Twenty-nine Million Pounds of Butter

○ In Oregon there are over a hundred modern and efficient creameries which produce annually about 29 million pounds of butter. Approximately six million pounds of this butter are shipped to other states and to the Orient.

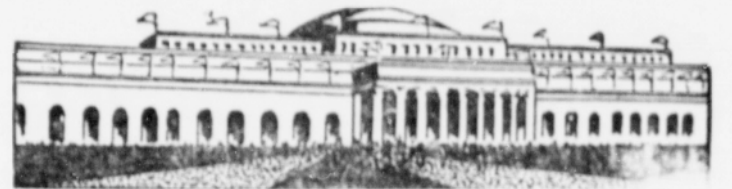

○ Many exhibits of Oregon's fine butter will be featured at this year's Silver Anniversary of the Pacific International Livestock Exposition in Portland, October 5 to 12.

○ The dairy products show of this great annual event of the West is always educational and finds Oregon's butter competing favorably with that of many midwest and northwest states.

○ Plan to visit this outstanding Exposition and be sure to shipped to other states and to the Orient.

○ Remember, this bank is always ready and willing to cooperate in furthering the development of better farm production.
