CHRISTIAN SCIENCE CHURCHES

"SPIRIT" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, August 9. The Golden Text was, "Where the Spirit of the Lord is, there is liberty" (II Cor. 3:17). Among the citations which comprised the Lesson-Sermon was the following from the Bible: "But as it is written, Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love him. But God hath revealed them unto us by his Spirit: for the Spirit searcheth all things, yea, the deep things of God" (I Cor. 2:9,10). The Lesson-Sermon also included the following correlative passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Spirit, God, has created all in and of Himself. Spirit never created matter. There is nothing in Spirit out of which matter could be made, for, as the Bible declares, without the Logos, the Aeon or Word of God, "was not anything made that was made." Spirit is the only substance, the invisible and indivisible infinite God" (p.335).

REAL ESTATE and AUTOMOBILE INSURANCE. Representative of E. A. Strout. Listings wanted. W. F. Burgess, Yoncalla, Oregon. 40-11c

A Week of the War

Admiral William D. Leahy, the President's Chief of Staff, in a radio broadcast August 9 marking the first anniversary of the Atlantic Charter, said "this war will probably be long. It will be the toughest, hardest, most merciless war we have ever fought. It calls for the united power of every American, in uniform and out of uniform, on the firing line and on the production line—I have no doubt of America's decision."

President Roosevelt, in a message read on the broadcast, said "great progress" has been made in the battle of production, but "in terms of what will be required to defeat our enemies we have only just begun to get into our stride." Elmer Davis, Director of the Office of War Information, said America's conversion job has largely been completed; emphasis now must be transferred from finished goods to raw materials from which they are made. "We will get them—by full use of existing facilities, and by tapping new, or marginal, or abandoned sources of supply. We will develop new processes, eliminate waste, and work for full salvage by every citizen," Mr. Davis said.

In a general review of the war situation, the Office of War Information said "the production of military planes fell slightly behind schedule, despite the fact that the U. S. made more planes than any other country in the world. The same was true of tanks, of most types of artillery, and of naval vessels, the OWI said. Because of enemy submarine activity, the Office said, it probably will be well into 1943 before we equal merchant shipping as of December 7, 1941."

The WPB announced inauguration of a nationwide inventory of used construction machinery to be made through WPB field offices in an effort to place an estimated 500,000 pieces of vitally needed construction equipment into use. A complete inventory of available equipment will be kept up to date at the regional offices for the information of war agencies and private contractors engaged in war work.

The War Front

The Navy announced "United States Naval and other forces have attacked enemy installations in the southeast part of the Solomon Islands in force and the attacks are continuing." Later the Navy said "considerable enemy resistance has been encountered and it is still too early to announce results or to estimate either our own or enemy losses." Gen. McArthur's headquarters in Australia reported August 10 that Allied planes from Australia were maintaining a 24-hour-a-day offensive over the entire invasion zone in support of the attack against the Solomon Islands. The Navy also reported U. S. Naval forces "bombed enemy ships and shore establishments at Kiska" in the Aleutians, simultaneously with the beginning of the attack on the Solomon Islands.

Maj. Gen. Clark, Commanding General of U. S. ground forces in Britain, said the U. S. army is sending "picked combat divisions" to Britain and "the sooner a second front could be opened the better." He said "obviously we are not here to sit on the defensive."

Subotage and Subversive Activities

The White House announced six of the eight Nazi saboteurs landed in this country by submarine were executed in the District of Columbia jail August 8. The sentences of the other two were commuted by the President to life and to 30 years imprisonment. "because of their assistance to the government of the United States in the apprehension and conviction of the others." The first ground air support command in New York City announced the discovery by Army fliers of ingeniously contrived markers, aimed directly at eastern airfields and airplane factories. The markers, invisible from the ground, were eradicated and the danger to the war bases averted, the announcement said. "Proper action" was taken against the persons who built the markers.

Transportation The WPB approved the proposal of Henry J. Kaiser, shipbuilder, to construct 500 70-ton cargo-car-

HONOR! WON IN TRACTOR PLOWING CONTEST

W. V. Swezey and Henry Pfennig Win Top Places in Semi-Finals

Prize winners and judges in Eugene district semi-final plowing contest sponsored by the National Farm Youth Foundation. Inset: W. V. Swezey, Springfield, Oregon, receives first place award from contest judge Harry E. Clark of the U. S. Dept. of Agriculture.

Success Assures Try for Large War Bond Prizes Tractor plowing skill of W. V. Swezey, Route 2, Springfield, Oregon, and Henry Pfennig, Route 6, Box 148, Salem, Oregon, won them first and second places respectively in the semi-finals plowing event of the local district of the National Farm Youth Foundation held Saturday near Eugene, Oregon.

These two clever youngsters will shortly compete in the finals in Portland, Oregon, for prizes in the form of War Bonds when they vie with winners of the other four semi-finals also held Saturday in towns of the Pacific Northwest. William Waldrip, Route 1, Box 235, Malin, Oregon, placed third. HARRY E. CLARK, U. S. Department of Agriculture, Eugene, Oregon. E. B. OLDFHAM, retired farmer, Eugene, Oregon. FRED A. RICE, retired farmer and business man, Eugene, Oregon. Semi-finals were also held at Gresham, Oregon, Tacoma and Spokane, Washington, and Nampa, Idaho.

The winners of these five semi-finals will compete August 17th for prizes of War Bonds as follows: 1st \$200.00; 2nd \$150.00; 3rd \$100.00; 4th \$50.00, and six prizes of \$25.00 each.

The splendid work and skill of the competitors were judged on straightness of opening furrows; neatness of back furrow; evenness of entering and leaving land at headland furrow; keeping furrow straight at each end of field; evenness of furrow slices; evenness of furrow depth; covering trash; straightness of furrow wall; neatness of dead furrow and finishing plowing job without undue loss of time. All work was handled by identical equipment consisting of a Ford Tractor with a two bottom 14-inch Ferguson Plow.

The National Farm Youth Foundation is sponsored by Harry Ferguson, Inc., with the active cooperation of Mr. Henry Ford and Mr. Elmer Ford through local distributors and dealers who sell Ford

traying planes, patterned after the flying boat "Mars" built for the Navy. The program is contingent, however, "upon our being able to do it without interfering with the present combat plane program," WPB Chairman Nelson said. Army Air Forces Commander Arnold said at present 21 per cent of all Army Air Forces multi-engine plane production is being devoted to transport planes, and the program calls for this proportion to be raised to 30 per cent in 1943.

The Office of Defense Transportation said approximately 4,000 school children who ride daily in 93,000 school buses will be affected by ODT's order to reorganize all school bus services. The plan calls for staggered bus schedules and denies special bus service for students who have less than two miles to walk to and from school (with certain exceptions) and where areas are serviced by public carrier routes.

Rationing

President Roosevelt set up a three-man committee, headed by Bernard M. Baruch, to study the entire synthetic rubber program. The President said the committee's finding will "form a basis for future action not only with respect to synthetic rubber, but also such matters as nationwide gas rationing and motor transportation." The OPA said it is planning a universal ration book to be put into the hands of every American, as part of its machinery to handle rationing of many commodities which do not require rationing at present. The Office of traveling salesmen will not be permitted more than a B ration book in addition to their A books.

Farm Labor Supply

Agriculture Secretary Wickard announced the Farm Security Administration and the U. S. Employment service will recruit additional workers for farmers in areas where there are seasonal shortages of labor. The workers will be recruited only after the farmer and the Employment Service have been unable to obtain workers locally. The workers must be paid the prevailing wage, to be determined by the Farm Security Administration, but in no case less than 30 cents an hour. If the workers come from a distance, farmers must pay transportation costs up to 200 miles and the FSA will pay for additional mileage. The workers must be properly housed and work guaranteed for at least three-fourths of the time they are in the area.

quantities of wool cloth which will call for most of the domestic wool clip now available.

Winding Watch A watch will run most uniformly if wound at regular intervals, preferably every morning. Then the main spring will exert its greatest power during the activities of the day and its lowest power at night when the watch is at rest.
