Get this New Motor Oil that resists Oxidation

A development of wartime research that's good news for cars of all ages

PREVENTING OXIDATION of motor oil became a major military objective of U. S. scientists early in the war because sludge is not only useless as a lubricant, but dangerous. It gums up friction surfaces... keeps even good oil from getting in where it's needed... leads to mechanical breakdown.

Research discovered a way to retard oxidation and military vehicles got a new lease on life. Now this discovery is available to you in new Golden Shell motor oil with oxidation inhibitor. The inhibitor, added during manufacture, keeps your Golden Shell free-flowing and efficient from one drain to the next.

Whether your car is a highway veteran, or practically new, it deserves the best oil you can find. And this new Golden Shell is the best Golden Shell ever sold. It's ready now—wherever you see a Shell pump. Shell Oil Company, Incorporated.
