LOYALTY GREATEST NEED IN PEACE OR WAR.

A prominent writer not long ago remarked: "We may condemn the violence and brutality of war, but there is one characteristic with which it must be closely associated and that imperative requirement in the attainment of life's most resplendent treasure is loyalty. Every unit in the army must be a loyal supporter for the principles for which it is fighting. Otherwise there can be no harmonious effort and there is no possibility of winning a campaign under any other circumstances."

In the beginning of our national history the writer says we adopted the slogan that "honesty is the best policy," but that gradually this slogan has lost its appeal, notwithstanding the fact that the slogan helped make our colossal business organizations the most colossal in the world.

"In gradually losing its appeal, we have become a nation of smartaleaks and we win friends that we may take advantage of them financially and loyalty to anything or anybody is gradually disappearing."

In war time, disloyalty is a major crime and we may have to get back to the first principles of the country to be saved. And since we must be loyal in war time and since the army must be loyal, it is high time that we consider the worth of the old time principle in every phase of our daily lives. And with war on us, or close at hand, the spirit of loyalty must take its place among us or we perish.

"There must be a full and complete recognition of the paramount necessity for loyal adherence to the rules of life, which guide those who believe in the brotherhood of mankind. No nation can long exist that is ruled by deceit and guided by selfish manipulators."

OREGON-EDUCATED MATSUOKA HATES U. S.

Yosuke Matsuoka, Japanese foreign minister and a graduate of Oregon State, hates the United States, according to an article in the current Liberty magazine. Matsuoka hates America because he lived on the Pacific coast during the years of the fiercest agitation against the orientals and this made an impression on the sensitive Japanese.

This may be one of the reasons why Japan has tried to throw in with both Russia and Germany and in so doing has thrown the nation out on a diplomatic limb. As this is written the world is wondering which way Japan will jump, since Japan is jumping on the axis band wagon signed a non-aggression pact with Russia.

FARMERS CAN'T DO IT ALL.

Fred S. Sexauer, president of the Dairymen's League Cooperative Association, recently said this: "Farmers cannot raise defense food at low prices in the face of shortage of help and rising costs. Farmers should be patriotic, but patriotism does not consist of letting labor leaders tie up munitions, arms and supply industries, and expect to get continually higher wages and shorter hours."

Agriculture, in short, can't be expected to make all sacrifices. They must be shared by other groups. If general price levels continue to go up, due to higher labor and other costs, the price of farm-produced goods must follow the trend.

Rust Removing Preparation

All rust should be removed from metal surfaces before repainting is undertaken. There are liquid preparations which remove rust from metal surfaces. These liquids should be applied with a cloth or sponge, allowed to remain a short time, rubbed a little with a fine steel wool and wiped away with a clean cloth. The paint coating is then applied.

Largest Artificial Lake

The reservoir formed by Boulder dam, named Lake Mead, is the world's largest artificial lake. It is 115 miles long and eight miles at the maximum width.

Crickets Ancient Game

The ancient English game of cricket was known in the Fourteenth century. The first rules were made in 1774.

Hidden Howitzers in Games

Men of First Battalion, 218th Field Artillery, cover a 155-mm. howitzer with camouflage, as 60,000 men participate in largest war games in the West, on California's huge Hunter Liggett Military Reservation near King City.

THIS WEEK IN DEFENSE

The President froze all funds and other assets in the U. S. of Germany, Italy and all invaded or occupied European countries and the State Department directed the German government to close all its consular establishments here not later than July 10.

The President said he froze German financial facilities here to prevent their use in way harmful to national defense. The state department said German consulates were ordered closed because their activities had become contrary to the welfare of this country.

The justice department instructed customs officials and immigration officers to prevent Germans from evading the order freezing German assets by leaving the country. The State Department ordered U. S. diplomatic officials "in certain countries in Europe" to deny American entry permits to persons likely to become agents here for foreign powers.

Sub-Contracting

Donald M. Nelson, OPM director of purchases, speaking in Pittsburgh, said the problem of plants faced with a shutdown because of shortages of materials for civilian goods can be met by the cooperation of local business, labor, government, civic groups and banks in seeking defense work.

"No manufacturer is likely to get many defense contracts unless he is willing to display the same ingenuity, persistence and energy in going after them that he would in seeking normal business," Mr. Nelson said.

Priorities

The OPM Priorities division announced establishment of regional offices throughout the country to advise businessmen on priority problems. Offices in Boston, New York, Philadelphia and Chicago were opened this week and others will be opened soon.

The rationing of rubber was announced to cut down the amount going into civilian consumption in the form of auto tires, inner tubes, boots, garden hose, shoes, and 30,000 other consumer items. The OPM said there is a sufficient supply of rubber on hand but it wished to build a large reserve.

Prices

OPACS Administrator Henderson announced he intends to hold bread prices "to the absolute minimum reflecting cost increases" and asked bakeries to consult with his office before raising prices. Mr. Henderson also stated rumors of ceiling prices for

scrap iron and steel have caused some hoarding and unless this practice stops the OPACS will take "vigorous action." The Department of Justice announced a federal grand jury in Chicago indicted 69 companies and individuals on charges of fixing prices in the pea canning industry. The department said the indictments were the first in a nation-wide investigation of food marketing and pricing.

The President, in a memorandum to OPM Directors Knudsen and Hillman, stated that "industry must take the initiative in opening the doors of employment to all loyal and qualified workers regardless of race, national origin, religion or color . . . Our government cannot countenance continued discrimination in defense production."

The OPM Labor Division announced a two-year agreement by the Gulf shipbuilding industry to provide wage increases, a standard base rate of \$1.07 an hour for skilled mechanics; time and a half for overtime; double time on holidays; adjustment of wages at specified periods according to living costs; and no strikes and no lockouts. The OPM has also submitted a similar agreement to 55 Atlantic shipyards.

Agriculture Secretary Wickard issued a statement that "to date we have been able to buy only half the amount of cheese we wanted by the end of June (for lend-lease activities) and less than two-thirds of the amount of evaporated milk. The output has increased but we need more." Mr. Wickard said increased prices for milk going into cheese and evaporated milk, supported by government purchases, should yield farmers a higher return than any other dairy product.

Speaking at Syracuse, N. Y., Mr. Wickard said the food situation in Europe is such that if the war continues for a long time the issue may finally be "who can feed the people, the democracies or the dictatorships? Therefore food reserves may be more important than munitions reserves."

President Roosevelt placed all petroleum products under export licensing control. Defense petroleum Coordinator Ickes, working to overcome the shortage of oil on the east coast due to shortage of transport facilities, requested oil shippers not to sell petroleum products for foreign shipment

without consultation with him. He also ordered customs officials to halt the shipment of 240,000 gallons of oil from Philadelphia to Japan in order to conserve oil in that area.

The maritime commission announced no American owned or controlled tankers are carrying oil to Germany, Italy or Japan. Price and Civilian Supply Administrator Henderson asked petroleum refiners not to raise prices without prior consultation with his office.

The census bureau reported that if the 30,000,000 American motorists would reduce their driving speed 20 percent, the annual saving in gasoline consumption would amount to 4,600,000,000 gallons.

Assistant Secretary of War Lovett, in a radio address, said "within a year we shall be geared to turn out 50,000 planes a year for as long as the emergency lasts." Mr. Lovett said the Air Corps is increasing the number of pilots in training from 12,000 to 30,000 a year and the number of mechanics from 45,000 to more than 100,000. He said the Air Corps is already nearly one-fourth of the entire army and only the infantry is larger.

The war department announced trainees will be permitted to volunteer as parachute troops. Heretofore, only regular army soldiers were chosen. The department authorized construction of field houses at 25 army posts to provide facilities for basketball, boxing and wrestling, and other indoor sports. Each field house will accommodate between 2,750 and 3,750 spectators and cost approximately \$77,000 each.

The student body at University of Utah has set aside a quarter-block-long stretch of the main campus sidewalk as "hello walk." Students are supposed to greet each other, regardless of acquaintances, as they pass on the walk.

South Africa is the world's greatest producer of gold, the United States second, Canada third.

There are 300,000 square miles of tropical forests in French Equatorial Africa.

THE LOW DOWN FROM HICKORY GROVE

In our U. S. A. we manage to keep in a lather—winter and summer. A few years ago they stirred us up by saying the country was bogged down on account everything was over-built—too many factories and too many everything. Now there is too little of everything, and persons like Mr. Norris from out there in Nebraska, they are saying the government has gotta get busy and build—build everything—factories power-houses, etc., etc.

But if you stop now to inquire about why we were lulled into a state where we figured we were over-equipped, instead of unprepared, you are a traitor or most any name they can think up as a slogan to shame you. But we gotta play ball now with the ones who lulled us—or we will all wake up as a dead pigeon.

But we can do one thing from now on, we can keep one eye peeled and one ear to the ground

while we are bending our back at the oar.

If we let socialism sneak in the back door, we got nothing on Germany, or vice versa—and can call off the war, before the shoot-in starts.

Yours with the low down,
JO SERRA

31 Blossoms on Stalk

In her garden, Mrs. Oscar Kummer of Seattle has lilies growing which have produced 31 blossoms all on one stalk which is four feet tall. The flowers are all clustered at the top, jostling each other gently but firmly, for a share of the sunlight. The lily has attracted considerable attention.

Few Good Drivers

Only one person in about 500 may be regarded as a really good driver, according to the director of the California State Department of Motor Vehicles. In short, a good driver is almost as hard to find as a place to park.

New 'Life Saver' for Premature Babies

FORD ENGINEERS HELPED DEVELOP THIS PORTABLE INCUBATOR

Through the combined efforts of Ford Motor Company engineers and Henry Ford Hospital officials at Detroit, a new-low-cost portable baby incubator has been developed after 12 years.

Small and easy to handle, this "pigmy" life-saving outfit is expected to bring about a sharp reduction in the high infant mortality rate in rural areas. The portable incubator can be moved easily into isolated homes to help save the lives of premature babies. Physicians all over the nation are looking with interest on the new unit because—compared to bulky incubators usually available only in large hospitals—it is small enough to be transported quickly in any emergency to isolated rural districts.

The outfit (shown above) is hardly larger than a clothes basket and fits easily on an automobile seat. It works when plugged into an ordinary light socket and can be set upon a kitchen table.

As a life saver for premature babies, this compact unit has been remarkably successful in Michigan. Twenty of the tiny incubators are strategically located in communities not able to purchase the larger ones and in sections not served by hospitals. Results are attracting wide attention.

As soon as arrangements can be made with a hospital supply company, the units will be manufactured and marketed on a larger scale, a Ford official said. The price will be held as closely as possible to actual cost—approximately \$100.
