Says WILL ROGERS

BEVERLY HILLS—Well all I know is just what I read in the papers or what I see as I stroll about the city. I believe me I been doing some prowling lately. For a long time I have wanted to go messing around in the Central American Countries and the establishment of an Air line all through there.

Well just think of the pleasure of getting up one morning, having breakfast at home in Santa Monica, grabbing the Plane and being in El Paso, Texas, at one o'clock, going over the Rio Grande River to Juarez to get some beer and see a Bull fight, as it was Sunday afternoon, and my Plane didn't leave there till Monday Morning for Mexico City.

Did you ever visit Juarez, Mexico? Well don't miss it. I went by the Bull Ring and bought our tickets as I had about 4 Pilots from the line who had brought me in from Los Angeles, American Airways Co. and a great line. Well the fight was not to start till it got cool, for they won't even kill a Bull till the sun is so low that the Fighter won't get sunburned. Then as we were driving around the Town I saw a fellow with a lot of braided Uniform get on an old poor decrepid Pony, and I just knew from his make up that he was headed for the Bull ring, so I got cold feet and didn't go. I gave away my tickets to some fellows that hadn't been saved as many times by horses as I had.

We prowled around and saw all the sights of the town, then back and early the next morning out to the Airport and then by the C. A. T. line, "Continental Aerial Transportation," American Pilots, powered with wasps on Lockheed Planes. Well anybody that flies knows that from pretty near any part of our Country you can leave and be in Mexico City the next night, and not by nights either.

Well we must get moving. Got to Mexico City that evening about four thirty. Made my first speech in Spanish for the Spanish movie-tone. I know few words but none of em fit what I want to say, but I just used em all anyhow. I heard afterwards that in the Theatre that it went big. Well it would. I was sorter panning our Country and boosting theirs.

Well after I got through with Mexico City, hit out for the real Tropics, down through Vera Cruz, then out of there on the Pan American Airways, and over the real Jungles, and stopped first at a little Mexican Army Post called San Geronimo. Gassed up, was thirsty but everybody said don't drink water in the tropics, and by golly I haven't. And my first Mangrove, I believe it was to eat. Now we are on the west Coast of Mexico, we have crossed the neck, or straight, and are headed for Guatemala. We make some other one on the line, and then into Guatemala City, the Capital of that Country. We have seen it on the Maps of our old Geography. Its in the rolling hills, and quite a bit of Aviation activity, and is a pretty little City from the air. They raise Coffee, and tell you that its the best there is in Central or South America.

But wait a minute, we haven't got to Costa Rica yet, and they tell you that too, and I believe they got it on Guatemala, and Honduras, and all the rest on the quality. Its so good that America won't pay the price. Its most all shipped to Europe. It grows on a little bush, and they have high trees planted all among it to shade the Coffee Plant, sometimes Banana Trees, but generally big wide looking shade trees.

You would be surprised at the amount of people that speak English in all these Countries. Almost all the young men of wealthier families are sent to our Schools since the war in preference to Europe, and they speak better English than we do. I cant get you all the way down now, but I will get you to the Canal the next letter. Its quite a gully.
