The world's long-distance flight record of 11,230 miles set by the U. S. Navy's P2V Neptune in 1946, has not yet been challenged.

LET'S GET GOING!

Whenever anybody buys a farm, a hotel, a grocery store, or a house, he gets the EXCLUSIVE use of certain space, materials and equipment. Under FREE ENTERPRISE it cannot be managed any other way.

The average efficient sawmill in the Douglas Fir region cuts one acre, which is a year's growth on 250 acres of average forest land, every day. It needs the EXCLUSIVE timber supply from 50,000 acres to keep it going. If it cannot get logs enough, it shuts down. When it shuts down, the crew is out of work and the pay checks stop. The grocer and the landlord cannot collect their bills and the whole community suffers.

To prevent this sort of thing, Congress has passed laws providing for Cooperative Sustained Yield Units. The contracts take care of manner, time, and place of cutting timber, its utilization and manufacture, road location and use, recreation and water-sheds, amount of land and timber required to qualify.

If the private member of the partnership fails to carry out the contract, the courts can enjoin him. It's a tough contract and so far as can be seen, it keeps a high level of timber supply and continuously operating mills, thus insuring continued community prosperity.

What are we waiting for?
