

Bracken, Hutton Star in Comedy

Film fans have more than one surprise in store for them when they see Paramount's hilarious comedy, "The Miracle of Morgan's Creek," which opens at the Arcade Theatre June 28th with Eddie Bracken and Betty Hutton in starring roles. The picture is full of amazing situations and story twists, all of them more laugh-provoking than any movie comedy offering in recent months.

Don't be misled into believing this is a musical because of the presence of Bracken and Betty Hutton; it's a straight comedy to pull at your heart strings even while you're holding your sides laughing. The story tells of the problem of a small-town girl, Betty, who in the excitement and inebriation of a dance thrown for soldiers, marries one of them. As right names were not given at the wedding ceremony, Betty can't find her husband when she needs him most.

How she solves her dilemma, with the help of the adoring Bracken, and what the "miracle" is will provide film fans with the best movie fun they've ever experienced.

Delight Valley

Graduation exercises were held Thursday night at the grade school for the following graduates: Patricia Schrader, John Dunlevy, Lloyd Meyers, Robert Crick and Ashley Flaten. Dr. Hagen of Cottage Grove was guest speaker.

Those from this district graduating at the Cottage Grove Union High school were Ralph Davidson, Alice Dunlevy and Esther Hansen.

Mrs. I. Witmer of Los Angeles, is visiting at the home of her niece Oscar Flaten.

Visitors Sunday afternoon at the Charles Conner home were Mr. and Mrs. Harvey Huff and children of Salem, and Mr. and Mrs. Omer Huff of Lebanon. Sunday evening dinner guests at the Conner home were Mr. and Mrs. R. G. Conner and two children of Lorane.

Mr. and Mrs. Haserot, recently of Los Angeles are moving on to the place they bought from Mr. and Mrs. G. B. Smith. The Smiths have bought a store at Alsea, and are moving there.

Dale Sears of Bradwood is staying at the home of his grandparents, Mr. and Mrs. Ernest Sears.

Sight Destroyers

Syphilis and gonorrhea are among the major destroyers of sight, and these diseases are responsible for more than 15 per cent of blindness in the United States.

Divide

Mrs. Anna Burkett is having her house painted. Messrs. Pynch and Powers are doing the work.

Alan Reed called his parents Mr. and Mrs. H. M. Reed from Lincoln, Nebraska last week. He recently was transferred there from Alexandria, La.

Mr. and Mrs. Frank McGarvin entertained at a farewell dinner Sunday for Lyle Mullica who left Monday morning for Portland for induction into the army. Present were Mr. and Mrs. Lyle Mullica and son Dale, Mr. and Mrs. Amos McGarvin and children, Charlie Burge of Albany, Mrs. Lena Hardin of Portland, Frank Mullica of Sutherlin, Marjory McGarvin and daughter Joanne of Bend and Mr. and Mrs. Will Norris of Cottage Grove.

Mr. and Mrs. Harry McDole received word from their son Corporal Ralph McDole that he has been transferred from Pomona, California to Jackson, Mississippi.

Mr. and Mrs. Frank Guggisberg and children of Lebanon visited Sunday with Mr. and Mrs. Pete Mostachetti and Mr. and Mrs. Harry McDole.

Nina Chapman and Ronald Dean Kenady were among the 8th grade graduates at the Latham school last week.

Mr. and Mrs. Ernest McReynolds spent Sunday with Mr. and Mrs. Bob Powell of Mt. View.

THREE LOCAL RESIDENTS TO GRADUATE

UNIVERSITY OF OREGON.—Three residents of Cottage Grove are among the 350 candidates for degrees at the 67th annual commencement of the University of Oregon, to be held June 4, in McArthur court.

James Frederick Blicke is applying for a bachelor of arts in biology; William Henry Earl, for a bachelor of science in biology; and Lois Elaine Baldwin, for a bachelor of education.

William Henry Earl, for a bachelor of science in biology; and Lois Elaine Baldwin, for a bachelor of education.

The commencement address Sunday evening will be delivered by Orlando John Hollis, acting president of the university, who will speak on "Our Frontiers." The baccalaureate address Sunday morning will be given by Dr. Paul S. Wright, pastor of the First Presbyterian church of Portland, whose topic will be "Freedom Through Knowledge of the Truth."

Need Lime

The need for lime and fertilizer becomes greater the longer lespedeza is grown on a farm, due to the depletion of the soil's natural supply of plant nutrients by removal of the hay. For this reason it pays to fertilize lespedeza on lands where formerly it did not.

Grain Stocks Are Lower This Year, Estimates Reveal

Additional information on grain stocks confirms earlier indications of probable reduced supplies in the United States for the 1944-45 livestock feeding season, the agricultural economics section of the O. S. C. Extension service reports. The supply will depend also upon production in 1944, which is uncertain owing partly to delayed planting operations in much of the country.

United States stocks of corn, oats, and barley by next July 1 are expected to be down to 18 to 20 million tons, about two-thirds of the amount on hand July 1, 1943, according to current data from the U. S. department of agriculture. The wheat carryover is expected to be around 300 million bushels, or less than half of the 1943 carryover.

Grain stocks in Canada are smaller than a year ago, also, by around 400 million bushels of wheat, oats, and barley on the first of April. Already well in excess of 200 million bushels of Canadian grain have been imported into this country since last August.

United States production of winter wheat in 1944 was estimated on May 1 at 662 million bushels, nearly 130 million above 1943 and over 90 million above average. The rye crop is expected to be near 30 million bushels, but planting of about half of the oats acreage has been interfered with by excessive rainfall so that acreage and production may fall below last year in the country as a whole. Some of the oats land will be planted to corn and other crops which can be planted in the spring.

LUMBER PRICE SPECIALIST APPOINTED

Frank Bennett of Eugene has been appointed price specialist in the lumber division, McDannell Brown, district OPA director, announced today. Bennett will assist Louis Gervais, OPA lumber price specialist, in the interpretation of regulations to the industry.

Bennett was formerly transportation officer with the U. S. Army at Port Edward, Alaska, in charge of moving essential lumber materials. From 1939 to 1942 he was on the Interior Department staff in Yakima in charge of lumber materials for construction of power lines in Eastern Washington.

Fertilizer Storage

When the fertilizer arrives it should be stored in a dry place and it is best not to pile the bags in too high a stack.

When we say you can't buy a finer loaf of bread we really mean it. Doleman's bread is made with the same high grade ingredients that you use in your own home. Such popular items as Crown and Fisher flours, Snowdrift shortening, Spreckel's sugar, Leslie salt, and many others are to be found in our stock just as they are in your own kitchen. It takes the best ingredients, blended properly to make a good loaf of bread, plus correct processing, and efficient, experienced bakers. All of these qualities are to be found in the manufacturing of DOLEMAN'S ENRICHED TENDER CRUST BREAD. That's why we say "you can't buy a finer loaf of bread." Try a loaf and convince yourself.

Doleman's
Bakers of Fine Bread

Weight Affects Laying

Heavier hens generally lay more and larger eggs than the lighter birds do, according to Penn State poultry specialists. Leghorns over 3 1/2 pounds lay best and Barred Rocks of 5 1/2 to 7 1/2 pounds do better than their lighter sisters.

Take Care of Colt

The first winter of a colt's life is a critical period. Livestock specialists say he should be started right by giving him special care.

Wet Soap

Avoid letting any bar or cake of soap stand in a wet soap-dish. This causes the soap to become soft and melt away. Paying careful attention to these and other wartime economies in soap use is one more way in which the American housewife and her family can help the war effort toward a quicker ultimate victory.

Forest Area

The southern states as a group lead in forest area.

Steel Statistics

Statistics of pig iron production date back to 1854, when the first published figure showed 736,218 tons produced, a small fraction of 1943's production of over 61,000,000 tons. It was not until 1865 that steel ingot production statistics began to be reported. Before then, steel was a minor item compared with the production of wrought iron. In 1865, only 13,262 tons of steel were reported. The expected output in 1943 will be almost 6,000 times the 1865 tonnage.

Can Scientifically

One of the resolutions that American housewives may well make this year is to put up food only by scientifically approved canning methods. Canning specialists say that for safety from spoilage, all such non-acid foods as meats and most vegetables, except tomatoes, must be canned under pressure. Now that pressure cookers are no longer rationed, no one should be tempted to take a chance on putting up foods by risky methods of canning.

SAFEWAY Homemakers' Guide

SAFEWAY TEA WEEK

Bringing you your favorite brands of the world's finest tea, at worthwhile savings. No better teas packed.

Anybody can brew a "GOOD" cup of tea

Place one level teaspoonful of tea for each cup into an earthenware or china pot which has been heated with a little hot water. Pour vigorously boiling water over the leaves. Allow it to brew for a full five minutes. Then pour off the liquor and discard the leaves. Sugar and milk or cream should be placed in the cup in that order before the tea is poured. The extra spoonful of tea "for the pot" can be saved as a wartime economy. With careful use one pound of tea will usually make 175-200 cups.

For iced tea the brew should be stronger to allow for the additional water from melting ice.
