toward a permanent forest industry

-AN ENDLESS SUPPLY OF LOGS FROM TREE FARMS.

-IMPROVED UTILIZATION BY DIVERSIFIED MANUFACTURING.

THE year 1948 saw continuing progress in the company's efforts to insure its permanent operation. We are making progress in tree farming, diversified manufacturing, and the integration of different types of processing plants on one millsite. This, together with the development of new products and the creation of permanent markets, becomes more a reality as our plant additions program sees unit after unit being completed: The new hydraulic barkers; the bark products plant; the plywood plant; the sulphate plant; the Springfield lumber division and the container board plant.

In 1947 and 1948 the company spent nearly \$50,000,000 for additions to plants, equipment and roads. These new units will provide jobs for approximately 1,100 new employees and an estimated payroll increase of \$3,600,000 per year.

Yes, vital steps are being taken to build a permanent and profitable operation - profitable not only to Weyerhaeuser shareholders but also to company employees and the communities in which our mills are located.
