TO USE

MAGIC BEADS

IN MAKING THE NEW SUPER 100-OCTANE AVIATION GASOLINE

The new, huge refinery of General Petroleum Corporation at Torrance is the first refinery in the world to use the amazing new synthetic catalyst known as "magic beads." Passing through these porous beads, the gasoline stock assumes octane and power values heretofore unknown. We call this new-type gasoline

Flying Horsepower!

As part of a vast 90-million-dollar program — the greatest catalytic cracking program in the world — the entire output of this new General Petroleum refinery equipment goes to our armed forces to enable our planes to go farther, climb higher and carry heavier bomb loads than ever before.

After victory these new magic beads will be producing "Flying Horsepower" for your car. You will get a new motoring thrill with flash getaway and dynamic power response. It's coming — in Mobilgas — at the Sign of the Flying Red Horse.

GENERAL PETROLEUM CORPORATION

*A catalyst is an agent that produces a chemical change while remaining unchanged itself.
