Did you ever have a TOOTHACHE all over?

● To be wounded in action—and to be waiting for what seems years for the medic to come up—feels like having a toothache all over, say some of our wounded men.

That's why part of every American fighting man's equipment is a "syrette."

A "syrette" is a tiny hypodermic with the merciful power to relieve pain and shock.

The point is this: It takes tin to make a "syrette"—and the Japs still hold 90% of America's regular source of tin supply.

But there's enough pure tin in just 2 ordinary tin cans to make one "syrette."

So, when you save and prepare your tin cans for salvage, you're helping to boost the production of "syrettes," as well as other war-needed equipment.

Remember... TIN is a "precious metal" that goes to war in hundreds of ways. TIN helps make protective containers for blood plasma, medicines, foods. TIN goes into every field telephone and radio, into every cannon, machine gun, and hand grenade. Practically everything that rolls, flies, fights, or that feeds, heals, or saves our men—needs TIN! And America's only "tin mines" are in your kitchen!

Get your tin cans and waste paper ready for the Drive Sunday, July 22nd.
