75 PER CENT RIGHT.
That our schools teach too many things and pupils learn to do their work only 75 per cent right was the criticism recently hurled at our educational system of today.

And this criticism wasn't made by some radical speaking on some street corner. It wasn't made by someone kicking about the high tax rate.

It was made by two eminent men of the country and it was made before the annual convention of the Oregon State Teachers' association held last week in Portland.

One of the speakers was Dr. Walter E. Pitkin, professor of journalism at Columbia university. The other was Rabbi Henry J. Berkowitz, leader of Temple Beth Israel, Portland.

"Cut down the curriculum of the school system 90 per cent, take the remainder and teach it intensively, teach the pupils to read accurately, remember and express themselves in intelligible language and the schools will be fitting the boys and girls of today for the world in 1950.

Diffusion of learning is the enemy of living," Dr. Pitkin said.
"Get down to a few small brass tacks in education.

The curse of your schools today is that your pupils learn to do their work only 75 per cent right. Let's have intensive learning or not at all. Let's do things right or not at all."

The criticism that our students do things only 75 per cent right was also made by Rabbi Berkowitz, who advocated vocational education as the salvation of the age.

Both speakers were telling how to prepare the boy and the girl for what will be demanded of them 20 years from now.

The Sentinel has been accused of being somewhat radical when it said things about education not nearly so severe as these criticisms by these outstanding men who were addressing those who depend upon the educational system for their livelihood.

To our way of thinking the most important thing said in the two addresses was Dr. Pitkin's statement: "Teach pupils to read accurately, remember and express themselves intelligibly." Children try to learn a little of too many things, with the result that they don't remember enough of any one thing. The principal reason why we teach so many things is rivalry between schools.

Every school must have what any other school has. This writer would not have the Cottage Grove school subordinated to any other school in the things that it teaches, and other patrons feel the same. In every other community the same conditions exist, and the same feelings extend to our institutions of higher learning. We must have in our colleges everything that colleges in other states have.

When educators themselves make the statements that Dr. Pitkin made, when a great university like Columbia permits one of its instructors to make the statements that he made, when 2000 teachers listen to such statements without revolt, we may expect a movement to get under way that will accomplish something.

BUJADA BILL ON SILK STOCKINGS.
"I was just reading in the paper," said Rujada Bill, bewickered philosopher from Laying creek, upon a recent periodic visit to the city, that a school up in Washington has forbidden girls students to wear silk stockings, dress elaborately or use cosmetics excessively.

"A great deal is being said about reduction of the expenses of government and considerable is being said about it.
"Most people might not see the connection between tax reduction and wearing silk stockings and smearing on cosmetics, but to my mind the two hitch together.

"Silk stockings, elaborate dress and excessive cosmetics have had as much a part in our government as they have had in our private life. What we have in private life we get in our public life, but right now we are trying to get governmental agencies to do away with silk stockings and cosmetics while we retain them in our private life.

"To my notion, if we wish to discard governmental silk stockings and cosmetics, that is, if we wish to do away with extravagances in governmental affairs, we should set the example in our private lives.

"That school up in Washington is setting a good example. The classroom should not be a fashion revue. Schooling our kids costs enough anyway. Kids should pay more attention to what they put into their heads and less attention to what they put on their backs, on their legs and on their faces.

"If we want to get back to cotton socks in government we'll have to get back to cotton socks in private life."

The Sentinel has made little complaint about removal during the past year of many competent state officials. To the victors belong the spoils, but the temper in the affairs of the state fair board can not pass without notice.

The idea seems to be to bring about the removal of Mrs. Ella S. Wilson, who has served competently and efficiently for a long term of years as assistant secretary and more recently as secretary. There is not even good political reason for her removal and most certainly no good business reason. Removal to cover up someone else's shortcomings or to vent some spite should not be countenanced by the liberty loving people of a great commonwealth.

A University of Oregon debate team has returned from a 35,000-mile trip that took them to New Zealand, Australia, India, China, Japan and the Philippine Islands. The members participated in more than 100 speaking engagements. They were received in San Francisco, Portland and Eugene with banquets and affairs in their honor, or almost like a returning football team. That's something like it, but it's fortunate for them that they arrived after the football season had closed.

A red ink factory in New York has gone out of business. The reason given is that the prospects for the use of red ink in 1932 are not bright. Here's one organization that must believe the depression has been broken.

The eastern girl who insisted on being married in short skirts evidently wanted to demonstrate to the guests that she was not marrying because of a lack of visible means of support.

It is not surprising to note that a man who received 13,000 volts of electricity and recovered was shocked to see an account of his death in the papers.

There is only a transposition of two letters between the words "united" and "untied."

A fire always burns best on a hot day.

CITY'S INDEBTEDNESS.
Cottage Grove, Jan. 3.—(To the Editor.)—When I began the perusal of your recent editorial in which you so enthusiastically welcomed the new year, my rooping spirit began to revive at once and I continued to chirp up till I reached the following sentence:

"At the present rate of reduction the city will have no outstanding warrants at the end of five years, in ten years the city will have cleaned up practically all of its bonds, water, sewer, street, city hall, auditor and refunding."

Several weeks ago we submitted an editorial to our readers under the heading: "Do We Speak English?" Few local business men read it, and we were disappointed. The Cottage Grove Sentinel is a newspaper that is read by all, and we were disappointed that it was not read by all.

The Times is reading on dangerous grammatical ground when she says that the verb must agree with the number of a collective subject. Here are three queries for the Times:—

"The trouble with grammar is that it is hedged about with so many rules that the student who knows where they are at, authorities usually say it depends on how you mean it. Well to our way of thinking, the more you mean it has nothing to do with it. It is the way you say it."

There are right at your back friend Thomas How can a fellow mean what he says unless he knows what he means. There are too many liberties taken with the English language in the opinion of the writer.

We agree with the Junction City Times that "even the experts don't know where they are at." However, we doubt whether any expert would give sanction to that expression.

We agree with the Brownsville Times when it asks, "How can a fellow mean what he says unless he knows how to say what he means." However, we should place a question mark at the end of the sentence.

The Brownsville Times may be correct when it says, "... each succeeding generation will degrade the nation's speech ..." Succeeding generations may go so far as to drop the apostrophe from the possessive, but the Times shouldn't set the example.

The Brownsville Times will have to give us the definition of "vincular" before we can say whether we agree with the sentiment with which it concludes its editorial.

Danbury, Conn., population 28,000, has a weekly payroll of \$34,000. Enrollment of Columbia University is 41,672 students.

Money circulating in the United States totals \$42.50 per capita. Vermont maple sugar is not quoted anywhere.

Dice is played by telephone. Midgets are in demand at Hollywood.

Rocketeer foundation gifts for 1931 totaled \$15,000,000.
