HOME BUILDING today brings up many problems... Here are some interesting facts that may help answer your questions!

AMERICA HAS A TREMENDOUS SUPPLY OF TIMBER

There are ample timber resources in this country—more than enough to rebuild every home and farm building in America,—and more is growing. Timber is a crop. The nation has a permanent supply of lumber.

LUMBER SOON WILL BE AVAILABLE IN INCREASING SUPPLY

It is a terrific task to fill the extraordinary demands for new homes and replenish the war-depleted stocks of lumber. But for many months the mills have been shipping trainloads of lumber for home building, and production is increasing. We will get our share, and will fill your needs as rapidly as possible.

LUMBER IS THE MODERN BUILDING MATERIAL

Wood has stood the test of time, and has proved its worth as the enduring, flexible building material, adaptable to all architectural styles.

LUMBER IS A SMALL PART OF THE COST OF YOUR HOME

No matter what your budget, you can afford the charm and beauty of wood. The lumber bill for a modern 6-room all-wood home usually represents less than 1/5th its total cost.
