

### June Still Early Enough to Plant Gardens in Oregon

The first half of June is still plenty early to sow some of the main garden crops in case these are not already in and growing, reminds W. B. Parker, assistant county agent. The world famine situation is such that every pound of food raised in a home garden will not only insure better living for the gardener but will release that much commercial food for use elsewhere.

In some respects this has been a discouraging garden year in Oregon because of the wet early spring and the extremely dry late spring, but on soils that still have a good moisture supply or where irrigation is available, gardens planted now will still produce a good supply of staple vegetables, reminds Parker.

Here are some of the vegetables that can still be planted, with suggested dates in western Oregon; appropriate adjustment is needed for higher elevations:

**Tomatoes**—These can still be put out if good plants are available. Probably the most popular single garden crop, tomatoes are heavy producers and rich in vitamins.

**Peppers**—These like hot summer weather and will still do well.

**Celery**—A succession planting from the middle of June on is a good idea.

**Cauliflower**—Plants are usually set out the last half of June.

**Cabbage**—Plants for the late crop are set out the last half of June.

**Brussels Sprouts**—This vegetable, rich in minerals and vitamins, makes a good fall and winter crop when planted out the last half of June.

**Scotch Curled Kale**—Here is another crop set out in late June that provides greens more rich than spinach all winter in some parts of Oregon.

**Sweet Corn**—Plant in block plantings up to middle of June.

Emblematic of peace in a peace loving nation, and quietly reminding that dairying is America's greatest industry, the poster pictured above has been chosen as the symbol of June DAIRY MONTH for 1946. It's a familiar scene, as American as the Stars and Stripes. A herd of cows, peacefully grazing over green fields, cows that never heard the roar of hostile guns, that never saw the ravages of war. Such a scene, somehow, symbolizes the American love of peace, home, and good eating.

**Bush Beans**—Plenty of time for these to bear if planted in June.

**Carrots and Beets**—Both of these root crops will do well planted early in June.

**Winter Squash**—These will still mature if planted right away.

**Big Freight Haul**  
To have handled in a single shipment all army and lend-lease freight converging monthly on east coast ports prior to V-E Day would have required a train extending from New York to Muncie, Ind., or a distance of 766 miles.

### How and Where to Use DDT Told in Garden Circulars

Have you too been puzzled over which of the scores and scores of DDT concoctions now on the market to buy for garden, household or livestock use?

Then two experiment station circulars of information just issued at Oregon State college will help straighten out the matter.

One is "DDT Products and Precautions in Their Use," by R. H. Robinson, agricultural chemist, while the other is "Suggestions on the Use of DDT for Vegetable Garden Pest Control." Both are available free from county extension offices.

The first of these, after stating that there are now more than 150 different brands of DDT products on the Oregon market, explains the different forms and their best uses.

DDT products are now sold as wettable powders for sprays, dusts, DDT-in-oil products, and DDT aerosol bombs. All of these have their special uses and some may be used more or less interchangeably while others cannot.

The circular also stresses the fact that DDT is not in the category of deadly poisons such as must be labeled with skull and crossbones, but that simple precautions are necessary.

The other circular lists all the common garden vegetables with their principal pests and tells whether DDT will control them or not. Dusting powder of 3 per cent strength is the most useful in the garden, states the author, Dr. Don C. Mote, head of the entomology department. Five per cent strength is used for squash bugs and similar plant bugs.

DDT is particularly effective with the 11 spotted cucumber beetles, the circular shows, a pest heretofore resistant to nearly all insecticides. It is also good for most species of thrips, flea beetles, cabbage worms, squash bugs, carrot rust fly, pea weevil and some others. On many other pests experimental evidence is still lacking or inconclusive. Gardeners are cautioned not to use it on edible parts of vegetables.

**Holds Porch Mat**  
A piece of wire screen tacked under a porch mat helps to hold it in place.

**CRESWELL**  
A social gathering was held at the Christian church last Thursday evening as a farewell courtesy to Mr. and Mrs. Carroll McMickle and family. Sixty church members including Ronald Osborn, now pastor and family attended. A gift was presented Mr. and Mrs. McMickle and flowers to the new pastor and family.

The grange play, "Beads on a String," presented at the Grange hall June 5 and 6 netted about \$100.00.

Two were initiated into the Eastern Star Thursday evening Arthur Bullis and Mrs. Claudine Tillotson of Westfir.

Mrs. Frank Sly entertained at luncheon Thursday complimenting Mrs. C. L. Camp who plans to leave soon to make her home in Seattle.

Charles Blickenstaff left this week for Harrisburg where he will spend the summer on the L. Estergard farm. This is his third summer there.

Mrs. H. L. Stott underwent a major operation at the Rhoads-Lambert hospital in Eugene Friday morning.

Mrs. J. O. Alberson is under treatment at the Sacred Heart hospital in Eugene.

**Preserved Eggs**  
Preserved eggs are suitable not only for cooking and baking but also for table use.

**Bottled Milk**  
In 1873 a Mr. Alexander Campbell of Brooklyn, N. Y., used glass jars which were the forerunner of the present milk bottle. This type appeared in Philadelphia in 1885. The first bottle which resembled the modern type milk bottle was not patented until four years later.

## New Subscription Rates...

Beginning July 1st, 1946, an increase will be made in the price of Sentinel subscriptions. The increase is necessary to meet higher costs in labor and materials. Until that time new subscriptions or renewals will be accepted at the present rates.

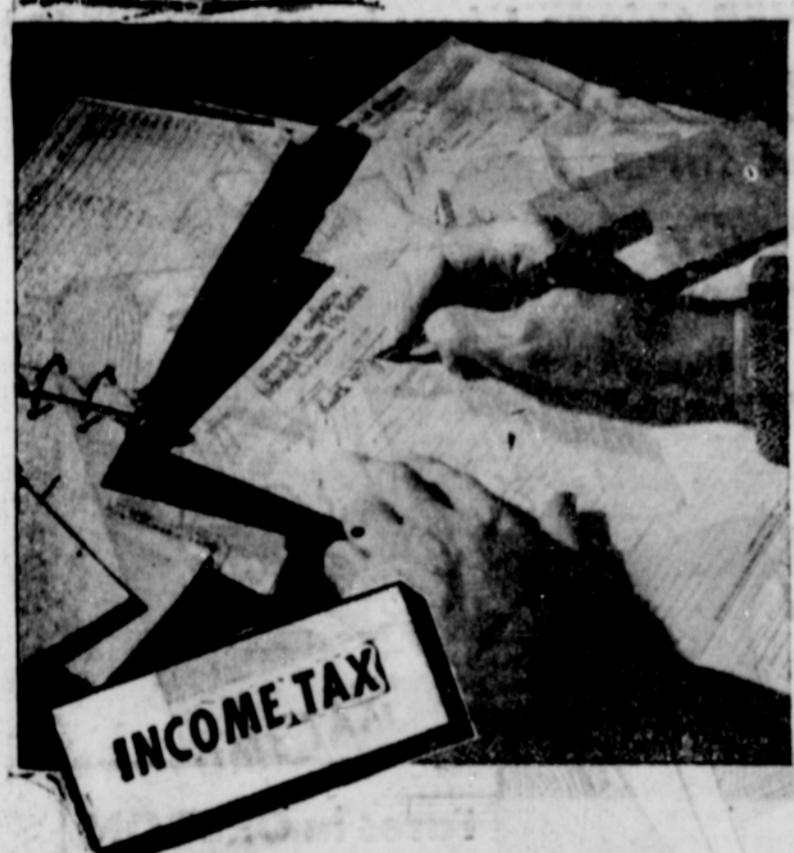

NEW RATES ARE: IN LANE AND DOUGLAS COUNTIES: \$2.50 PER YEAR, \$1.50 FOR 6 MONTHS. OUTSIDE THIS DISTRICT AND OUTSIDE OF THE STATE: 1 YEAR \$3.00, 6 MONTHS \$2.00.

Also after July 1st, the Sentinel will be enlarged to an eight column page paper, which will mean a bigger, better paper for you. Other improvements in the appearance of the paper are contemplated in the near future.

### Grangers Grow Social Crops that benefit all Oregonians

THE GRANGE labored for many years to have the graduated income tax enacted (in 1930) as an amendment to the State constitution.

**Reasons:** The Grange believes that taxes should be levied in direct proportion to ability to pay; that the major cost of government should not be borne by real property.

**Results:** Many millions of dollars have been saved farmers and others through direct relief from property taxes.

Projects of this nature are as vital a part of Grange activities as better agriculture itself. That is why 28,000 progressive farmers belong to the Oregon State Grange — why membership continues to grow — why the Grange is a dominant force for social progress.

Information about the purpose and accomplishments of the Oregon State Grange is contained in a booklet "Let's Look at the Record". Contact your local Grange for copy, or write direct.

## OREGON STATE GRANGE

1135 S. E. Salmon St., Portland 14, Oregon

72 years OF SERVICE TO OREGON FARMERS

### Unique Air Service

WASHINGTON—"The sky is the limit," is a phrase being proved extra true in aviation. The amazing progress of air transportation is vividly shown in the plans for broadening the scope of commercial operations as soon as the transition to peace-time conditions permits.

Delivery of new automobiles by huge glider trains of the sky is only one of the more striking enterprises for which applications are just waiting to be given the green light by the Civil Aeronautics Board. The list according to the Air Transport Association of America, includes:

- Flying ambulances and funeral planes.
  - Armored airships for safe dispatch of currency and valuables.
  - Big tank planes for shipment of gasoline and oil.
  - Bus and taxi service, using both helicopters and conventional models.
  - Deliveries of medicine, of food, and of department store merchandise.
  - Sightseeing specialists.
  - Fly-yourself systems.
  - Delivery of new or "used" airplanes to buyers or dealers.
- Many war veterans who have gained invaluable experience flying in the war are in the forefront of these projects. There are some whole groups which served together in battle and plan to stick together as partners in the airline business.

### JONES HELD RESPONSIBLE FOR \$75,000 FIRE

Harold Leroy Jones, 35, Cottage Grove, Oregon transient, Monday was held on an open charge in connection with a \$75,000 fire which destroyed 3,000,000 board feet of logs last Sunday night at the Ashland Lumber Co. mill at Ashland.

Police said Jones admitted he started a fire in the lumber yard "to get warm." Jones went to sleep, he told police.

Forest service fighters put out the flames before the mill, itself, was damaged.

### Sanitation Pays

Studies by the bureau of animal industry of the U. S. department of agriculture have shown that an average pig raised under the sanitation system weighs about 28 pounds more when four months old than a pig raised in an old hog lot.

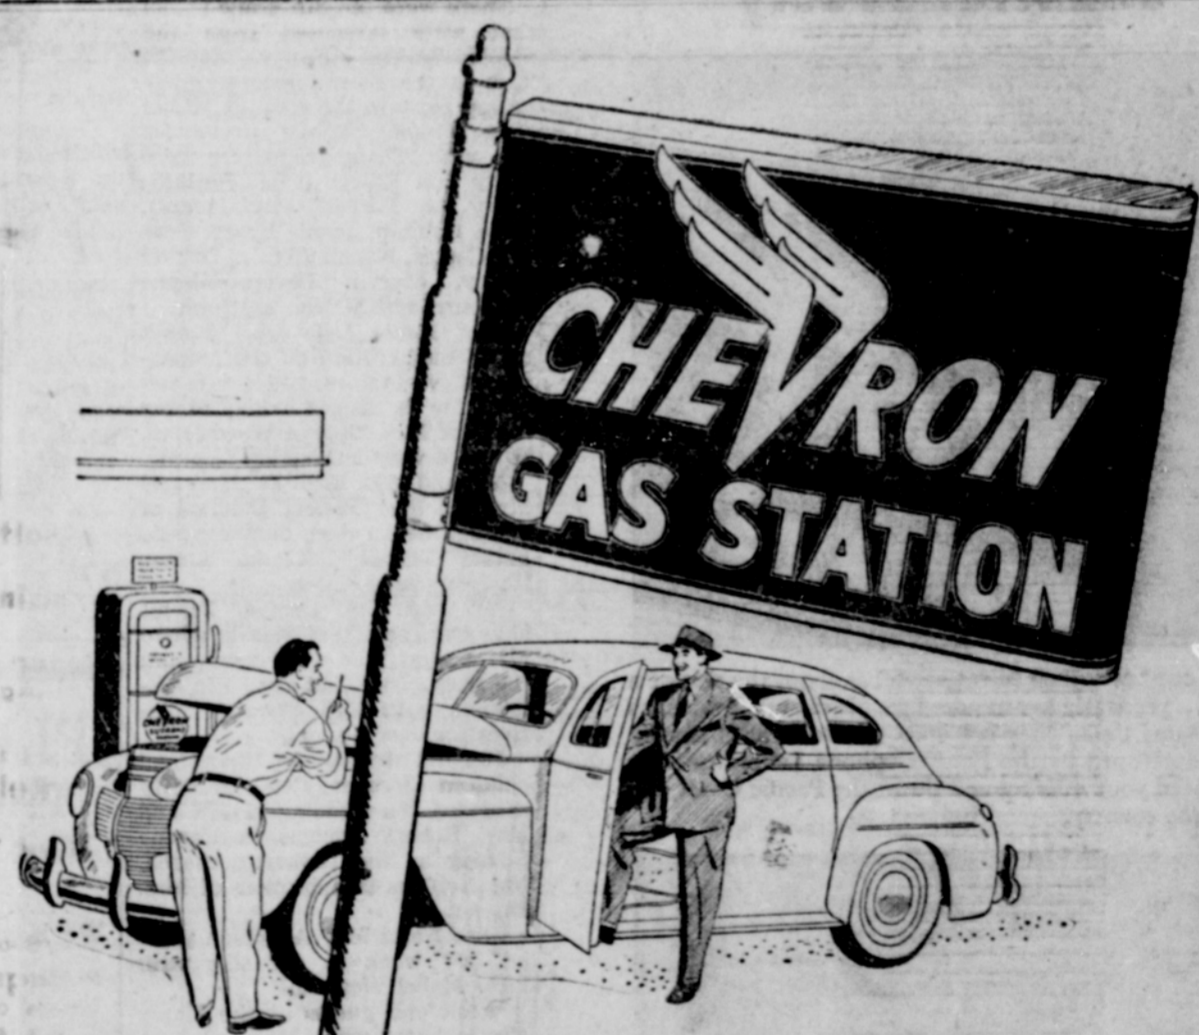

**Railroad Timetables**  
Railroads issue more than 80,000 timetables annually.

## FORCE'S MOLE KILLER

IN PELLET FORM

Positively Kills Moles. Money back guarantee. Compounded from the moles natural food. Used successfully for 30 years. For sale and recommended locally by

**Beidler's Feed and Seed Store**

## You get friendly, personal service at those new Chevron Gas Stations

Folks have always enjoyed the thoughtful, interested kind of service they receive at independent gas stations. But many people don't always know they are "home-owned." Well, as Chevron Gas Dealers, we're establishing our identity as independent businessmen in our community. That's the reason for the new Chevron Signs and the burgundy, cream and green paint jobs on our stations.

It's "only the best" for our customers—and that adds up to products like Chevron Supreme Gasoline and RPM Motor Oil. Our other services and accessories will be the same top grade, too. We'll be glad to honor Standard of California's Chevron National Credit Cards. If you haven't applied for a Credit Card, drop in any time and we'll see that you get an application.

REMEMBER...the same products, the same service, the same folks to serve you
