Swanson and Grimes were high point men for the locals in the two games, while Fox led his teammates in the Grove-Coburg affair and Gibson was high point man for Creswell with fourteen points. Lane County Fair
September 20 to 23
(Special to The Sentinel)
The 1939 Lane county fair will be held September 20 to 23, it has been decided by the board of directors, and announced by Allen Wheeler, who will manage the show again.

The dates are practically the same as those of 1938, coming after the state fair in Salem. "We decided to risk rain and be sure the crops would be mature," Manager Wheeler said, remembering the good weather of last year's fair.

Work on the premium book will begin this week, it has been announced. This consists mainly of selling the advertising space and making small changes in the listings of awards in various divisions.

Wheeler expects to have the book ready for distribution late in February.

WAYS GIVEN TO REDUCE TOMATO TIPBLIGHT LOSS

Complete control of the tipblight disease of tomato can be ultimately achieved only by the development of resistant varieties, although the disease may be combatted to some extent by indirect control measures. Such is the conclusion reached in a new station circular No. 128, just issued by the agricultural experiment station at OSC, entitled, "The Tipblight Disease of Tomato" by F. P. McWhorter and J. A. Milbrath.

As this is a virus disease, direct control by spraying, dusting or by using special fertilizers is at present impossible. The disease has been confined for the most part to those counties in southern Ore-

gon where tomatoes are grown for canneries.

The new bulletin describes the disease, its distribution, infectiousness, means of spread, and certain facts about the causal virus. Clean cultivation, both in and around a tomato field, early removal of plants showing the disease and control of thrips which carry the disease to the extent possible are beneficial measures recommended. Experiments toward the development of resistant strains are being carried on at the southern Oregon branch experiment station.
