RECREATIONAL POSSIBILITIES

Partly because of a short sighted policy and partly on account of the obstinacy of the state game and fish commission and a few sportsmen, we have to date overlooked one of the best recreational possibilities we have and this is providing more recreational facilities at the Cottage Grove lake and better fishing. Fishing that everybody can enjoy won't be provided as long as the game and fish commission hold to the policy of stocking the lake with trout only. As long as the game and fish commission holds to this point of view which provides sport for only a few as against a sport for a large number of people, we are overlooking a splendid opportunity of providing wholesome recreation for our young people. If the commission insists on stocking the lake with trout, the average fisherman may as well forget the lake exists.

We have heard the so called experts argue about the sort of fish to plant here and where to plant them, but we have never heard any of the experts explain why the fish in the Mosby Creek area are stunted and starved to death or why when plantings are made, the fish hatchery can only supply us with a trifle, as compared with plantings in a good many states. A stranger naturally assumes that this section ought to be a fisherman's paradise, with all the streams we have, until he finds out how the streams are managed.

If the Rod and Gun club wants popular support, this organization can get it by starting to carry out the program announced several years ago, in which it was stated that plans had been advanced for building a club house, possibly a boat house and by providing grounds for feeding wild fowl.

GIVE DOCTORS FREE HAND

The city ought to be as interested in easing the situation on our overworked doctors as the public in general. One way the doctors' worries could be eased is to forget the parking meters where the doctors usually park. Now the doctors have to park out of the meter district in order to avoid coming down at the one or two hour intervals and feeding the meters.

Give the doctors a free hand. Let them park near their office to care for emergency cases. Perhaps you never heard the story but one doctor made the trip from Cottage Grove to Row River in nine minutes. He could not do this under the present conditions, having to walk at least a block and take chances on getting out of a parking jam.

We need more doctors and this is one reason why we are pulling for a hospital. Don't take chances of running the ones we have out of town.

Definition we read of a mint julep: a depth bomb with a southern drawl.

One trouble in government might be that there are too many "Sacred Cows."

Sometimes it's hard to decide which is worse—living within an income or without one.

The end of a beautiful romance: When he doesn't trust her too far, and she doesn't trust him too near.

Did you hear about the boss who was told by an employee that two couldn't live on his salary, so the boss offered to help him get a divorce?

The man who was going to get a divorce because his wife hadn't spoken to him for three months, changed his mind; he decided that wives like that aren't easy to find.

You can all have a home over there by the Tree of Life—a home that you will like—that will last. Why not give God a little time to talk to you thru His Word? It won't be time lost.
