"MID" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, July 3.
The Golden Text was, "We will rejoice in thy salvation, and in the name of our God we will set up our banners." (Ps. 20:5).
Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Hear, O Israel: The Lord our God is one Lord: And thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might" (Deut. 6:4,5).
The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Spirit, Life, Truth, Love, combine as one,—and are the Scriptural names for God. All substance, intelligence, wisdom, being, immortality, cause, and effect belong to God. These are His attributes, the eternal manifestations of the infinite divine Principle, Love" (pg. 276).

SMITHS HAVE REUNION
Rev. and Mrs. James Smith had a most enjoyable reunion of the family recently. Three of the children and their families were here on a visit of several days. All of the children except the son and family of Colombia, South America, were present. They are widely scattered, one living in Klamath Falls, one in Goldendale, Wash., one in Banning, Cal., the eldest son, Pryor, a missionary in South America, who was home on a furlough two years ago.

In STOP and GO, a mile S-T-R-E-T-C-H-E-S

STOP-AND-GO driving fools your speedometer—while your car is going a mile, your engine may go the equivalent of two.

You can't always avoid stop-and-go driving—even in the country. But you can do something about its high cost.

Shell engineers found that getting away from a traffic stop can waste enough "undigested" gasoline to carry you 1/3 of a mile.

To cut this costly waste, they rearranged the chemical structure of gasoline. They made every drop of Super-Shell "motor digestible"—every drop usable in low and second gears, as well as in high.

There is a Shell dealer near you. Give

In low and second, you use around 3 times as much gas!

That's because your gear ratio

IN HIGH GEAR IS ABOUT 4 TO 1

IN SECOND GEAR IS ABOUT 8 TO 1

IN LOW GEAR IS ABOUT 12 TO 1

The more you STOP and START, the more extra revolutions your engine makes. That means "undigested" gasoline... unless you use a gas like Super-Shell.

Super-Shell a try. Start using it regularly and watch your savings count up.
