31 Blossoms on Stalk
In her garden, Mrs. Oscar Kummer of Seattle has lilies growing which have produced 31 blossoms all on one stalk which is four feet tall. The flowers are all clustered at the top, jostling each other gently but firmly, for a share of the sunlight. The lily has attracted considerable attention.

N. Y. Subs Safest
New York subways are the safest railroads in the world. They are equipped with 56 types of safety devices. One of these is called the "dead man's button." If an engineer becomes suddenly ill or dies and his hands fall from the controller the train stops immediately.

Famous Artist of "Our Democracy" Cartoons

Hubert J. Mathieu ("Mat")

Hubert J. Mathieu, who draws the "Our Democracy" cartoon series, has been nationally known for years as an illustrator of stories and serials in such magazines as the Saturday Evening Post, Colliers, Ladies Home Journal, McCall's, Cosmopolitan.

Mr. Mathieu's first paid job was as a farm hand, and he owns and lives on a farm today. Born in Brookings, S. D., the son of the late Hubert B. Mathieu, dean of South Dakota State College at Brookings, the artist worked as a boy on nearby farms. He graduated from South Dakota State College in 1919. In his years of success he has gone back to the land. He owns and lives on 150 acres in Bucks County, Pa. The farm which

this year has 20 acres in corn, 20 in wheat and 15 in oats, as well as hay and truck, is operated for Mr. Mathieu by his nearest neighbor, on shares. Mr. Mathieu says the farm pays both him and the neighbor.

The series of cartoons "Our Democracy" scheduled to appear weekly in this paper, Mr. Mathieu draws partly on his farm and partly in a studio he rents in New York, where the photograph above was taken.

Mr. Mathieu is of American Revolution stock, of French, Dutch and English ancestry. He is married and has four children.

His uncle, Oscar Mathieu, is senior agronomist of the U. S. Department of Agriculture, at Washington.

Field Windbreaks Protect

With more than 11,000 miles of windbreaks planted since 1935, the department of agriculture announced recently that field windbreaks have proven very satisfactory. A survival count taken on one farm out of ten on which seedlings were planted, showed an average increase rate of survival of 5 per cent. Originally planted to prevent dust storms, the shelter belts now protect nearly 2,000,000 acres of farm land.

Parking Space Shrinks

In business districts of representative American cities, legal curb parking space has shrunk from one-third to one-half in the past 10 years.

Technological Changes

Technological changes have taken the jobs of 78,140 coal miners in the past 15 years, said Thomas Kennedy, secretary-treasurer of the United Mine Workers. Improved machinery, he said, was one blade of an "economic scissors," which reduced the number of men needed to mine a ton of coal. The other blade was "greater efficiency in heat engineering and competition from other energy sources," which reduced industry's requirements for coal. Between 1923 and 1938, he said, anthracite consumption had been reduced 47,200,000 tons a year, and bituminous consumption 219,000,000 tons.
