CHRISTIAN SCIENCE CHURCHES "ARE SIN, DISEASE, AND DEATH REAL?" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, April 13.

The Golden Text was, "The Lord is my light and my salvation; whom shall I fear? The Lord is the strength of my life; of whom shall I be afraid?" (Ps. 27:1).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Beware of false prophets, which come to you in sheep's clothing, but inwardly they are ravening wolves. Ye shall know them by their fruits. Do men gather grapes of thorns, or figs of thistles? Even so every good tree bringeth forth good fruit; but a corrupt tree bringeth forth evil fruit." (Matt. 7:15-17).

The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Jesus strips all disguise from error, when his teachings are fully understood. By parable and argument he explains the impossibility of good producing evil; and he also scientifically demonstrates this great fact, proving by what are wrongly called miracles, that sin, sickness, and death are beliefs—illusory errors—which he could and did destroy" (p.343:14).

America Made

The asphalt shingle—the most widely used roof shingle in this country—is the only roof shingle invented in America. The first asphalt shingle, according to a recent issue of American Roofer, was made in Grand Rapids, Mich., in 1903.

Auto-Oddities

By the MOBILGAS Reporter

THE HORSELESS CARRIAGE OF 1801

Who is the chauffeur of this queer-looking steam car? Is he the pilot? No, you're wrong. He's the fellow at the rear—the one who kept up the fire—because the original meaning of this French word was "stoker."

This early ancestor of the auto was built in England in 1801 by a man named Thevithick. Regarding it, the inventor said: "It's much more manageable than horses, and goes 8 or 9 miles an hour." Some speed in those days!

WHEN RUBBER TIRES CAME TO AMERICA IN 1896

They were installed on a New York horse-drawn carriage, like this. They cost the owner a pretty penny—\$150 FOR THE SET!

Invented in London in 1876—100 years after the Revolutionary War—rubber tires were rejected by the English public on the theory that silently-moving vehicles were dangerous. What changes time has wrought. Now we can't get along without them.

Liquid Stone

Liquid stone, formed by dissolving a dry powder in water, and then applied with a brush, is a revolutionary industrial product adopted for protecting and waterproofing building materials.

New Device

Loud speakers dangling from a captive balloon by a cable, represent the new device used by the Royal British Air force to talk to the populace from the sky.

Ancient Wagon

E. F. Russell of Sweet Home, Ore., owns a wagon said to have been in continuous use from 1852 to 1925.

Schooling at Home

Children bed-ridden by chronic illness in Moscow are to receive their regular schooling at home, according to an official announcement.

OUT OF GAS, MISTER?

Persons who make the standard remark about new service stations being constructed, "well, pretty soon there'll be one for every car," may be closer to right than they realize. According to the Oregon State Motor Association there is now one service station for every 128 motor vehicles registered in the United States—yet well over a million motorists run out of gas every year.

Many motorists who read with interest of the progress toward using synthetic rubber for automobile tires do not know that a similar compound is already in use under the hoods of their cars, according to the Oregon State Motor Association. Experience has shown that synthetic rubber is more enduring than natural rubber when used for insulation of cables and for gaskets, feed lines, etc.
