CAN I Learn to Fly?

By
WILLIAM R. NELSON

Getting Out of a Stall

STALLS, their causes, effects and how to get out of them, was the "chapter" next learning to fly "studied" the next trip up. Apparently convinced that I was progressing satisfactorily with take-offs, routine flying and landings, my instructor took advantage of a poor day for landing practice to advance me another step.

"In a stall the plane may fall off on a wing (sidewise) and spin in," my instructor explained through the speaking tubes as he shut off the motor momentarily at 3,000 feet (the highest I had been). "Notice that the ailerons have little or no effect in a stall. We hold the plane straight by kicking the rudder sharply. Keep off of the controls and watch."

He pulled back on the stick and we shot skyward, the motor still idling. As we picked up forward speed again, he pulled it back and we came out of the dive.

"In this next one follow through lightly on the controls. Notice the quick kicks I give the rudder pedals."

Again he pulled the ship up into a stall. As we plunged downward I felt the rudder pedals moving sharply, first one way, then the other, as he held the ship to a straight course, and the stick go forward, then come slowly back.

"Now you do it," he said through the speaking tubes. "Don't dive too far before pulling up."

I pulled back on the stick, and we shot upward—straight upward, it seemed. Then came that plunge downward. I moved the stick forward to neutral. Down we went. Slow at first. Then faster, faster, faster.

When we were headed nearly straight down I pulled back on the stick, kicking the rudder pedals as he had done, right to head off a leftward movement, left to head off a skid to the right. At times my feet were pumping as though I was riding a bicycle.

As we came out of the dive he opened the throttle and we started climbing back to 3,000 feet. We had fallen 2,000 feet in the three stalls. A half dozen more practice stalls and we headed back to the airport. That lesson made me "woozie."

Cure for Convulsions

The following was taken from a recent report by a nurse in one of the cities of New York state: "While taking a history of a pre-natal history I asked the mother what was the cause of a previous child's death; she replied that it died of convulsions. I then inquired if she knew what to do for convulsions. She answered immediately, saying 'stand with the baby in your left arm and with back to the stove, remove baby's shirt and throw it over your shoulder into the fire.'"

Losing His Identity

The new baby's features had been discussed for weeks. Likenesses to grandmother, grandfather, aunts, uncles, sisters and brothers, not to speak of father and mother, had been pointed out in detail. Bob was becoming weary as well as disgusted. One day he complained, "It is getting so I cannot tell who I am any more. They say the baby looks like me, and I look like daddy, and that the baby looks like daddy. I don't know who I am sometimes."

Cannot Eradicate Grain

Grain is inherent in paper. There is no way of removing it.

Eighth Grade Examinations

The uniform state eighth grade examinations will be given in districts where the teacher has applied for questions and who has pupils who are legally qualified to take the same, on Thursday and Friday, May 14 and 15, 1931, at the school house. Questions will be sent to the chairman in each district for the same.

ADMINISTRATORS NOTICE OF THE SALE OF REAL ESTATE

Notice is hereby given that by virtue of an order of the county court of Lane county, Oregon, duly made and entered of record in the matter of the estate of James K. Polk May, deceased, the undersigned, administrator of said estate, will, on and after the 15th day of May, 1931, offer for sale and sell at private sale the following described real property belonging to said estate, to-wit:

The southwest quarter of the north east quarter, the southeast quarter of the northwest quarter, the northwest quarter of the southeast quarter; the northeast quarter of the southwest quarter; and lot 2, of section 22 south of range 3, west of Willamette meridian, within six months after the date of first publication of this notice.

Sale will take place at the law office of Herbert W. Lombard, First National bank building, Cottage Grove, Lane county, Oregon. Terms of sale, cash in hand. Dated and first published this 17th day of April, 1931.

Date of last publication May 15, 1931. F. C. WHEELER, Administrator of the Estate of James K. Polk May, Deceased.

HERBERT W. LOMBARD, Attorney for Estate. s17-m13c

GUARDIANS NOTICE

Notice is hereby given that the undersigned has been appointed by the court of the State of Oregon for Lane county, as guardian of the estate of Virgil M. A. McKibben, a minor. All persons having claims against the estate of said minor are hereby required to present the same to me, duly verified, at Cottage Grove, Lane county, Oregon, within six months after the date of first publication of this notice.

Date of first publication April 17, 1931. NETTIE C. MCKIBBEN, Guardian of Virgil M. A. McKibben, a Minor.

J. E. YOUNG, Attorney for Guardian. s17-m13c

Redwood Unique

The redwood is the only one bearing tree which will sprout from the stump after being cut.

Cure for Unemployment

A new job is the best remedy for the loss of an old one.—American Magazine.

Says WILL ROGERS

BEVERLY HILLS—Well all I know is just what I read in the papers, and believe me I have finally found a paper that got some thing in it. It is the "St. Thomas Mail," of the town of St. Thomas, Virgin Islands, U. S. A.

Now you might have read in the local press various references to Mr. Hoover's statement about the condition of the islands after he had visited them a few weeks ago. Now in all fairness to our President, I don't think he meant it exactly like it was reported to have been said. He did say that they were in a pretty bad condition financially, and he might have in order to stir up a little interest in them and perhaps be able to get them a Federal contribution of some kind, have thought he was doing them a favor by bringing to the public eye the fact that they were bad off. But at any rate it seems to have had the opposite effect, and if you ever saw anyone up in arms in these Virgin Islands.

In the days before America had gone "Racketeer" it made Rum, and good Rum, it was a legitimate business, carried on by experts, that had made it for generations. Then during a time when our ambitions were bigger than our judgment, why we thought we should spread out and try and be "A" Nation.

Now if there is one thing that we do worse than any other Nation, it's to try and manage somebody else's affairs. We are very original, nobody else can see things our way (of course they are wrong), but they just won't be broadminded and let us show em how they should live. During this expansion we thought we ought to have the Virgin Islands, Denmark (I believe it was). They owned em, and we just bought em, give em twenty five million dollars.

But lets get on with the story. Mr. Hoover had just finished a siege with the Senate and he needed a rest so he went to Porto Rico, and also to the Virgin Islands, and then home and made his observations. As we land on this lovely afternoon why I am tickled to death to be able to fly by and see our absent countrymen, and get their reaction on our President's visit.

Well did you ever see a community mad? No you haven't, you only think you have. You haven't seen a Community mad at all till you see the Virgin Islands. Talk about the Democrats knocking the President!

Well they took me ashore, and they said they wanted my visit to offset his, so I told em to go ahead and make their rum, that there was no reason they should take Prohibition seriously just because they belonged to the U. S. So with a bunch of them we all went and had a nip of Rum Punch, and I don't mind telling you the islands looked great to me. I disagree with Mr. Hoover they didn't look near as poor as some parts of our Country. Why there was no bread lines, No Red Cross relief. I asked where most of the people were, and they said "out at the Golf Course." That was the only evidence of poverty I saw. For as you know practically all our unemployed are at ours.

I sure like the place, and wished I could have stayed over a few days. Met some mighty pleasant folks there. It looked like a very happy little community. (Till the President hit it). Saw a few Marines scattered around, but as it was American territory, they didn't have many. Confident have been so far behind the times they had two of my pictures there (talkies) and one of them I hadn't even seen at home yet myself. I was awful sorry that they had misinterpreted this Prohibition thing, and quit selling their rum, and when I explained to em the interpretation that the mainland of the U. S. had put on the Amendment, why they were tickled to death and started right in to get ready to manufacture on a big scale.

I gave them Capone's address, as I wanted to see em get started with the best folks over home, where they could get the most for their product. Of course they will have to start from the bottom in regard to competition, for the U. S. had twelve years of business start on them. But they will be all right now, and the next time a President visits them, their product will be making them rich just like Chicago, or any of their competing centers. I am going to have those Virginians so rich they will be able to have a thousand dollar funeral, and President's won't mean anything to em.

(© 1931, McNaught Syndicate, Inc.)

Costly Sacred Building

The cathedral of the Holy Savior in Moscow took 50 years to build and cost about \$150,000,000. It is estimated.

Bank's Private Graveyard

The bank of England has its own churchyard adjoining where many of the officials have been buried.

Speed of Whale

Whalers estimate that the average whale can cover a distance of about twelve miles in an hour.

Coral Island Group

The Bermudas are a group of about 300 coral islands and islets, about twenty of which are inhabited.

South America Unique

South America is the only continent in which no places below sea level have been found.

Modern Home Superior to That of the Past

Scientific investigation has punctured the often accepted statement that old-time houses were necessarily better built than modern ones. Just because the timbers were bigger and hand-hewn does not mean that they were more scientifically put together.

Impartial comparison of the work of old buildings with that of their modern successors, made by Donald G. Tarpley for the Woman's Home Companion, gave the following interesting results:

"Old houses did not have insulation in the outside walls. Flashing was not so good as it is now. Plastering was inferior. Metal lath was unknown. Chimneys did not have metal throats and frequently several flues ran together. Modern chimneys have terra cotta tile lining, which is not only smooth but which in one-inch thickness is equivalent to four inches of brick.

"Floors were usually only one thickness, whereas now we use two layers of board with sound-deadening felt between. The wide floor boards which were so appreciated in the old houses were not thoroughly heated. But in modern homes with steam heat wide boards are more likely to swell and open up. They have to be put down by a different process—venered and screwed in addition to being side-nailed."

Steel Pen Quickly Put Quill Out of Business

The first steel pens were not nibs as we know them now. We had long steel barrels which fitted on wooden holders. Fine mapping pens and a few other special types are still made in the same way.

The real origin of the steel pen is not known, but it is on record that 100 years ago James Perry and Josiah Mason sent the first consignment of these pens from Birmingham to London.

For centuries prior to that time the quill had held the field undisturbed. The first steel pens were made some time before 1830, though for a long while the public would have nothing to do with them. As far back as 1748 steel pens came from Aix-la-Chapelle, and a few were certainly made in Birmingham in 1780.

During Victorian times the pen product of Birmingham amounted to 4,000,000 gross per year, and in 1892 it had grown to 13,000,000, but the fountain pen has been the means of cutting the latter figure to about one-third.

Houses of the Poor in Korea

Houses belonging to the common people of Korea are for the most part small, low and thatched, and have few rooms, the walls being made of stone and clay and usually only one story high. High buildings were forbidden by the old laws of the country, but now that no such restrictions exist, there are many two-story houses, some of them brick, especially in urban districts.

A unique part of the Korean house is its heating arrangement. The floor is made of flagstones plastered over with clay and covered with thick oiled paper. Underneath, forming what would be the joists, run a series of horizontal flues. Fire is made outside the room and the hot smoke-laden air circulates through the flues and escapes at the opposite end. Thus the floor is thoroughly heated.

Resourceful Sarah

The story is told of the immortal Sarah Bernhardt that once in London she took a cab to the hotel. After a time it occurred to her they were not making much progress, and on questioning the driver was informed that they were lost and he could go no farther. She left the cab, walked a minute or two, until she saw a fire engine returning from a fire. Without a moment's hesitation she hailed it and persuaded the fireman in charge to take her on, arriving at her hotel perched on the engine.

Rigid Test for Over shoes

A prominent rubber overshoe company has established the custom of subjecting its products to a rigid test in actual service before they are put on the market. This, of course, does not apply to every individual shoe, but to samples of new designs and new compositions which are originated from time to time. Employees wearing the new shoes walk over a measured course representing all kinds of pavement and the results are noted.

"Robbing Peter to Pay Paul"

"Fable has it," according to Brewer's Dictionary of Phrase and Fable, "that this phrase alludes to the fact that on December 17, 1550, the Abbey church of St. Peter, Westminster, was advanced to the dignity of a cathedral by letters patent; but ten years later it was lost to the church of St. Peter, and many of its estates appropriated to the repairs of St. Paul's cathedral." The expression may have been a familiar one much earlier than that.

Hot Dogs' Pedigree

An ancient and honorable lineage is claimed for the gastronomic tidbit known in this country as the "hot-dog" and throughout the remainder of the world as the frankfurter. It dates back 125 years and, strange to say, it did not originate in Frankfurt at all, but in Vienna.

Beginning at Home

Dreamers who convert hopes into realities, and planners who build noble structures, always begin with themselves.—American Magazine.

Speed of Whale

Whalers estimate that the average whale can cover a distance of about twelve miles in an hour.

Coral Island Group

The Bermudas are a group of about 300 coral islands and islets, about twenty of which are inhabited.

South America Unique

South America is the only continent in which no places below sea level have been found.

COUNCIL

The following bills were allowed at Monday night's meeting of the city council:

O. V. Brees, salary and expenses	\$129.00
L. W. Colner, salary and expenses	235.40
Donnell Allen, salary	80.00
Fire department salaries April	24.00
K. M. Bird, repair Walthe house	7.50
F. H. Jones, 14 days labor streets	36.00
Oscar Smith, work water lines	13.00
Oscar Smith, labor streets, water sewer	124.00
G. B. Schaffer, right police	115.00
J. W. Lombard, salary	20.00
Fred Easton, cruising timber	15.25
Hooker Electric Chemical Co., chlorine	10.00
Reinold, pig and pub.	2.50
C. J. Kern sweeping compound	2.50

Knowles & Graber, supplies water	1.05
John Spriggs, labor dump ground	14.00
