Eyestrain is a very real danger. Few of us realize that we pay dearly for every hour we strain our eyes. The tragedy is that we seldom know that we ARE misusing our eyes. Attempting to read, work or study in poor or glaring light is the cause of most eyestrain. The two or three pennies a day saved on your light bill isn't worth the risk of impaired vision. See this new type lamp (recently designed to help correct the evils of improper home lighting) at your dealers.
