When an opportunity presents itself to give the band a lift, every citizen should do his little bit. The band is sponsoring a dance for Saturday of next week. Tickets will be sold in advance for the purpose of giving those who don't dance an opportunity to contribute. Every resident able to do so should feel it a duty to purchase at least one ticket. Proceeds will go for purchase of uniforms and equipment.

NO MEIER MACHINE. It is becoming quite apparent that there is no danger of a great state-wide Meier machine, similar to the LaFollette machine in Wisconsin, which regular republicans and democrats feared. Not that Governor Meier and his cohorts might not wish to be the motive power in such a machine, but Meier, as good a governor as he may have been, has not given those who went wild over his candidacy the things that those persons expected. And the chances are that Meier had no idea that he could keep his platform pledges, or the platform pledges made for him. The great issue, free power for nothing, has been lost in the discard. No move has been made to redeem this portion of the platform upon which his supporters thought Meier was standing. As a successful millionaire business man Meier soon saw the fallacy of making even a pretense of trying to fulfill such an absurd implied promise.

World in Paragraphs
Feeble-minded people often have a habit of trying to fulfill such an absurd implied promise. And now such former ardent Meier newspapers as the Woodburn Independent and the Hollywood Press (Salem) are off the Meier reservation. One candidate for the legislature has had the temerity to put forward as a reason why he should be elected the fact that he was not a Meier supporter.

That fiery petrel of Marion county politics, Judge L. H. McMahan, who was one of the staunchest backers of the Meier candidacy, and administered the oath of office to him, is now denouncing the Meier administration. He is no lover of Henry Hazen, budget director, who seems to do a great part of the thinking for the governor's office and parades the capitol lobbies in a way to indicate that he might be bearing the weight of the big dome.

A mother called from Portland to San Francisco continued to furnish milk for the babe by having it sent back by airplane. It took four hours to transfer the milk from mother to babe. Usually a baby wants its board more promptly than that, but considering how rapidly nursing babes is becoming passe we can't help but admire this old-fashioned mother who wouldn't let 700 miles prevent her from performing a normal function for the one she loved.

Many folks acknowledge a favor in a way as to give the impression that they are conferring a favor by accepting it.

COTTAGE GROVE'S BAND. There are so many things for each one of us to do and so many things provided for our entertainment and amusement that we have got in the habit of giving but little attention to any one thing and of taking our amusements for granted. Because such is the condition, The Sentinel is again calling attention to the efforts being put forth by those who are providing the city with a band. At least one night a week, and sometimes oftener, these men, and all of them are busy men, give several hours to practice. There is nothing in it for them except the satisfaction of doing something for the community.

Those who know band music when they hear it are free in their compliments as to the kind of music the Cottage Grove band is producing.

When a band gets a reputation such as the local organization is getting, it is likely to get calls to other cities. And their appearance elsewhere is largely an advertisement for the city from which they come.

The band has asked for no city tax. It has asked no contributions. So far as The Sentinel knows men-
