THE STRANGE CASE OF MRS. GREEN

ON Monday afternoon Mrs. T. N. Green left her home at exactly 2:30 to go shopping. During the afternoon reliable observers saw her in various stores down town. It has been established that she did not start for home until 5:45 that afternoon and that she entered the front door of the Green residence at 6:10.

At 6:15 Mr. Green arrived from the office. At 6:25 Mrs. Green served a dinner consisting of a roast, baked potatoes, freshly baked apple pie and a number of other things that required from one to two hours to cook.

Mrs. Green has no maid. What could her secret be? Operatives studying the case report that immediately prior to her departure, Mrs. Green placed these foods in the oven of her range. They declare it to be an Electric Range, for she set a time device and left with a satisfied look on her face. They further declare that the range automatically turned itself on at the hour Mrs. Green set it for and the food was properly cooked without any assistance whatever from Mrs. Green.

Your dealer has an Electric Range on display exactly like Mrs. Green's. He will be glad to explain to you how easily the results credited to Mrs. Green may be performed in your own kitchen. See him today.
