Today...busier than ever!

If you sometimes notice a delay before you hear the familiar "Number, please," or "Operator," it's because our switchboards, even at wartime peak, were never as busy as they are right now! Today we're serving more customers who are making more calls than ever before. Volume at times is so great that the operator cannot answer your call as quickly as she would like.

New equipment to take care of all waiting applicants and furnish better service than ever to all telephone users is being made and installed. But it's a big job...and will take time.

Our operators, meantime, are doing everything they possibly can to furnish you the prompt and courteous service you have been accustomed to. Thank you.
