Spies and son Billy have arrived from Richland, Ore., and Mr. Spies has opened a shoe repair shop in the Hart building. Mrs. Spies is to arrive later.

New York's Porkers Make Good Showing

Hog raising among important industries of State. By John P. Williams, New York State College of Agriculture, WNU service. A gross income of \$7,849,000 from hogs places the porker among the important farm industries of New York state. Census totals for January, 1930, show 231,000 hogs on New York state farms, but June figures, which would include the spring crop of pigs would increase the total, he says. New York state farmers market large amounts of corn, hay, and pasture through hogs. An acre of alfalfa, clover, or rape saves more than 1,100 pounds of corn, and about 400 pounds of tankage when grazed by growing pigs. In the dry lot 350 to 400 pounds of grain and concentrates make about 100 pounds of pork. A 400-pound brood sow eats about 2,000 pounds of grain when she raises two litters, and 1,800 to 1,900 pounds when she raises one litter a year. Most of the 1,500 pure-bred hogs in New York state are in herds of from three to five sows. Chester White is the most popular breed, followed by: Berkshire, Duroc Jersey, Poland China, and Hampshire. Most of the grade cross-bred pigs are sold at weaning time to buyers who fatten one, two, or three pigs for home-killing. A few feeders feed from 100 to 200 pigs a year; they make a business of collecting garbage in cities which do not have disposal plants. Commercial pork production is not considered profitable in New York state, but a few pigs can be fed largely on garbage, that is wasted, with some additional grain.

Mice and Rabbits Damage Fruit Trees During Snow

The deep snows of winter, beneficial as they are in restoring to the soil some of the reserve of moisture which was depleted during the long drought period, nevertheless have brought about a condition injurious to the fruit belt in the eastern states, says the Washington Star. Field mice and rabbits, unable to reach their normal food supplies, turn to fruit trees, especially apple trees, for food. They gnaw through the outer bark to reach the cambium layer and inner bark and often circle the entire trunk in their search for food. When this occurs it becomes vital that the trees be bridge-grafted, else the trees will die. Trees which must be so treated need prompt attention. Scions to be used in the grafting should be cut and held in cold storage until spring when the grafting should be started at the first indications that the sap is rising. In the meantime, dirt must be piled up over the wound in the tree to prevent drying.

Lions Club Sponsors Swim Classes

A Red Cross course in swimming and life saving is being sponsored again this year by the Lions club. Classes are to start July 17 and will continue for six days. The instructor of Eugene is to be the instructor. Class hours will be from 9 to 12 each day. The steel bridge swimming hole has been selected. There will be classes for non-swimmers, advanced classes and junior and senior life saving classes. Badges of merit will be awarded in each division. Dr. H. A. Hazen is chairman of the Lions committee. Those wishing to join were asked to register with O. V. Brees, city recorder.

Bread and Water Is City's Menu

Either work or live on a bread and water diet was the edict of Police Judge Brees yesterday morning when "Red" Sanders, who said he could not pay a fine imposed on an intoxication charge, also said emphatically that the city wasn't going to get any work out of him. The police judge also boosted the ante to 25 days when Sanders said things to Chief of Police Pitcher that the judge thought he shouldn't have said and instructed the chief that bread and water, with one full meal every three days, should be the menu until Sanders was ready to work. "Red" decided to put in his time piling the city's winter wood. The judge was also a little put out because Sanders, who had been released without bail, failed to show up in court at the appointed hour and waited for the police chief to come get him. The police judge had intended to remit part of the fine and permit Sanders to pay or work out \$10, but changed his mind when Sanders did too much talking.

Home-Made Brush Burner

A home-made brush burner, which will burn orchard prunings as fast as three men can pile them in, solves one common orchard problem for Clifton and Everett Derby of North Lecomber, Mass. The burner is a large box, 10 feet by 6 feet by 3 feet deep, made of scrap iron, salvaged from old iron drums and sheet roofing, the pieces fastened together, with stove bolts. Ventilation, which was found necessary to keep the brush burning, was provided by chopping a few holes in the sides with an ax. The box is mounted on skids and is pulled through the orchard at the end of the pruning season by a tractor or team, while men pick up the pruned branches from under the trees and pile them in the box.

Agricultural Chaff

Ohio's roadside markets were 94 per cent farmer-owned in 1932. Demand for boys to work on farms in New Zealand is exceeding the supply. Three hundred and seventy million tons of farm waste may be used in the manufacture of drugs, perfumes and explosives. Farmers and others dwelling outside of incorporated places paid 39 per cent of the total road costs in Ohio in 1931, or about \$35,500,000. This amount paid by farmers for the support of roads was a 34 per cent increase over what was paid in 1921-25.

Thunder and Lightning

Thunder and lightning time before thunder is heard. Thunder is heard much more rapidly than light. Light follows lightning immediately. Light can be seen, therefore, that thunder is heard in an explosive manner. It is not by suddenly hearing the air expand through the air. It produces the discharge of great magnitude. Lightning is an abrupt electric discharge.

Varied Rainfall

On the Pacific side of the Panama canal the annual rainfall is about 75 inches and on the Atlantic side the average is approximately 185 inches.

Safeway Stores Give Wage Boost

That business will boost wages as business warrants such action is illustrated by the fact that the Safeway store here has received notice of a 20 per cent increase for all employees. The store is one of those reporting a splendid increase in business during recent weeks and Manager Haldeman was well pleased with results from their advertising in last week's Sentinel.

CULP CREEK

July 5.—Mr. and Mrs. J. H. Callahan of Portland spent the Fourth with the Will Garoutte family. Mr. Callahan returned to Portland and Mrs. Callahan remained to spend the week visiting a sister and her parents, Mr. and Mrs. W. C. Johnson of Latham. Mr. and Mrs. Clyde Whitman and Mr. and Mrs. H. F. Miller of Woodburn and Chris Hennigstad of Silverton, a brother of Mr. Merle Scott, spent the holidays at Culp Creek with Mr. and Mrs. Merle Scott. Mr. and Mrs. Will Garoutte entertained them Sunday evening and Mr. and Mrs. Merle Scott entertained them at dinner Monday evening. Mr. and Mrs. James Towne and daughters Eileen and Ellen spent the week end at the W. A. Garoutte home. The N. M. Matson family spent the Fourth with the J. D. Johnson family at Latham. Mr. and Mrs. Carl Cellars visited Saturday evening with Mr. and Mrs. Glen Cellars. Mrs. Grace Murray of Fort Leavenworth, Kans., is visiting her father, Mr. Maglady. Loggins Is Resumed. Cameron & Shanda have resumed logging on the city's west side watershed. The timber is being delivered to the Cottage Grove Lumber company's mill.

WE HAVE EVERYTHING YOU NEED, BUT NOT EVERYTHING YOU WANT Short's Second Hand Store

There were 8 births during June, 4 males and 4 females, according to Dr. C. E. Frost, city health officer. Loose Leaf Binders, Sentinel.

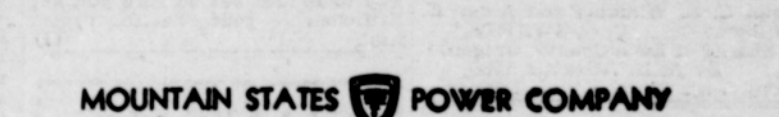

Safely through the critical years

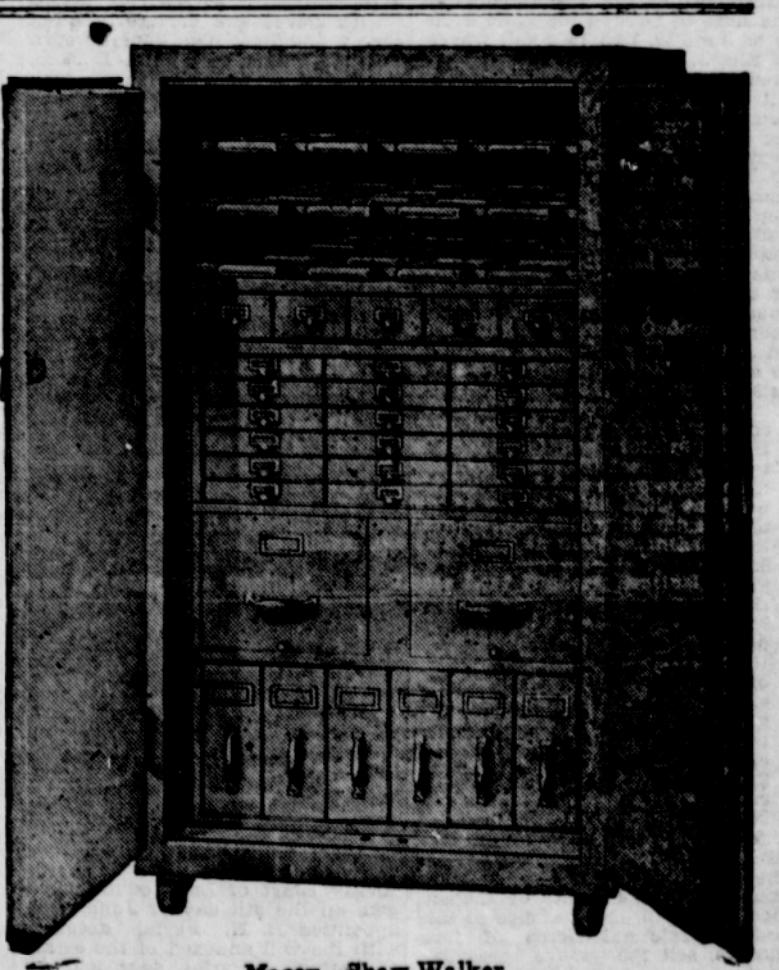

OUR ELECTRIC REFRIGERATOR KEEPS HIS FOOD FRESH AND WHOLESOME

The Doctor said: "The food and drink of your children are the materials of which their growing bodies are made. Keep an eye on their milk... be certain it is pure, safe... always fresh. Watch every single item of their food. Baby digestions are easily upset."

That's why I purchased an electric refrigerator and I have found it the best investment I ever made. First, as an investment in the health of my children; and the dividends have been 100%. Second, from the standpoint of money, it has actually cost less to own an electric refrigerator than to get along without one. Why not see your dealer today?
