonade. This treatment, which you will think extraordinary, was the only one which could possibly have saved my life."

Presidential Office Vacant. Inasmuch as the term of the actual President expires at midnight, March 3, and it is the custom for the incoming Chief Executive to take the oath of office at midnight, March 4, there is, strictly speaking, a 12-hour period when the country is without a President. The law is silent as regards the hour when the President shall take the oath of office, and it has been a matter of personal convenience. In the event of a pressing emergency there is nothing to prevent the incoming official being sworn in during the first hour of the fourth of March, although this has never been done.

Joy of Youthful Readers. Probably Edward Stratemeyer could have claimed the distinction of being the most prolific writer of juvenile fiction. During the 40-odd years of his writing life he produced more than 100 juvenile books, "Soldier of Fortune" series, the "Putnam Hall" series and the "Frontier Boys." Writing under a variety of pen names and with numerous secretaries, this author brought out in addition to the above mentioned, boys' lives of many great men.

Most Readers Do Not Read. Journalism is increasing rapidly in popularity as a profession, but the majority of adults do not know how to read a newspaper intelligently. This is the statement of a California educator who urges classes in newspaper reading in the advanced grades of schools. In every phase of life, all over the country, there are great stores of unutilized, vital and interesting information on a variety of subjects, most of which is skimmed over by the average reader.

Range-Finders at Sea. Range-finders similar to those in warships are now being installed on passenger liners. By their aid the distance of objects within a range of 25,000 yards can be determined with a degree of accuracy sufficient for practical purposes. Thus the distance of an object 10 miles away can be determined within 600 feet.

Religious Movement. The Fellowship of Prayer is a movement under the auspices of the commission on evangelism and life service of the Federal Council of Churches. It works especially for devotional observance of the pre-Easter or Lenten season.

Loose Leaf Binders. Sentinel.

Columbus Might Have Saved Mayan Culture

If the United States lacks culture, it can be blamed upon Columbus, according to Gregory Mason, explorer, writing in Country Home. Had Columbus followed his original route on his subsequent trips, the civilization that is now the United States might have been founded upon the Mayan race, which represents the oldest civilization in the world.

Mason declares that Columbus, on his fourth voyage in 1502, encountered a Maya merchant off the coast of Honduras, but instead of going to the merchant's land, he turned his prow in another direction and left it to despoiling Spaniards of another day to find and crush the last remnant of a great civilization that once thrived there.

The Mayas, says the writer, were the most highly civilized of all the red-skinned natives of America before the white men came, and might have provided a ready-made foundation for a new white race, whereas the hardy settlers of the North had to carve out their own foundations from the wilderness.

"Medicine Woman" Still Has Faith of Mexicans

More curious types, echoes out of the long past, exist in Mexico than in any other country in Latin America. One of these is the "medicine woman," who more than four centuries ago was an institution through the land, and since then all have continued to depend on her to fight disease, real or imaginary. But the medicine woman has ever been more than a vander of medicinal herbs. She was and still is believed to possess the power of witchcraft and this power she gives to certain of the herbs she offers for sale. She is, therefore, a strange and potentially important personage in the lives of the masses of ignorant Mexican Indians and peasants and not infrequently she is held in respect by middle class families.

The medicine woman is still an institution from one end of Mexico to the other, and where the native Indian languages are still spoken, approximately 50 per cent of Mexico, she has lost little if any of her pre-conquest prestige.

Eva Byron, 14 years old, of Boulder, Colo., has entered the University of Colorado as a regularly registered student.

Bank of Italy Is Successful Advertiser

The Bank of Italy, in a full page advertisement in a trade publication, says that a very large measure of its success has been due to newspaper advertising.

The Bank of Italy, too, is continuing to advertise in newspapers, though it is one of the best known institutions on the Pacific coast. But, there is a certain type of merchant who says, "Everybody knows me, so I don't have to advertise." That's one difference between him and the management of the Bank of Italy. The other is that the Bank of Italy is highly successful.—Corvallis Gazette-Times.
