How Your Television "Commercial" Will Look

To enhance an impressive list of manufacturing "firsts," Chevrolet now engages in another pioneering venture as the first motor car manufacturer to sponsor a regular commercial television show. Admittedly an exploratory venture to evaluate the possibilities of television as an advertising medium, these broadcasts were the first employing live talent to be sponsored by any automobile producer. Four weekly shows were staged by Chevrolet and broadcast through the facilities of the American Broadcasting Company's television network. The shows were telecast at the Dumont Studios in New York for the three stations currently teamed in the ABC television network. Shown above is a scene from the second of the series, a half-hour program titled "Roads to Romance."

AIR CARGO

CHICAGO—The zooming growth of air cargo is seen in steps taken by the 19 domestic airlines of the United States to set up equipment and schedules that will raise their capacity in the immediate post-war years by five-fold over the 1944 level, according to a survey by the Air Transport Association of America.

The airlines last year carried 202,879,006 pounds of mail, express and excess baggage, whereas the use of added planes on order or option will provide cargo space sufficient to handle about one billion pounds of cargo, ranging from jewelry and drugs to perishable foodstuffs and machinery parts.

The expanded fleet of passenger planes will provide much additional cargo space, with some of them having compartments for mail and freight which can be made larger as any particular passenger load grows smaller. All-cargo planes of war-time types are increasing in numbers, to be supplemented very soon by planes designed exclusively for cargo carrying, with features which will greatly expedite the speed and economy of loading and unloading.

Meanwhile plans are underway for expanding present pick-up systems, which operate without landings. New methods are being studied by airlines and manufacturers.

Already a unit has been developed allowing a plane in flight to pick up a loaded glider from the ground, making peacetime routine of one of the war's most dramatic exploits.

The one who will be found in trial capable of great acts of love is ever the one who is always doing considerate small ones.—F. W. Robertson.

Where the motive to do right exists, and the majority of one's acts are right, we should avoid referring to past mistakes.—Mary Baker Eddy.

Poison Gas

Never operate a gasoline engine in a closed place unless the exhaust is piped out of doors. Open shed doors before starting the truck, car or tractor.

Low Income
While the population of all Latin American countries combined is almost as large as that of the United States, the combined income of these countries before 1939 was less than one-fourth of ours.

Rain Spurs Vegetables
Vegetables grow faster in rainy weather and use more fertilizer. So to guard against plant food being short in periods following rains, it's a good idea to add more fertilizer or manure for later crops.
