## Why Electric Power Supply Is Critical . . .

Because power deliveries from drought stricken California have been restricted and because at present no additional deliveries are available from the Northwest Power Pool.

## What Is Being Done to Get More Power

Work is being rushed on a connection whereby some Northwest Power Pool energy will become available. This will help. Larger wire and equipment are continually being installed to cut losses and make available all available power do its utmost. Even so there is little available power in the entire Northwest area and electricity should not be wasted.

## How YOU Can Do Your Part In Your Home!

1. Dust on light bulbs and lamp shades waste electricity that you pay for. Place lamps where they will do most good, and turn them off when you leave the room.
2. Avoid use of electric heaters. They will "eat up" electricity faster than any other appliance in your home.
3. Don't use oven to heat your kitchen. Use little water when steaming vegetables, and switch to low heat as soon as steaming starts.

# WHY NOT?

Why shouldn't I take advantage of the extra specials at Irish-Swartz? No, they aren't offered as bait to get me in the store. I know when I get there they'll have plenty left for me too. I certainly appreciate their policy of honest advertising. I don't have to worry about paying more than I should for well known merchandise either. My food buying isn't nearly the problem since I've been doing all my buying at
