Waterspouts on Inland Lakes, Same as on Ocean

One of the rare thrills of ocean traveling, and one still rarer in temperate than in tropical waters, is the sight of a waterspout, when earth and sky seem to meet each other in a mighty swirling funnel, advises a correspondent in the St. Louis Globe-Democrat.

Waterspouts occur not only on the ocean but also on inland lakes, whenever winds of very different temperatures meet high up in the air and form a local tornado or whirlwind.

As always, when warm moisture-laden air is suddenly cooled, a great deal of moisture is condensed into vapor and, in the center of the swirling winds, into rain.

The waterspout appears at first as a funnel-shaped black cloud hanging from the cloud above. In the center or core of the whirl there is a partial vacuum, and as the funnel hangs lower over the sea, this vacuum sucks up some of the agitated water under it.

Some few sailors have not only seen waterspouts but have been in them. These men have reported that the water of the spout is fresh, not salt water, which seemed to them to make the waterspouts even more mysterious than they otherwise looked. But the explanation probably is that the greater part of the water in the spout, and particularly in the center, is rain condensed from the moisture in the air, dropping in the core where there is little or no disturbance, rather than water drawn up from the sea.

Fish That Fiddle Among Musical Freaks of Ocean

The common horse mackerel, sunfish, John Dory, and little bullhead, of the fish musicians inhabiting British waters, all have a reputation as violin soloists, according to Tit-Bits Magazine. The "notes" are produced by friction of the fins and gill cases.

Some foreign fish practice a more intricate technique. The Indian catfish, for example, combines fiddling with gymnastics, cleverly twisting his body so that the first bone of his dorsal fin makes contact with the spines of the fourth and fifth vertebrae, resulting in a plausible imitation of the violinist's strings and bow.

One wonders why no enterprising showman has ever paraded a singing fish troupe, for there are many creditable performers.

Mexican natives often spend hours reclining in their little boats listening to the massed singing of their canary fish. These strange choristers travel to and fro, emitting a ghostly refrain, which, it is said, assumes a softer melody if delivered several fathoms below the surface. Less musical, perhaps, but not less entertaining, are the vocal efforts of the drummer fish, found off the coast of Florida. One observer has compared them with the orchestral roll of kettledrums.

In the Stratosphere

The earth's atmosphere is divided into two distinct layers, the lower one, the troposphere, extends from sea level up to a height of perhaps six or seven miles, above which lies the stratosphere, extending to an unknown height. These two layers of atmosphere differ from each other in several respects, notably temperature. The stratosphere has a comparatively uniform temperature. Its lower portion is supposed to have a system of winds unlike that prevailing in the troposphere. Higher up there is probably little or no wind and under such conditions the gases of the atmosphere would tend to arrange themselves according to their relative weights, the lighter above and the heavier below; thus, the composition of the higher atmosphere is believed to vary with altitude.

Dryness of Lamp Bulbs

An electric incandescent lamp is no better than its vacuum. And its vacuum is almost incredibly good. Thanks to the work that Doctor Langmuir did two decades and more ago the disastrous chemical effect of the merest trace of water on a filament is understood. But what is a mere trace? Consider these figures. As little water as there is in a drop of dew on a blade of grass is enough to ruin 68,000 lamps. The vapor from a single teaspoonful of water can spoil more than 5,000,000. So the vacuum pumps in a factory are its most important machines. Thanks to them there is a dryness within the glass bulb of a lamp that makes Sahara seem dripping wet in comparison.

Black Marble Under Chalk

In the chalk mines of Nagysvnyo, near Miskolc, rich layers of black marble are found under the chalk, writes the Budapest correspondent of the London Sunday Observer. According to expert reports, this marble is equal in quality to the famous black marble of Belgium. The mountain ranges which surround the mine also contain quantities of black marble streaked with white. This stone has in the past been employed by the villagers for paving the highways, so the villages of Nagysvnyo, Ural and Sisa bear the unusual distinction of being approached by marble roads.

First Cross-Word Puzzle

The first genuine cross word puzzle of the modern type was composed by Arthur Winn and appeared in a supplement of the Sunday New York World on December 21, 1913. The outbreak of the World war arrested the cross word puzzle craze temporarily, but it was revived in 1916.

The Busy Ant

Working together unselfishly (to all appearances), ants milk herbs of aphids, cultivate fungi for food and store seeds. They capture other ants and make them slaves. May they some day threaten man's superiority? Biologists give a reassuring "No" for answer.

Lumberjack Evangelist Is Here. Ernest Corryell, lumberjack evangelist from Viborg, S. D., will tell his life story and of his call to the ministry at the evening service Sunday at the Church of the Nazarene. This service will be one of three that day and part of a revival now under way.

Waterspouts on Inland Lakes, Same as on Ocean

One of the rare thrills of ocean traveling, and one still rarer in temperate than in tropical waters, is the sight of a waterspout, when earth and sky seem to meet each other in a mighty swirling funnel, advises a correspondent in the St. Louis Globe-Democrat.

But the explanation probably is that the greater part of the water in the spout, and particularly in the center, is rain condensed from the moisture in the air, dropping in the core where there is little or no disturbance, rather than water drawn up from the sea.

PROHIBITION IS COMING BACK, DECLARES EBBERT

Prohibition is coming back, Col. Frank B. Ebbert, militant dry, told a fair-sized audience at the Methodist church Tuesday evening. Dr. Clarence Truitt Wilson, called to be one of the speakers, was unable to be present.

Col. Ebbert said that conditions now are far worse than under prohibition, made so by the wetts, and the participation of women in drinking is responsible in large degree for the fact that liquor will again be voted out.

Colonel Ebbert made his talk before a temperance rally sponsored by the ministerial association.

Mrs. Charles Teeters Injured. Mrs. Charles Teeters, Dorena, suffered injury to a finger Sunday in an odd case. She was at the Farmers union hall preparing it for church service. She raised a sack which slipped back and pinned one of her fingers under it so securely that she was unable to extricate the finger. C. M. McClain heard her calls for help and came to her aid. The finger was badly mashed but no bones were broken.

Row River Road Oiling Asked. A petition asking for oiling of the Row river road is being liberally signed by residents of the Row river valley and those operating in the Bohemia district. The distance is 21 miles. The road is receiving hard usage now because of traffic into the mining district and the mining at Culp Creek also create considerable traffic. Ordinary use of the road is heavy.

Kelly Baby Dies. Funeral services for Marvin Merrill Kelly, six-week-old son of Mr. and Mrs. E. W. Kelly, were held Thursday afternoon at the Taylor cemetery with Mrs. J. L. Whitteal, the Christian church pastor officiating. The baby, who died Wednesday morning in a Eugene hospital, is survived by his parents and one brother, Dean Kelly.

Balladeers to Organize. The Balladeers, under the direction of Mrs. Edna Pearson of Eugene, will meet at 8 o'clock Thursday evening at the Presbyterian church. All former members and those wishing to become members have been urged to attend.

Dorena. Aug. 27.—Mr. and Mrs. Ray Steele and daughter Jean were Eugene visitors Thursday. Charlie Peterson visited Thursday and Friday at the H. N. Henriksen home in Creswell.

Mr. and Mrs. J. L. Whitteal and daughter Marilyn of Eugene spent several days the past week with Mrs. Clara Kirk.

John Fletcher of Crow is visiting friends here.

Elmer Wicks, who has employment at Powers, spent the week end with his family here.

Mr. and Mrs. Henry Taylor of San Diego were overnight guests at the Fred Fleck home last week.

The young people of this place held a party Saturday evening at the club house.

The Theodore Sturdevant family left Monday for Salem where they will visit Mrs. Sturdevant's sister, Mrs. E. B. Stroud.

Orien Land, Glenn Jennings and John Fletcher left Monday for Tenders to seek employment.

Jerry and Herbert Mosby attended the Vandyke Colored Home of Davids-Eugene baseball game in Eugene Saturday afternoon.

Mr. and Mrs. Fred Fleck and Mr. and Mrs. Oscar Nichols spent Sunday of last week in Veneta visiting relatives of the Nichols.

Mr. and Mrs. Carl Small of London visited Saturday at the Verlin Ward home.

Bernice Mosby left Friday for Cheilan, Wash., where she has employment. She will also visit a sister, Mrs. Ralph Hand.

Mrs. Ruth England and children, John Fletcher, Everett Holstrom and Lita Mosby attended the AllStar Big Six-Hills Creek baseball game in Marcola Sunday. They also visited the Wendling CCC camp and Everett Holstrom returned to his work there after spending the week end in Dorena.

Mr. and Mrs. John Teeters and family of Nehalem visited last week with Mr. and Mrs. Chas. Teeters.

The Happy Circle Sewing club sponsored a picnic in Nichols' Grove Sunday.

Miss Ruth Shearer of Eugene is convalescing at the home of a brother, Harry Shearer, following a recent operation in a Eugene hospital.

CITY SCHOOLS TO OPEN MONDAY OF NEXT WEEK

Teaching Positions Are Filled; High School Registration to Start Next Tuesday.

The city schools will open a week from Monday and all vacancies on the teaching staff have been filled.

Miss Marion Notved of Corvallis has been elected head of the home economics department. She is a graduate of Oregon state and has had advanced work at the University of California and University of Southern California. She has been head of home economics at Lebanon for four years.

Miss May Glenn of Springfield has been elected to teach civics, history and geography in junior high. She is a graduate of Monmouth normal school and has had experience at Forest Grove, North Bend and in Alaska.

Miss Esther Wicks will teach English and science in the high school, will have charge of the library and will direct the glee clubs and orchestra. She is a graduate of University of Oregon and served in the civilian department two years. She has taught at Seaside and Astoria.

Registration for high school students will start Tuesday, as follows: Freshmen—Tuesday, 9 and 1:30; sophomores—Wednesday, 9 and 1:30; juniors—Thursday, 9; seniors—Thursday, 1:30.

Those expecting to enter high school should register whether or not he or she has previously registered. Those who have text books to sell should take them to the high school building Tuesday. Resale price on books is usually one-half the cost; provided books are in good condition.

Football practice will start September 5.

Waterspouts on Inland Lakes, Same as on Ocean

One of the rare thrills of ocean traveling, and one still rarer in temperate than in tropical waters, is the sight of a waterspout, when earth and sky seem to meet each other in a mighty swirling funnel, advises a correspondent in the St. Louis Globe-Democrat.
