PONTIAC

A Product of General Motors

The great all purpose car!

Pontiac is the right car for so many people because it does all things—so unusually well.

If, for instance, you are concerned with economy—as most of us are—you will find that Pontiac is virtually as inexpensive to own and operate as any full size car you could buy.

If you like to tour and take long trips—you will find that Pontiac is one of the easiest-riding, nicest-handling cars ever built.

When you need to "put your best foot forward"

—go to a fashionable wedding or some other social event—you will find that your Pontiac looks "right at home."

And if you have to make hard daily trips over rough country roads—you will find that Pontiac can "take it" like the thoroughbred it is.

Truly, regardless of what you want a car to do, Pontiac provides a splendid answer to your problem. And this is always true of Pontiac, year after year—for Pontiac is deliberately designed to be America's "all-purpose" car.

HEY! FELLOWS, WE CAN CLEAN UP HERE!

STUDY THIS PICTURE WELL! Ask any farmer about a plague of grasshoppers! Ask any forester what would happen to your forests if a swarm of "grasshopper sawmills" should descend upon the Oregon-California forest lands without responsibility, without a thought to the future. There are some who would advocate this procedure.

Fortunately—there exists today another school of private lumbermen who believe in perpetuating the lumber industry; who believe that the efficient, profitable plan of operation for the Oregon-California forest lands is the accepted plan—Sustained Yield Forestry Agreements between the government and private owners.

Frankly—the "grasshopper" way leads to a possible and probable destruction of Oregon's greatest industry in a short time! The other road—the way of Sustained Yield Forestry Agreements—leads to a permanent lumber industry—to a prosperous Western Oregon!
