Use Tub for Window Screens

Apartment dwellers who want to give window screens a thorough cleaning before storing them will find the bathtub useful. Spread a discarded sheet or other large cloth on the bottom of the tub, covering all but the drain. Taking one screen at a time, pour a pail of sudsy water over the screen. Scrub until snot and dirt are removed. Then tilt the shower at an angle when it will rinse the screen. Let the screens dry thoroughly before sending them to the basement storeroom.

MORE RAISINS AND LESS CHEESE

An additional 54 million pounds of raisins from the 1943 pack is being released for U. S. civilian use by WFA. This action makes 236 million pounds of raisins released to civilians from the 1943 pack. Cheese supplies in 1944 will be divided so as to make available for civilians about four pounds per capita, or one pound less than they received during 1943. About five million more pounds of cheese have been allocated to U. S. servicemen than they used last year, an increase mainly to provide milk nutrients for the larger number of soldiers overseas.
