

### Soldiers Vote Bill Becomes Law

President Roosevelt notified congress Friday he was letting the service vote bill become law without his signature even though he considered it "wholly inadequate" in providing men and women an opportunity to ballot.

The chief executive sent a message to capitol hill announcing his intention to let the controverted measure become law at midnight tonight.

In it, he appealed to the states to cooperate in making the bill as "fully effective as its defective provisions will allow."

The measure would let service men and women overseas vote with federal ballots but only if they had applied for state ballots by September 1 and did not receive them by October 1. In addition, the governors of their states would have to certify that the ballots were authorized by state law.

### Bank Money Orders Still Same Rate

The cost of bank money orders has not increased despite the increased cost as applied to postal money-orders by the new revenue act, according to H. E. Eakin, vice president of the First National Bank of Cottage Grove.

Because there have been numerous inquiries regarding the rates, Mr. Eakin called attention to the difference. "The cost of our bank money orders remains the same as before—ten cents for any amount up to \$100. Postal money orders now vary in cost from ten cents for a \$2.50 order to thirty-seven cents for a \$100 order. This is an increase in cost of postal money orders from 66% to 75%," stated Eakin.

Bank money orders may be issued in any amount up to \$100 and cashier's checks and bank drafts for any amounts desired. The maximum amount any postal money order may be issued for is \$100.

**Outdoor Storage**  
The most satisfactory outdoor storage is a tight wooden barrel or steel drum, which gardeners may get from a junk yard. The barrel or drum may be buried on its side with a heavy cover of dirt, or it may be set into the ground upright with an inch or two protruding above ground, to be covered by a rat-proof cover, and layers of hay or straw and soil.

**Watering Boosts Yield**  
It has been shown that watering cows twice daily produces 37 percent more milk than watering once a day. One hundred heavy laying hens will drink 10 tons of water in a year. A laying pullet has been observed dipping her beak in a pan of water 57 consecutive times after breakfast. And it takes 550 pounds of water to produce 100 pounds of pork.

### Lorane Boy in Critical Condition as Result of Accidental Shot

Wayne Shortridge, 9 year old son of Mr. and Mrs. H. C. Shortridge of the Lorane community was in a critical condition yesterday in a Eugene hospital suffering from a wound inflicted by a 22 rifle Sunday. The shot said to have been accidental was fired by a playmate Donald Wise as the group of boys were playing sail-or. The rifle ball entered the stomach and perforated the intestines of the stricken boy, necessitating an operation.

Juvenile officers spent sometime yesterday investigating several angles of the case and testimony from four boys was heard before Al Dietz, juvenile officer.

While the condition of young Shortridge was critical, he was said to be holding his own.

**TRAPS STILL ONLY SURE WAY OF KILLING MOLES**  
Trapping is still the only successful method of destroying moles, despite repeated attempts to develop effective poison baits, declares Ira N. Gabrielson, director of the Fish and Wildlife service of the United States, in a bulletin just published by the O. S. C. Extension service.

The bulletin, No. 629, is the latest edition of one written years ago by Gabrielson when he was a member of what was then the Biological survey here in Oregon. The revised bulletin covers the control of 17 different rodents and other small animal pests found in this state.

The reason moles cannot be consistently poisoned is that they live chiefly on earth worms, insects and other live animal forms. Trapping has one advantage, however, says the author, in that the skins, if properly prepared, will bring enough to pay for the time and trouble of catching the animals.

Full directions for trapping moles are given in the bulletin, as are control methods for many

types of squirrels, rabbits, gophers, mice, rats and porcupines. fully screened before permission is given to relocate.

**EVACUEES ON LEAVE**  
More than 19,000 of the 112,000 people of Japanese ancestry evacuated to relocation centers from the west coast two years ago have been granted indefinite leave to establish homes outside the centers, the War Relocation Authority announced. Between 2,000 and 3,000 others are on seasonal leave, mainly as farm workers. Fully two thirds of the evacuees on leave were born in America, and 72 percent have never seen Japan. Both citizens and aliens are care-

## What Is a War Occupation?

Once, years ago, war was practically limited to fighting men. Today, it is almost impossible to isolate any work that is not, somehow, connected with war. Not only in civilian life, but in the Army, Navy, and other branches of the service, the humble stenographer and typist is indispensable to the business of war.

It is odd to think of fighting with typewriters, but it is also hard for many to realize that wars are won with eyesight, in addition to foresight and bombsights.

Men and women, who, otherwise, could not do the work required of them are now being adapted to the exacting requirements of discriminative seeing by professional Optometrists. Many men, previously rejected for military service in flying corps, Army and Navy, have been rehabilitated by Optometrists and accepted. Once that eyesight was unsatisfactory—now it is acceptable. Optometrists are doing their important share of war work and if stenography is a war occupation, so is Optometry.
