Howdy Folks: Another proof that "all the world's a stage," appears in the fact that our bank roll has about as much purchasing power as stage money.

We're in a quandary. If we worry over currently high prices of food while we're eating, we get indigestion, and if we don't, we eat more than we can afford.

When we get indigestion, we sleep like a top, though. That is, we don't stop turning and twisting for hours.

Of course we're better off than the party who could not eat or sleep after his wife left him. She didn't leave him the price of a meal or a bed.

On the other hand, nothing bothers the Mrs. She sleeps like a log, but then she would.

Dark Shades
Dark green window shades shut out natural light and give a quality to what light is admitted that can neutralize a good color plan. Roll the shades to the top of the window during the day, or replace them with light tan or cream washable shades for a more cheerful appearance. Sharp green and blue porch ceilings reflect the same quality of light in rooms as green shades. Repaint ceilings light yellow, ivory, or bone white.

DO YOU HAVE A POST-NASAL DRIP?

The colds of the winter months frequently leave one with a persistent mucus discharge from the nose. This commonly takes the form of the very annoying post-nasal drip where the mucus comes down from the back of the nasal cavity into throat and chest, causing frequent coughing.

In your nose and sinus cavities nature has created a wonderful arrangement of cavities and air chambers, for the purpose of warming the air, straining out the "bugs" and dust and furnishing resonating chambers for the amplification of the voice.

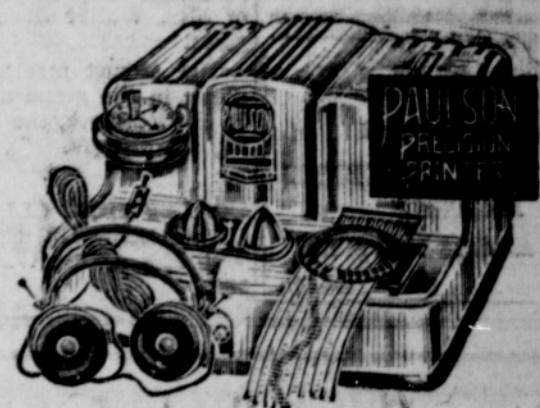

The causes of a post-nasal drip and sinusitis are the causes of a catarrhal inflammation of the mucous membrane lining the nose and sinus cavities. To bring about a correction of this, the inflammatory congestion of the mucous membranes must be removed.

How can this be done? Simply through a direct approach to the blood supply of these membranes via the nerve wires controlling it. This is accomplished by the chiropractor by his special procedure of adjusting the spinal column where the nerve supply originates.

Often, under Chiropractic care, the mucus discharge may become very profuse. This is a good reaction and lasts only for a short while. It is a prelude to recovery.

Thousands of sinus sufferers have had their condition eradicated through Chiropractic. Everyone suffering from a chronic nasal disorder should certainly give it a try!
