Her Kitchen Saves Time and Effort

IMAGINE the pride of this Portland, Oregon, housewife whose recently completed kitchen is so attractive and convenient. Well planned and well lighted, it gives her every facility for carrying on her daily kitchen tasks in the shortest time and with the least possible fatigue.

Those cabinets along the wall provide all the storage space needed for dishes and utensils she uses at her electric range. Her refrigerator, also electric, stands at the left of the kitchen, just outside the picture. In the basement, below the sink, is an electric water heater, in which its owner takes special delight.

The number of home owners who are taking advantage of complete electric service in the kitchen is rapidly increasing in all sections of the country, the Modern Kitchen Bureau reports. With cooking, water heating, refrigeration, dishwashing, ventilation and lighting, and dozens of other kitchen tasks all performed by electrical equipment, most of it completely automatic, today's homemaker is fast learning to save time in the kitchen so as to have more time for other interests.
