This is probably the first time you've ever seen War Bonds fishing

That man in the boat up there is Bill Brown. In about five minutes he's going to land the biggest bass in the world—well, almost the biggest.

The time is 1954. And even Mr. Brown doesn't know yet about the big one he's going to land. But Bill is working hard today—in 1944—saving money—and buying War Bonds and still more War Bonds. After all, the Browns have two boys in the Navy and as he says, "It's little enough that we do, but it's the best we know how."

The happy side of Mr. Brown's saving is that he's laying the ground work for a secure old age for his wife and himself. And according to Mr. Brown, "that means fishing."

1944 is a good year for saving money. Because of the war there is a shortage of purchasable material. Because of this shortage prices are higher and dollars can't buy as much as they probably will 10 years from now, say. If you will plan your saving now—work it out with pencil and

paper—your spending later will be more profitable to you and your family. And the best way to save now is to buy War Bonds. Another good way is to add regularly to your bank account so that you will have ready cash for emergencies. Your bank account may help you to hold your War Bonds straight through to profitable maturity.
