## More Butter Now!

Because butter is such an essential part of the daily diet, you cannot afford at any time to reduce the amount you consume below the "protective" level of about a pound a week for each member of your family. But at present prices you can well afford to increase its use—by more generous helpings for the children and yourself and more extensive use in your cooking. Under the stress of present conditions you need the added protection its health building and energy producing qualities provide.

"TELEPHONING SEEMS SO FRIENDLY"

The service itself is friendly. Operators always have time to say "please" and "thank you." And the act of telephoning is friendly. It is the personal way of reaching others at short distance or long, and the sound of your voice is reassuring, so humanly you. Bringing together the voices of friends—handling your calls to your complete satisfaction—is our satisfaction too.
