Qualifications of Electors Given

By Dep. Dist. Atty.

The greater majority of school patrons wishing to vote in any school election are aware of the recently changed election law, which liberalizes the provisions of the law as to who can vote. We quote a letter received from Harry L. Chase, county clerk, which was written by Sidney L. Thwing, deputy district attorney. (Mr. Thwing has since resigned, but the letter was written while he was still serving in this capacity).

"It is my understanding that an election in a school district held at any time, is a special election and therefore, the electors in that school district must register as a voter with the county clerk thirty days prior to such an election. . . . Therefore, it would seem from this, the attorney general's office is also of the opinion that before any elector can vote in a school election, he must be registered with the clerk's office for Lane county thirty days prior to the date of election. He must be a resident of the school district for six months preceding the election and he must be able to read and write the English language."

Trade Fairs

Apple Sauce
Flavor of apple sauce generally is better if the apples are peeled before cooking. If the apples are cooked unpeeled and then strained, the sauce may have a bitter taste from the peeling. Apples should be cooked rapidly in a covered pan, for long, slow cooking may destroy the delicate flavor and may even darken the sauce.
