YEAR IN AND YEAR OUT
Electricity
IS YOUR BIGGEST BARGAIN

Take a penny from your handbag or pocket and hold it in your hand. That small copper is the foundation of the monetary system of our country and consequently the most important coin in the world. Alone it is not of much value. In multiples it will buy all a man needs or wants. And yet a single penny is a poor thing, a small thing, a weak thing. But there is an exception to this statement for a penny invested in electric service does more work, buys more service than any other penny you can spend. Electricity is not only the most perfect service but it is also the least expensive to buy. A penny becomes important money when invested in electricity.
