

New Pontiac to Be Displayed Oct. 15

Prospective buyers for 1939 motor cars will have opportunity of viewing another 1939 model in the DeLuxe Pontiac six sedan to be displayed by the Martin Motors at 125 North Ninth Street Saturday. Mr. Martin will show the new model along with other Pontiac dealers over the United States on Saturday the 15th.

Pontiac engineers have displayed skill and originality in the design of three new lines of cars for 1939 that combine the height of fashion and good taste in modern streamlining and rich appointments with important mechanical improvements that feature Duflex rear springs as the greatest engineering achievement.

The Quality Six, a newcomer to the line, is designed for large production at a low price. With five body models (Two and four-door sedans, business and sport coupes and station wagon) of 190 inches overall length, it digs deeper into the lower price field than any previous Pontiac.

The DeLuxe Six, with the same engine but longer chassis than the Quality Six, comes in five more finely appointed bodies. A cabriolet with two coupes and two sedans constitute the line. Overall length of 196 1/4 inches makes it the longest six by four inches Pontiac has ever built.

The DeLuxe Eight with its famous smooth running and economical straight eight engine, will embrace the same five body styles as the DeLuxe Six.

In the appearance of the three lines we find complete modernization in the styling of hood, radiator, fenders and body. Continuing the Silver Streak through the center of hood and radiator for the fifth year as the central motif, there is more of a yacht-line prow to the radiator, which in turn is flanked on either side by chromed side grilles set into the front surfaces of the fender catwalks. The radiator ornament serves as the locking handle to raise the alligator type hood.

Harmonizing multibeam headlights are mounted on the front fenders. The Quality Six thus is the lowest priced car today with three-beam headlights.

There is increased visibility for driver and passengers alike in the new Pontiac which, of course, is an added safety factor. In the DeLuxe Six and Eight models visibility is fully 25 per cent greater than in previous models. Windshield and window glass are wider and higher. Windshield corner posts are narrower. Cowl-line is lower and the radii of upper windshield corners are shorter, thus enlarging the vision all around. A single panel rear window in all models also adds to the visibility.
