

NOTICE OF ADMINISTRATOR'S SALE OF REAL PROPERTY.

Notice is hereby given that in pursuance of an order of the county court of the State of Oregon for Lane county, sitting in probate, made on the 23rd day of May, 1931, in the matter of the estate of William W. Cochran, deceased, the administrator will sell at private sale in one or more parcels to the purchaser offering the highest price for cash or cash and credit, subject to confirmation of said court, on and after the 25th day of August, 1931, all the right, title, interest and estate that the said estate has by operation of law or otherwise acquired at the time of the death of decedent in and to the following described real property, to-wit:

An undivided one-half interest in and to the following described real property: The "Cripple Creek" recorded on page 524 of Book 6; the "Oliver Twist" recorded on page 564 of Book 6; the "Lost Lode" recorded on page 523 of Book 6; the "Stratton" recorded on page 522 of Book 6; the "Elkton" recorded on page 108 of Book 7; the "Leland" recorded on page 292 of Book 7; the "Crown Point" recorded on page 75 of Book 8; the "Niagara" recorded on page 100 of Book 7; the "Western" mining claim located by L. D. Ryan on the 30th day of June, 1908, a notice of which said location was recorded on the 26th day of August, 1908, at page 456 of Book 3 of the Mining Records in and for Lane county, State of Oregon, to which records and notice reference is hereby made for a more particular and definite description of said mining claims and locations respectively, and all constituting what is known as the "Cripple Creek Group."

Also an undivided one-half (1/2) interest in and to the "Oregonian" mining claim located in the Bohemia Mining District, Lane county, State of Oregon, and recorded in Book 11, page 336, Mining Records of Lane county, State of Oregon. All bids or offers must be made in writing and be left at the office of Herbert W. Lombard, First National bank building, Cottage Grove, Lane county, Oregon.

Dated and first published July 24th, 1931.

KARL K. MILLS, Administrator. HERBERT W. LOMBARD, Attorney for Administrator.

Compound Fractures A compound fracture is one in which the bones have pierced the skin, says Hygeia Magazine. When a bone breaks in several places, the break is termed a multiple fracture. Fractures are called simple even if the bone is broken in more than one place if the skin is not pierced.

NOTICE TO CREDITORS. Notice is hereby given that the undersigned has been appointed by the county court of Lane county, State of Oregon, administratrix of the estate of Martha A. Mount, deceased, by an order bearing date the 11th day of August, 1931. All persons having claims against the estate of Martha A. Mount, deceased, are hereby notified and ordered to present the same, duly verified, to the undersigned at the law office of Herbert W. Lombard, First National Bank building, Cottage Grove, Lane county, State of Oregon, on or before six months from the date of the first publication of this notice. Dated and first published this 14th day of August, 1931. Date of last publication September 11, 1931.

ELIZABETH C. GREEN, Administratrix of the Estate of Martha A. Mount, Deceased. HERBERT W. LOMBARD, Attorney for Administratrix.

Every Variety of Song in the Lives of Russians

In Russia music has always been closely connected with the lives of the people. From the time of birth through all the events of life until death claims them, they move to a musical accompaniment. The return of spring is celebrated by a sort of dance, termed the khorovod; marriage, being a most important time, brings forth many songs, such as "The Birchwood Spinner" ("Lotoschits"), "Glorification," "The Matchmaker" ("Svat'skushka"). There are hunting songs, ballads and dance songs. Most of the dance tunes are in the major mode, the slow tunes, and these are best liked in the minor. Cesar Cui, in his book "La Musique en Russie," divided the Russian composers into three groups: First, the old lyric school, Glinka, Dargomizsky and Seroff; second, the New-Russians, Rimsky-Korsakoff, Mussorgsky, Borodin, and lastly Rubinstein and Tschaikowski in a class by themselves as being less distinctively national.—Washington Star.

Paw-Paw Tree Products Put to Various Uses

Pawpaw, or paw-paw trees, which grow in the tropical jungles of South America, are put to various uses. They are versatile in that they furnish food, medicine and soap. The Field Museum of Natural History, in Chicago, which has one of these trees in its botany exhibit, states emphatically that the tree is not to be regarded as a link between the animal and vegetable worlds. The tropical pawpaw tree is described as an odd-looking affair, tapering from the base of the stem to a height of about 20 feet. It exudes a peculiar juice which, rubbed on meat, will make the toughest beefsteak as tender as veal, according to Popular Science Monthly. The natives living in the districts where the pawpaw tree abounds use the juice for this purpose. The juice is an acid, milky substance and has medicinal value. The seeds are used as an effective vermifuge or worm destroyer. Furthermore, the tree has a delicious fruit. It is large, pulpy, oblong in shape, and has a heavy rind.

Odd Methods of Fishing

Natives of some sections of India have several unusual methods of catching fish, Popular Mechanics Magazine says. In Assam, fishermen crouch on the banks of shallow lakes and emit a shrill whistle which attracts a species of mountain fish. Lured by the sound, this fish darts into the open palms of the whistler and is caught. In other places the direct rays of the sun force mountain fish to seek shelter beneath or beside rocks along the banks of streams. The cunning hillman crawls to a boulder behind which a fish is hiding, strikes the rock a heavy blow with his steel-shod club, and catches the fish, stunned by the sound vibrations.

His Move

In the wee hours of a recent morning a group of grownup kids emerged from a restaurant, went into a livery on a prominent corner at the direction of a lad whose fiery red hair waved in the breeze from the broken places of a crushed derby, and began to harmonize. Soon the deserted city canyon was ringing with the strains of "Here we are together." The young cop on the beat listened for a moment, then turned the other way and started down the street. "I guess I'll go down here and look for robbers," he said.—Pittsburgh Post-Gazette.

Legendary Potentate

Prester John was a semi-mythical potentate of the Middle Ages, believed to reign over a Christian kingdom in the Far East. It is, however, certain that no Christian potentate ruled in Asia in the twelfth century, though legends must have had some basis in fact. Prester John has been variously identified with a certain Mongol chief and with the founder of the Khara Khitai, who called himself "Gur Khan" or "Supreme Khan." The legend of Prester John's existence provided a certain continental stimulus to medieval exploration.

Eagle as a Symbol

The eagle stood for two things in ancient symbolism. The hawk in ancient times, the monarch of the air was a word meaning "rapid motion." The deeply mystic Hebrews, after watching the great bird sit motionless, contemplating the sun, gave it a name which meant "meditation," equally Christian art the eagle became the symbol of spiritual power because it was able to soar tirelessly through the highest places. The lion was the symbol of human pride and temporal power.

Phrase Long in Use

The phrase "bite the dust" appears to a casual reader to be strictly American, it being familiar to those who have read in the old dime novels of how "another redskin bit the dust." But it is in fact rooted in antiquity. Among the earlier records users of the expression are those in Homer's "Iliad," book two, and Ovid's "Metamorphoses," book nine. The words translated became popular the world over.—Kansas City Times.

Sea a Mineral Storehouse

Three and one-half per cent of the weight of sea water is contributed by solid mineral matter in solution. The ocean is in reality a great storehouse of minerals.—Gas Logic.

Plovers Guided Columbus

The flock of birds, which, according to tradition, guided Columbus over the last stages of the voyage that led to the discovery of America, were golden plovers. Dr. Clyde Fisher, of the American Museum of Natural History, believes, from the earlier records users of the expression are those in Homer's "Iliad," book two, and Ovid's "Metamorphoses," book nine. The words translated became popular the world over.—Kansas City Times.

One Point of View

If you ever find happiness by hunting for it, you will find it as the old woman did her lost spectacles—safe on the bridge of her nose.

Woman Patriotic Figure in History of Old City

Mainz is one of the first and oldest cities on the Rhine. It has also furnished its share of legends and played its part in making this river one of the great famous in the world. Here is one that holds a bit of charm and philosophy: When the French occupied the city the countess of Stein led the young women to take a vow not to listen to a word of love from any man until the country was rid of the invaders. The French, thinking this might stimulate their foes, tried to lure her by giving her a broom and commanding her sweep the streets. Instead of being shamed, she swept them and prayed as she swept, "God of my Fatherland, bless my sweeping, and as I sweep the highway, grant that the enemy may be swept from the land." Instead of jeering her, as the French had anticipated, her own people gathered about her and prayed "God bless the sweeping." Fired by the courage of the countess the young men succeeded in sweeping the enemy from their land.

As African Youngster Climaxed Bible Story

The wit and wisdom of the Ovimundu people, one of the many tribes that make up the Bantu race, is well known in Africa. "Umbundu proverbs—Umbundu being the speech of the Ovimundu—and the replies of Ovimundu classes taught by missionaries, says the Boston Post, show conclusively that the native African has a potential intellect not to be sneezed at, and proves also that children are children the world over. Results of a recent Bible examination among a group of children threw astounding light upon Biblical history. One small boy finished a dramatic recital of the story of David and Goliath (the native African is a born actor) with the rather startling climax which translated literally was: "And the giant said to David, 'Go away, little boy, I like the looks of your face and I don't want to spoil it!'"

Frankfort Long Great City

Since the great trade routes of the Middle Ages, Frankfort-on-the-Main has played one of the most important parts in the commercial activities of all Europe, and for many years was the undisputed mistress of the international money market. However, her simplicity and quiet charm have not been affected by her eminent position in international affairs. She reflects her ancient walls and towers in the clear waters of the Main with a modest dignity becoming a beloved monarch. It is no wonder she begeth and endears herself so keenly to the heart of Goethe, her native son, who was inspired to write his famous opera "Faust," in the first part of which Frankfort breathes in almost every verse.

Scallops Led to Water

The scallop season is not long and the persons who are employed in it must make the best of the time, with the result that in some sections of Long Island and New England the school sessions are curtailed in order to allow the children to do their part. But the government will not permit any regulation in the handling of this delicacy and recently a New England fish dealer was fined \$1,000 for "watering" scallops. When treated to an ordinary bath the scallops take on size and weight so that an unscrupulous dealer is ready to sell water at the price of scallops.

Good Cheer

Good cheer is almost as essential to life as sunshine, air and water—and is quite as plentiful. Cheerfulness has a dual value in life. First it helps you—then it helps you to help others—and it keeps on spreading out into the great throng of humanity, stirring the hearts of men as the gentle breeze stirs the leaves of the forest—returning again and again to you in its endless course and all the while making the heavy load lighter and the dark road brighter for all. Good cheer is one of the biggest little things among all the elements of success.

Buddhist Shrine

The great Shwe Dagon pagoda is one of the best known places of worship in the East. It has a particular sanctity to Buddhists because it is credited with containing actual relics not only of Gautama but of the three Buddhas before him. The pagoda stands upon a mound partly natural and partly artificial. It is about 370 feet high and is profusely covered with gilt from base to summit. At the base of the pagoda hill are many monasteries.

Beautiful Stockholm

There are a few cities of the world whose beauty it never seems possible to eclipse, and Stockholm is one. It is a city of great and splendid buildings—the town hall and the royal palace are of the first order in Europe. The spacious streets are lined with gay and palatial hotels and quiet, lovely homes. But perhaps the waterways and the islands on which the city is built are what make Stockholm not just beautiful, but the beautiful.

Use for Hair

Tons of hair at one time were used for packing between the plates of a certain part of English war vessels. Hair, being very elastic, afforded a good backing to metal.

Largest Plant

Probably the largest plant in the world is a rare species known as the box huckleberry. The trail-crowders of a site specimen of this amazing plant can cover 100 acres with a thick mat. Yet the plant seldom reaches a height of more than six inches, according to the Field Museum of Natural History. It takes hundreds of years to reach its full growth, says Popular Science Monthly.

Ebb and Flow

The noisy waves are failfores, but the great silent tide is a success. Do you know what it is to be failing every day and yet to be sure that your life is, as a whole, in its greatest moment and meaning, not failing, but succeeding?—Phillips Brooks.

Belief in Evil Spirits Common to All Peoples

There are many explanations as to where and when the story of the Devil or Satan originated, but when this personage first came upon the earth and who or what creed first brought him here? The belief in evil spirits has been found in practically all religions and among all peoples from the earliest times, and how the idea has been modified from time to time may be gathered by reference to cyclopaedia articles on the subject, to articles in Bible cyclopaedias, dictionaries of religious knowledge, Catholic Cyclopaedia, Jewish Cyclopaedia, etc. The word "Satan" signifies "an enemy" and the word "Devil" signifies "a slanderer." The International Encyclopaedia says in part: "In later Jewish and Christian belief, a mighty spirit of evil who has during unknown ages ruled over a kingdom of evil spirits and is in constant and restlessly active opposition to God." The Hebrews knew little about such evil spirits until they came in contact with the religions of Babylonia and Persia during their captivity in Babylon. These ideas were developed by the Jews and many of them were carried over into Christian theology, where they were subject to other influences.

Fainting Spells One of Acrobats' Great Perils

It is not unknown for acrobats to faint in mid-air. One famous acrobat has said that during a somewhat in mid-air from a trapeze his brain is numbed, and for a second or two he is practically unconscious. This he attributes to the speed with which the evolution is performed, and the sudden shock it gives to the brain. One night a woman performer was preparing to do a sensational flying act from one trapeze to another when, suddenly, at the moment she should have jumped, she was seen to swoon dizzily. The next second the horrified crowd saw her tumble head first from the trapeze. Fortunately, the rope was twisted around her ankle so that she hung head downward. She was obviously in a dazed, fainting condition. Another trapezist swung himself out, and, in a flying leap, grasped the trapeze from which the girl was dangling. He pulled her back to safety, fastened a rope round her waist, and lowered her—still in a faint—to the stage.

Revolution's Beginning

The French revolution was mainly the result of the oppression of the French people, who rose in revolt against the extravagance and tyranny of the kings and nobles. In addition they had no adequate representation in the legislature. The taxes were heavy and in 1777 there were as many as 1,250,000 beggars in France. Alarmed by the increasing signs of unrest in the country, the king and some of the nobles began to gather the army near Paris. This so enraged the people of Paris that they stormed the bastille on July 14, 1789. This is regarded as the beginning of the revolution.

Buddhist Cave Temples

Though the Ceylon Buddhists did not make such fine cave temples as their fellow religionists in India, there are several that are of more than passing interest. One very curious example is found at Dambulla, not far from Kandy, where natural caves have been enlarged and huge images have been carved in the interior. But modern structures have been built in front of these caves, thus spoiling the whole conception. The whitewashed brick walls seem very incongruous in the vicinity of ancient cave temples, which are probably nearly two thousand years old.

Took His Word

Brown inserted an advertisement in a newspaper offering his car for sale. At 8 p. m. the door bell rang, and a man asked to see the car. "It's out in front," said Brown. He had no garage, so parked it there. "There's no car there," said the man—and he was right. Brown's advertisement reads: "For sale, good car. A gift. First to see it will take it." The first man to see it took it all right.

Engraving Is Ancient Art

Engraving dates back to the ancients, but the first authentic engraving of which there is any record was that of St. Christopher, 1423. Baron de Reiffenberg claims to have found an earlier one, dated 1418, and a manuscript discovered in the middle of the sixteenth century gives reason for believing that the art was known as early as 1308 in England, but there has been too much controversy concerning those prior to St. Christopher to accredit the earlier ones.

Stuck!

A New York engineer found a way to move a ten-story building a block and turn it around, but he'd like to see him turn a tight mason jar top at home in his own kitchen.

Flower Arrangement

Cut flowers with short stems are rather difficult to arrange in a shallow dish. When moist sand is used instead of water, the flowers will look just as fresh as they do in water, and any desired effect in color scheme can be obtained with the certainty that it will last as long as the flowers.

Ebb and Flow

The noisy waves are failfores, but the great silent tide is a success. Do you know what it is to be failing every day and yet to be sure that your life is, as a whole, in its greatest moment and meaning, not failing, but succeeding?—Phillips Brooks.
