NAVY BIGGEST

American shipyards, working at high speed and doubling the size of the navy in a year, built 65 aircraft carriers of all types in 1943.

James Forrestal, undersecretary of the navy, disclosed this record figure on carrier production last week.

"The United States navy," Forrestal said, "now has in being forces which constitute the greatest sea and air striking power in history." No other nation on earth could have come within a fraction of last year's accomplishments in terms of time, quantity and quality.

"What shall we do with this power when the war is over?" he asked. "Shall we destroy it as we did a quarter of our combatant tonnage in 1922 and go back to bed for another 20 years?"

Start That Tax Headache Now

J. W. Maloney, Collector of Internal Revenue, announced Monday that he has begun to mail copies of the 1943 Individual Income and Victory Tax Return to the estimated 450,000 Federal income taxpayers in the District of Oregon.

Collector Maloney said: "Although these returns are not required by law to be filed until March 15th, I cannot urge too strongly that everyone prepare and file his return as early as possible.

"There are," he said, "two major points that are vital for every one to understand. First: many persons will owe a substantial tax and should start immediately to find out how much they will owe and to make plans for meeting the obligation. I must emphasize this as a simple matter of fairness to those taxpayers who may have overlooked this phase of the changeover to the pay-as-you-go system.

"Second, although many taxpayers will find that they are substantially paid up on their 1943 taxes—some of them, in fact, being entitled to refunds—it is necessary for them to file a return."

Collector Maloney explained that under the pay-as-you-go system, all current tax payments through withholding from wages or by means of payments on declarations of estimated tax are only approximate. Therefore, it is necessary to file a return at the close of the year to determine the exact amount of each person's tax liability and to determine whether he underpaid or overpaid his taxes. In instances where the current payments were less than the tax payable March 15th, remittance of the difference will be necessary at the time of filing the return. This amount cannot be paid in installments. In instances where the current payments were larger than the final tax, the taxpayer will be enabled to secure a refund merely by filing his return.

"Early preparation of returns will be advisable," Collector Maloney said, to serve as a guide to the thousands of taxpayers who will have substantial payments to make and need to know how much the taxes will be so that they can make advance preparations to pay these taxes.

Substantial payments will be necessary in certain instances, because (a) most individuals who had a 1942 tax must pay at least one-half of the unforgiven portion of that tax in addition to their 1943 tax; and (b) during the first six months of 1943 only the Victory Tax, but not the Income Tax, was withheld from wages.

Dressing Sheep

About all one requires in the way of equipment for dressing a sheep is a clean place to work, a sharp knife and facilities for hanging the animal. The use of a small table for sticking helps to keep the pelt clean.

Here's 18 More Bullets for Jimmy to Use!

Jimmy's "Mom" has never seen a 50-calibre machine gun bullet, would hesitate to touch one. But her boy has gone to war. He and his buddies need such things, and used-up kitchen fats supply glycerine to make them. So she saves every drop, and turns it in the day the can is filled. She has never let Jimmy down and never will. Though thoughts of what may happen disturb her she wastes no time in vain self-pity.

She doesn't like war but realizes that tyrants must be crushed. In the good American spirit that built this land, she's in the fight beside her boy—and yours—not just saving fat and paper but helping in every other way she can. She, and millions like her, are speeding Victory for the forces of freedom and decency. She's a Citizen Soldier!

Let's All Be CITIZEN SOLDIERS

A pound of kitchen fats supplies glycerine enough for the powder in 18 50-calibre machine gun shells. Three weeks after you turn in your fat, that ammunition will be on its way to the battle fronts. It's one way every household can back up our armed forces. There are dozens of other ways equally essential in which individuals can be Citizen Soldiers, as blood donors, nurse's

aides, Red Cross workers, volunteers in Civilian Defense, Canteen workers, Post Security Force, conservation, salvage, harvesting, victory shifts in war plants. The most we can do is the least we should do for our fighting forces. Enlist, as a Citizen Soldier.

War Needs are Growing

Requirements of petroleum products for war are still increasing, particularly in the West. The quantity and quality left available for civilian use face further reductions, which we know that you will understand and gladly accept, for Victory. We, of Tide Water Associated Oil Company, look forward to the day when we may serve you even better than we did before the war... in the meantime we are still increasing war production of 100-octane gasoline, and fuels and lubricants for the Army, Navy, essential war industries and agriculture.
