

Sure as shootin', if there's Old Man Dirt in your Diesel fuel, there's trouble ahead. Every drop of fuel goes through injector-nozzle holes small as a human hair. And if these injectors get dirt-worn, that does it, brother. Cuts the power of your Diesel and leads up to repair bills. Because it's all-important to use a CLEAN fuel, use Standard Diesel Fuel—distilled 100% for PURITY.

ST. MERE EGLISE CEMETERY NO. 2 in Normandy, France, shown above, is typical of 356 United States military cemeteries located throughout the world. Containing many of the men who gave their lives during the initial invasion of France in 1944, this cemetery, like those in other areas around the world, is landscaped so as to take advantage of the natural beauty of the surrounding countryside. U. S. military cemeteries are carefully tended by the Quartermaster Corps and are given the same attention and consideration as national cemeteries in the United States. Maintenance of these cemeteries and the care given to individual graves is done as a tribute to the gallant dead by the Government, without necessity for private contributions for their beautification.

Save Energy
Try to place everything within easy reach and avoid muscle wrenches and strains. When you must reach for something on a high shelf, you will save your energy if you will take time to get a footstool so that you won't have to stretch beyond your reach. Instead of carrying the basket of clothes when you hang them on the line, pull the basket around in your little boy's wagon, or use a laundry cart with wheels on it.

Dreams Aid Sleep
Although not always successful, dreams are devices for allaying disturbances which would interfere with sleep.

Disbanded Army
At the end of the Revolutionary war, congress ordered the disbandment of the entire army except 25 privates to guard the stores at Fort Pitt and 35 to guard the stores at West Point.
