BIGGER AND BETTER

THE GREAT AMERICAN VALUE

Fine-car distinction and quality in the new Chevrolet Six

Again, Chevrolet and General Motors have utilized their combined resources to establish a new and higher standard of value for the American motor car.

The new Chevrolet represents a type of economical transportation that America has long anticipated—a low-priced six styled with such striking talent and good taste, so smartly beautiful and complete in its perfection of detail, so advanced and refined mechanically that you will immediately recognize it as the Great American Value.

This great value is the outcome of four basic Chevrolet advantages: (1) The savings of volume production in nineteen immense, modern plants. (2) The economies which result from great

purchasing power. (3) The benefits of continuous research in General Motors laboratories and on the General Motors Proving Ground. And (4) the close association with the Fisher Body Corporation who, this year, have surpassed all their previous achievements in developing bodies of outstanding quality, refinement and value.

These basic advantages have made it possible to build a finer car at lower cost. They have enabled Chevrolet to offer a car with a longer wheelbase—greater roominess and comfort—strikingly smarter style—impressive new luxury—more thoroughly satisfactory performance—greater dependability. And to pass on these savings of efficient manufacturing to the buyer in the form of lower prices!
