Find Jade in Mexico

Imperial jade, most precious of all ornamental minerals, hitherto found in small amounts only in far-off Burma, exists also in the dense jungles of the mountains of Chiapas in southern Mexico. Evidence of the existence of this super-precious stone in the Western hemisphere, where no real jade of any kind has ever been found, has been discovered in the course of six archaeological expeditions into the wilds of southern Mexico.

Grinding Vegetables
To avoid cutting the hands or fingers in grinding vegetables, meat or other foods, use a tamper instead of the hand to force the food into the hopper or the grinder.

Gambling Blacklist
By the late 1930s, the Monte Carlo casino was probably refusing admittance to more former patrons than any other gambling house in history, having an active blacklist of 8,000 who had passed a worthless check, picked a pocket, engaged in a brawl, attempted suicide or committed some other unpardonable offense.

Pare Pineapples
To pare pineapple easily, cut it into rings and peel each slice separately.

Retain Fish Flavor
To retain the flavor of fish when baking or frying, roll it in cornmeal, flour or fine cracker crumbs. This also helps retain moisture.
