of young men a sort of vacation on the job in the big woods is going to make an impression that will result in many of them having this state in mind for a permanent residence later in life. They will spread stories of Oregon to millions. The advertising feature, so far as Oregon is concerned, is worth millions. There is yet another feature, possibly the most important. Many thousands of young men, nearly a quarter of a million in camps over the country, have been taken from idleness and given healthful work under ideal conditions. They have been removed from temptations that beset the idle in big cities, and smaller ones too. They have been taken, many of them, from unhealthy conditions and placed in the most healthful to be found anywhere.

Church News

Church of Christ, I. G. Shaw, Pastor.—Sunday school, 9:45. Communion, 11:00. Forenoon service, 11:00. Evening service, 7:30. Bible lesson, "The Kingdom of God is Within You." I. G. Shaw, leader.

Sudan Grass Hot Weather Pasture

Native of Africa, Produces When Bluegrass Supply Yields to Heat. Since the drought of 1932 (this year's crop is estimated to be 25 per cent less than last year's) the Sudan grass has become a source of cheap feed. That year five acres of Sudan grass at the Hamilton county experiment farm furnished pasture for 23 cows for 63 days.

SOCIETY

Miss Nellie Tucker became the bride of Volney B. Jones at a pretty wedding Tuesday evening at the home of Rev. R. J. Gordon. The couple were married under a double arch of honeysuckle and roses. The ring ceremony was performed by Rev. Gordon. Mary Tucker was bridesmaid and Jack Tucker was best man. The bride wore a dress of bright blue silk crepe and carried a bouquet of carnations. The bridesmaid wore a dress of light gray flannel chiffon. Following the wedding reception was held at the home of the groom's grandmother, Mrs. R. A. Mealey. The couple will reside at a Cherry court. Guests were immediate relatives and friends of the bride and groom.

The 25 Staff club of the Rebekah lodge entertained with a social evening Friday in I. O. O. F. hall. Refreshments were served at a late hour. The Rebekah and Oddfellows lodges held a joint memorial service Saturday evening in I. O. O. F. hall. The Treasure-Seekers Beaches near New York city, otherwise nearly deserted, are the scenes of treasure hunts in autumn days. Men and boys go there armed with shovels and homemade sleds. After filling the sieves with sand they strain it out by shaking. What remains is usually clam shells and broken glass, but sometimes there are coins and rings dropped by bathers in the summer.

See the Complete Line of Hollywood 'Moon Glow' Manicure Requisites. Prefumed—It's different—Try it. Platinum is the newest shade. Special for Saturday, July 1. Regular 2 for 15c Fruit Dishes. Saturday Only 2 for 5c. Darling Variety Stores. Use 3% of your gross for advertising and increase your business 10%.

THE C. C. C. C. S. Most of us have seen some of the boys of the C. C. C. C. Having seen, many are not certain what it is all about. For one thing, the boys seem to have taken most of the C's out of the type cases and linotype magazine channels. To help out the newspapers two of the C's are not often used. Using the five C's the name is "civilian conservation corps concentration camps." Now you see, or don't you? "C" will come in close contact with the boys of the five C's because we have a camp on Erie creek, almost at our door, so we ought to familiarize ourselves with what the forest army is all about. We intend to make them welcome and are planning to take our band and men's chorus, our little German band and other entertainers to the camp for a program.

But when we do that we'll only see the boys at play, and they've been sent out here to work. Many wonder whether much will really be accomplished, whether much of the money spent on the C. C. C. C. won't be wasted, even at the wage of a dollar a day and keep. Of course the same amount of work won't be accomplished as would be accomplished by putting trained forest men and road builders into the forests. Many of the boys had never before seen forests, never dreamed of trees such as the awe-inspiring ones they have found in Oregon and know little about roads except possibly that famous one paved with good intentions. In the very nature of things there can't help but be some waste in the organization and management of a movement as colossal as that of the C. C. C. C. Everything has had to move at top speed, and that feature alone breeds waste. As the organization swings into motion, greater efficiency and economy may be expected. As to the boys themselves, if all are like those who have been stationed out from Cottage Grove, and if all those in charge of camps are of the same caliber as those sent to the Erie creek camp, a lot will be accomplished.

District Ranger Pieper has said that the boys are a splendid bunch, clean young men willing to do their part in making a success of the great experiment. That means that a huge amount of work is going to be accomplished during the six months the C. C. C. C. boys are with us. Two things that Cottage Grove long has wanted are to be accomplished. One of these is completion to a two-way thoroughfare of the Erie creek road. The chamber of commerce has been diligently working for this improvement for a long time. It will mean much in the development of the Bohemia mining district, also the improvement will do much to attract visitors to the district. Many have stayed out because of their fear of one-way roads. Another improvement will be the construction of a motor road to the top of Fairview. Many who visit the Bohemia district do not get the panoramic view from Fairview because of the difficulty of the climb. So far as Cottage Grove is concerned, these two improvements will cause us to kindly remember the forest army boys for many years to come.

The forest service also is to benefit largely. The two improvements already mentioned have value in the care of the forests, and there are to be other roads and trails. By the end of the season every major road or trail project which has been in mind for the Umpqua forest should be completed and getting men and supplies to points where needed at the time needed will have been made comparatively easy. The Oregon county will benefit in another way. Giving thousands

When President Roosevelt's yacht was struck by the big wind he probably wondered whether he had really succeeded in adjoining congress. Old 32 isn't as good as the wets though; it would be and isn't doing the harm that the dries, and some of the wets, feared it might. It's a crime to hoard gold, which means that most of us should have no trouble passing St. Peter at the nearby gate. The world's champion rope skipper got tangled up the other day, and now he has a wife.

RE-LOCATING PACIFIC HIGHWAY. Because of high water every three or four years that holds up traffic for a day or so and because the federal government grant which is open whereby some money can be gotten and charged to the future, we are asked to submit to a change in the relocation of the Pacific highway between Eugene and Cottage Grove. The question, however, is even broader than that—it is a matter of policy also. The question is: "Are we going to build roads to serve the people of this state who daily pay into the highway commission funds gas tax and license fees or are we going to build roads for transit motorists, who make daylight-to-dark flights through our state enroute to California and Washington, buying a tank full of gasoline here once perhaps in a life time?" The local residents do not want this section of the Pacific highway changed. Six hundred of them signed their names to petitions against change. They want it left substantially where it is now, straightened and otherwise improved. Most of these signers travel this road every day in the year, the tourist travel it but once. The state of Oregon likely has a million dollars invested in this piece of road it is proposed to abandon. The governor of this state is asking that we vote a sales tax to keep the state and counties from bankruptcy. His highway commission is preparing to throw away a million dollars worth of state property. Such is the inconsistency of the way democratic government functions.

The promoters of this new scheme want to re-locate the whole Pacific highway in Lane county, with the exception of one section. This one section they do not plan to rebuild (Walker to Divide) is the poorest part of the road in Lane county. Down in the Siuslaw region the highway department spent a million dollars changing the railroad tracks and preparing a water grade—cutting into the mountain side where rocks will fall on the road and bad slides occur for the next hundred years. Here in the valley it is proposed to abandon a scenic road and easily traveled water grade for one over the hill tops where it will take hundreds of thousands of dollars to make fills and cuts. Such is the common sense of highway engineers who are here today and gone tomorrow. When will we begin to use common sense in Lane County in the conduct of our government? MAINTAINING CREDIT OF U. S. Cottage Grove, Ore., June 27.—(To the Editor.) We are told by the representatives of the people in the pages of the Congressional Record, that on March 15 the government sold \$600,000,000 of short term securities bearing 4 1/2 per cent interest. The rate of interest is 4 1/2 per cent higher than the one-tenth of one per cent interest paid by the government on the same

BIG BANKERS ESCAPE. Mitchel, the banker, has escaped the meshes of the law for income tax violations, and it doesn't seem likely that anything serious is likely to happen to the great house of Morgan. The only good that has been accomplished is likely to be accomplished, seems to be to arouse public sentiment to such a pitch that laws will be enacted that will curb the private banking business and make finer the screen of the income tax law. It is the opinion of this paper that Morgan, Mitchell and others should have paid their income taxes despite legal loopholes. That was the only honest and patriotic thing to do. But, how many of us fail to take advantage of loopholes to avoid payment of taxes, or would fail to take that advantage if the loopholes were pointed out? How many of us have ever paid in full what the law contemplates we should pay for the support of government?

When the popular idea is that it is honest to beat the government or a public utility, it is no wonder that Morgan, Mitchell et al did not do this to evade income taxation. The only way many of us differ from Morgan and Mitchell is that the amount out of which we beat the government (city, county, state or federal) is so small that it passes without notice and is so small that the government will not bother us. Stockholders in the house of Morgan had paid no income taxes for two or three years. This writer must be more of a criminal than the Morgan stockholders, for he hasn't paid an income tax for more years than that, and isn't going to pay any this year. Ohio has a ghost that scares persons by going around playing an accordion. Well, what's all this fuss about; that kept congress so busy if not to get the ghost of walking regularly? If it will do this we don't care what kind of an instrument it plays.

There are over 35 million telephones in the world, which means about the same number of persons growing and fretting because the line is busy. When President Roosevelt's yacht was struck by the big wind he probably wondered whether he had really succeeded in adjoining congress. Old 32 isn't as good as the wets though; it would be and isn't doing the harm that the dries, and some of the wets, feared it might. It's a crime to hoard gold, which means that most of us should have no trouble passing St. Peter at the nearby gate. The world's champion rope skipper got tangled up the other day, and now he has a wife.

Geometry's Many Uses. Geometry is used extensively in the professions, principally in all branches of engineering, architecture, astronomy, as well as in mechanical drawing, carpentry and building. Nature's Mystery. Present-day birds have no teeth, but there is ample evidence that, thousands of years ago, their ancestors did possess them. How birds came to lose their teeth while most other creatures developed theirs, is but one more of nature's many mysteries. kind of securities that were sold just 60 days earlier. To some this is no mystery. To them it is all clear, but in the mind of the average voter the question is growing louder and louder, why? Did any one think that raise would help "maintain the credit of the United States?" The federal employee who received \$1000 per year and who was "cut" \$150 can see with half an eye that he has sacrificed something to "balance the budget" if he can't tie it up to the proposition of "maintaining the credit of the United States?" In the Congressional Record of March 13 Wright Patman of Texas told the house that the United States was paying an annual bonus of something like \$700,000,000 to New York bankers and other big, powerful banking racketeers. I believe it is necessary to "maintain the credit of the United States!" I. G. SHAW.

Human "Leather" In the Albert Memorial exhibition in Exeter, England, there is a copy of Tegg's edition of Milton, 1852, of which the binding, according to an affidavit on the fly-leaf, is part of the skin of George Oudmore, who was executed at Devon on March 25, 1850. Disappointment. No life is without its discouragements. If when in your endeavor to achieve a high purpose you meet with misunderstanding and apparent defeat, there remains that solace to be found in the memory of him whose mission culminated on Calvary.—Grit.

Garden Club. Speak to my heart through gardens, till I see the shame of service rendered grudgingly. Turn from the selfishness that could forget. A lifetime were too short to pay my debt. Beholding how, from leaf to petal fall Proud poppies flame with joy at giving all. Out of the grace of gardens, make one wise. To learn as larkspur mirrors mist-blue skies. Here in my place: Thy holy ground, shall be laid. Against my life, serene and unafraid. A sturdier faith shall flower, and there be. A richer crimson in my love for Thee. —Molly Anderson Haley.

First Presbyterian Church, Bruce A. Cole, Supply Pastor.—Sunday school, 10. Tom Short, superintendent. Young people's orchestra will play for Sunday school. Forenoon service, 11. Sermon topic, "The Responsibilities of a Christian as a Citizen." Union evening service, Cottage prayer meeting at the home of Mrs. W. R. Cole, 724 north Ninth street. Free Methodist Church, R. W. Howell, Pastor.—Sunday school, 9:45. Elizabeth Tarr, superintendent. Forenoon service, 11. Sermon topic, "Maintaining Confidence in God." Cottage prayer meeting at the home of Mrs. W. R. Cole, 724 north Ninth street. Pentecostal Assembly of God, Atwood Foster, Pastor.—Sunday school, 9:45; morning worship, 11; evening service, 7:45. Special evangelistic services, with Mrs. George Gutekunst as speaker. Children's church Saturday, 3.

Highway Baptist Church, Henry W. W. W. Pastor.—Sunday school, 9:45; forenoon service, 11. Sermon by the pastor. The church will unite with other churches in the district service. Prayer meeting, Thursday, 8. First Methodist Episcopal Church, Meredith A. Groves, Pastor.—Sunday school, 9:45. Omer Moore, superintendent. Forenoon service, 11. Sermon topic, "Our Church and the State Conference." C. E. Umphrey and Mrs. M. A. Groves will give short reports of the recent annual conference. Special music. Evening service, 8. Sermon topic, "Life Changes." Union service at Baptist church with M. A. Groves preaching. Epworth League, 7. Prayer meeting, Thursday, 8. Official board meeting, Wednesday, 7:30.

Adventist Church.—At intersection of West Main and M streets is a small white church, the Adventist. Each Saturday at 9:30 an hour is spent in the study of the Sabbath school lesson. At 11 o'clock the pastor, Elder Paul Johnson, will deliver a sermon, the proof of his statements being named by chapters and verse from the Bible. Wednesday evening hour, 7:30.

Distribution of Silage. To obtain an even distribution of silage an Illinois farmer has hit upon a simple but effective device. An ordinary pitchfork is bound alongside the downy pipe of the silo filler, the tines pointing downward and extending perhaps a foot or six inches below the end of the spout. Just above the tines a pole is attached to the fork by means of a snap ring, wire, clevis, or other convenient means. This pole extends to the removable doors of the silo, from which one man directs the stream of fodder about as necessary. The resulting silage has been as good as that tramped by as many as five men. Similar results are reported from time to time by other farmers.

Irrigation and Mulching. Water is very important in vegetable production. Where possible, it is desirable to supply water artificially to the garden during dry weather. Water only when the plants appear to need it, but do not allow them to wilt. When watering, soak thoroughly, rather than give light waterings frequent. Too frequent waterings may do harm. Cultivate after watering the same as after a rain. The best time to water is late afternoon or evening; water should be applied as a spray.

Farm Notes. Chile exports its present wheat crop to all the country's needs until the next harvest. Albany county, New York, leads the state country farm business with 1,238 members for 1933. In northern Ohio about 10 per cent of the peach buds, enough to bear a moderate crop, survived the February zero wave. At an auction sale recently at Red Wing, Minn., an eight-year-old horse sold for \$150, while an eight-year-old sedan brought only \$25. The area of land sown to wheat in England and Wales is about 17 per cent greater than at the end of 1931, says a minister of agriculture report on conditions on January 13, 1933. New York state potato growers plan to cut their average about 8 per cent, or 17,000 acres for 1933. The 30 leading late potato states plan a 6 per cent cut, or 13,000 acres.

Soil Erosion Losses in the Appalachians. Five million of the 50,000,000 acres of Piedmont country extending from near New York city to central Alabama along the east side of the Appalachian mountains, have been essentially destroyed by soil erosion as far as their use for crops is concerned, the United States Department of Agriculture says. In addition to these 5,000,000 acres which have been ruined, more than 15,000,000 acres have had the surface soil largely or completely washed off by erosion. Although many farmers continue to cultivate patches of this land, they are able to make only the barest living. In 1924, when prices were much higher than now, the gross income of many families on these denuded areas, where the family averaged more than five members, was only \$300 a year. To prevent such erosion destruction, the department recommends terraces, tree planting, strip cropping, brush dams to prevent gullying, and similar practices.

The adult classes of the Methodist church entertained with a covered dish dinner Thursday evening of last week at the home of Mrs. and Mrs. Oswald Knight of Silk creek. The table and rooms were attractive with summer flowers. The evening consisted of giving speeches and singing. The women's class elected officers as follows: President, Mrs. J. H. Chambers; secretary, Mrs. J. H. Chambers; treasurer, Mrs. Maude Wright; visiting committee, Mrs. Birdman and Miss Henrietta Dolan; work committee, Mrs. Alta Hart and Mrs. W. F. Allen.

The Methodist ladies' aid society met Wednesday afternoon at the home of Mrs. Omer Moore with Mrs. Moore, Mrs. A. W. Siemann, Mrs. J. H. Chambers and Mrs. W. L. Hatch as guests. Officers for the year were elected as follows: President, Mrs. A. W. Wooley; vice president, Mrs. Joe Landess; secretary, Mrs. J. H. Chambers; treasurer, Mrs. Ransom Cone. Following the business meeting the afternoon was spent socially. Refreshments were served at the tea hour.

Mr. and Mrs. Raymond Trask entertained Thursday evening honoring a son and daughter. The time was spent socially and refreshments were served at a late hour. The rooms were attractive with red roses.

Mrs. Frances Nichols entertained the M. P. Club Tuesday afternoon at the home of Mrs. James Adams of Oakland, Cal. Mrs. F. D. Howe of Portland, Mrs. O. M. Miller of Eugene, Miss Lola Howe and Mrs. Donnell Allen.

Mrs. W. L. Hatch entertained the Presbyterian missionary society Wednesday afternoon. Mrs. Beattie Cole led devotionals and Mrs. George Matthews was program leader. The lesson topic was "West India." Refreshments were served at the tea hour.

The LaComus club entertained with their annual picnic Tuesday at Cedar creek. A picnic dinner was served at noon and the afternoon was spent socially and playing bridge. Guests were children of the members.

Mrs. J. S. Powell entertained the Royal Neighbors club Monday evening at Cedar creek. The time was spent socially and refreshments were served at a late hour. Three guests were present. This was the last meeting until September.

The Mizpah class of the Presbyterian church gathered at their annual picnic Friday evening at the home of Mrs. C. H. Haight in Delight valley. This was their last meeting until September.

Mr. and Mrs. N. L. Bolton entertained at dinner Saturday honoring their high school guests, Mr. and Mrs. Herman Bolton and Mrs. Owen Bowers of Los Angeles. Nine-teen were present.

Miss Beulah Donna Hastings became the bride of Dorrie C. Morris Wednesday at the Christian church parsonage. Rev. L. G. Shaw officiated. Mr. and Mrs. Paul O. Haney were witnesses.

Members of the Needlecraft club entertained their families with their annual picnic Monday evening on Layng creek.

The expert Endeavor class entertained with a pot luck supper Wednesday evening at the home of Miss Lilly Keitzer.
