Mr. Wallace, known to his many friends and neighbors as "Uncle Johnny," was born March 15, 1856, in Iowa. He crossed the plains in 1864 with his parents, Mr. and Mrs. Hamilton Wallace, well known pioneer residents. He was a carpenter by trade. Hunting Dogs Were Used Long Ago by Egyptians
 The history of the hunting dog is clouded in antiquity. Ancient rock carvings tell us hunting dogs were known in Egypt thousands of years ago, but the story of the first domestication of the dog and its development into a hunting companion for man is lost to us for always. Possibly somewhere back in the dim ages, when man himself had just risen above the brute and lived in terror of monster carnivorous creatures which then roamed the earth, a caveman captured his first wild dog puppy and brought it back to his home among the ledges where, in his loneliness, he fed and nurtured the animal until he won its affection. Later, probably, he taught the dog to assist him in the chase. This, of course, is purely conjecture, writes Donald Stillman in the New York Herald-Tribune. But in the United States, where more pure breeds are recognized than in any other country, the hunting dog is employed for a variety of purposes ranging from pointing and retrieving on upland game birds and waterfowl to big game hunting for panther and bear. Most stories or accounts of hunting dogs are concerned largely with the efficiency of a well-trained animal or, otherwise, the serious side of the hunting dog question.
An Implosion
 An implosion—a bursting inward from external pressure—can occur with as much force as an explosion. This was proved when a clinical thermometer, wrapped in heavy cloth, was lowered into very deep water. The resultant implosion did not blow the instrument into "a thousand pieces," but into a spoonful of fine white powder.—Collier's Weekly.
Action of Meteors
 Countless meteorites have struck this earth, and have, at times, come down in showers such as the fall of some 100,000 stones near Pultusk, Poland, on January 30, 1868. Yet there is no authentic record of a person having been killed by one.—Collier's Weekly.
"Carat," Arabic Word
 The word "carat," unit of weight for precious stones, is derived from an Arabic word meaning pods of the locust tree.
