Cattle Federation Apply for Beef Output Payments

Cattle feeders in Lane county can now apply to the County AAA Office for beef cattle production payments under the government's new program to increase the production of meat.

Feeders are encouraged to feed more cattle, including those he purchases and those he raises, to Good and Choice grades under the new program. The method of payment is similar to the dairy payment program also handled through the County AAA Office, according to County AAA Chairman Ernest E. Schrenk.

The beef cattle production payment amounts to 50 cents per hundred-weight on Good or Choice cattle weighing 800 pounds or more and selling for at least the minimum stabilization price, which for sales in this county is \$14.95. The beef cattle production payment is available to all feeders, including slaughterers who also are feeders, provided their cattle meet the program requirements.

To be eligible, a feeder must certify on his application (1) that he owned the cattle at least 30 days before their sale, (2) that the cattle weighed at least 800 pounds when sold, (3) that the cattle brought not less than \$14.95, and (4) that the cattle were sold for slaughter to an authorized slaughterer.

An authorized slaughterer is any slaughterer who operates under Federal inspection or under an OPA permit at the time he slaughters the feeder cattle on which the payment has been made.

A feeder-slaughterer is eligible to receive payment provided payment had not previously been made on his cattle. He may also receive payment on cattle he raised provided they are eligible under the program. To collect the payment he must substantiate the date of purchase, the prices he paid, and the weight at the time of purchase. He must certify the grade and weight of the carcass after slaughter to further determine the eligibility of the cattle.

A feeder other than a feeder-slaughterer must present sales receipts, invoices, scale tickets, or other written evidence from the buyer to verify (1) date of sale, (2) the name of the buyer, (3) the point of sale, (4) the number of head, (5) the total liveweight, (6) the price received, and (7) the name of the legally authorized slaughterer to whom sold.

In addition, the feeder, if he did not raise the cattle, must show the status of the cattle at the time he purchased them by furnishing the name of the person from whom purchased, and the date of purchase. The feeder may also be required to furnish evidence that the payment had not been made previously on these cattle.

GERM KILLING LIGHTS DISPLAYED

Hodgers Electric and Radio shop at 505 Main street have on display new germ-killing lamps, which have not been available heretofore. The lamp endorsed by physicians and others is not a cure but a preventative. The lamp hung so that the rays are directed toward the ceiling and reflected and is operated on the theory that its ultra violet rays destroys the suspended germs the cause of the common cold and other contagious diseases.

The lamps are not expensive, costing less than the fluorescent lamp of today.

SHELL ALLOCATES \$16,000 FOR SOUTH LANE DISTRICT
Community War Loan quotas throughout the western states will share in the \$15,000,000 Seventh War Loan Drive bond purchase of Shell Oil Company, Incorporated, Pacific Coast Territory, it was announced last week.

This sum is the same as that representing war bond purchase by the oil company in the Sixth War Loan, which was nearly twice the amount bought in any previous drive, Shell officials said.

The \$15,000,000 is in addition to the individual bond quota set for Shell's 8,000 employees in the west.

\$16,000.00 has been allotted to the Cottage Grove quota, states E. R. Husted, local manager.

Lumber Manufacturing
The lumber manufacturing industry is made up of 38,035 individual units. Several of the larger manufacturing concerns have their own research laboratories and have contributed greatly toward the solution of waste use problems, but the remainder of the mills are so small in size that they cannot undertake much, if anything, in the way of research.

The president said that he would name a new secretary of state when he gets back to Washington, probably next Monday or Tuesday.

MEATIER CHICKEN BECOMES GOAL OF POULTRY LEADERS

CHICAGO—America's two-billion dollar poultry industry was challenged today by 14 of its national leaders to produce a fast growing, better meat-type chicken to help retain the markets poultrymen have won during the current meat shortage.

A 48-state contest to develop a broad-breasted chicken—comparable to the popular broad-breasted turkey—was announced by the group, according to D. D. Slade, secretary, International Baby Chick association, Lexington, Kentucky, who was elected chair-

man of a supervisory committee to formulate plans for the contest.

The contest will last three years and will bring a \$5,000 cash prize to the poultryman breeding the best bird. Annual progress awards will total \$3,000.

Towel Hems
When buying towels examine the hems for a clue to their worth. Hems should be turned back carefully and sewed with fine stitches. Corners should be neatly backstitched.

PHONE 89

Every Person in the Wood Industry should read this message!

WILL I BE OUT OF A JOB ?

NO!

The Answer is NO!

And Here Is Why:

- 1 There is no reconversion problem in this industry. Production will instantly shift from war to peace.
- 2 There is a big civilian demand for lumber and wood pulp. During the war practically all wood production has gone to war. There are 23,000 lumber dealers, and if you have tried to build anything lately, you know their bins are empty.
- 3 Some experts say that this country will build 12,000,000 new homes in 10 years after the war, starting just as soon as help and materials are available. People have saved the money to do it.
- 4 Private forest management is growing trees for the future. Science has means of utilizing former wood wastes. Laminations, pulp products, plywoods, alcohol—a long list of advances spells better utilization of wood. And that means more jobs. The Scandinavian countries are now cutting their 4th and 5th crops of timber. We still have many years to go on our first crop, and millions of acres are growing new trees.
- 5 To the man of ambition, the Pacific Northwest offers unusual opportunity. It is a growing country.
