Wedding Announcements and Invitations.—The Sentinel.

Your Community has a PLAN for Perpetual Forest Growth

One look at the map above and you have dots before your eyes. And you can easily see what a "pain-in-the-pocketbook" lumbering could be for operators in your county if they had to "jump" their operations from private land to private land by-passing the Oregon-California reversioned sections. Un-economical, expensive and not even plain horse sense!

But there is a sound plan of operation under the federal law that allows operators to utilize the timber on the reversioned (black) sections. By making a "cooperative agreement" with the Bureau of Land Management and combining their own private lands

under a cooperative unit they can operate profitably and permanently.

Naturally, there is a responsibility on the part of private operators in this contract. They must agree to "log" their own private land on a "sustained yield" basis, rotation of areas according to growth, reseeding and adequate protection.

This responsibility is a vital part of the PLAN to assure your community of perpetual forest growth, of economic lumber supply security. Furthermore, this is the essence of a plan that is now in operation to protect you — your job, your business or profession.

For complete information on your community's perpetual, protective timber plan, write...
